CANNED FISH RETAIL PRICES

MAY 1959

Prepared in the Bureau of Commercial Fisheries

Branch of Market Development

FISHERY LEAFLET 476 h

Washington, D. C.

FOREWORD

The Bureau of Commercial Fisheries has contracted with the Bureau of Labor Statistics to obtain average retail prices for selected canned fish items. The retail prices as contained herein for several types of canned tuna, canned salmon, and canned Maine sardines were collected and processed by the U. S. Department of Labor in order to provide information on price levels in different cities. This issue contains the data for May 1959, and similar information will be published on a monthly basis through June 30, 1959.

Collection methods were those used regularly by the Bureau of Labor Statistics for its Consumer Price Index and described in its regular publications. Each city listed here has a population of 30, 500 or over, and prices were obtained by personal visits of agents to the retail stores in these cities each month. These stores include important chain organizations, and a sample of independent stores of all sizes scattered throughout each city.

Averages include prices for all brands available in each store each month, except that separate averages were computed for nationally advertised and non-nationally advertised brands of canned tuna. Since the prices of different brands vary, and the same brands may not be available each month in every store, care should be taken not to interpret differences in average prices from month to month as a measure of real price change on comparable items.

Separate average prices for chain stores and independent stores are computed, and city prices are an average of these two prices, weighted by the relative sales volume of chain and independent stores in each city. Chain store prices are averages of prices in each chain, weighted by the relative sales volume of the individual chain organizations. Independent store prices are unweighted averages of prices for all brands found in stores in the sample. All data shown are based on a minimum of three reporting stores, and also, in the case of chains, on reporting stores representing a minimum of about 30 percent of the sales volume of chains in the city. Asterisks on the tables indicate that although one or more prices were available, the number was insufficient to compute reliable averages. Blanks on the tables indicate that no prices were obtained.

Tabulations also include the percent of chain store weight represented in the prices, the number of independent store quotations obtained, and the range of individual prices.

This project is financed from funds provided by the Saltonstall-Kennedy Act.

NOTE - Prices refer to following weights for canned tuna -
Solid pack: 7 oz. ; Chunk: 6 1/2 oz. ; Flakes or grated: 6 oz.

Sardine prices are for the 3 3/4 oz. , or 4 oz. flat can.
