CANNED FISH - CONSUMER PURCHASES

AUGUST 1959

Prepared in the Bureau of Commercial Fisheries

Branch of Market Development

FISHERY LEAFLET 478 j

Washington, D. C.

REGIONAL MAP

INTRODUCTION

This information is collected as part of a broad marketing research program directed toward improving and expanding markets for canned tuna, canned salmon, and canned sardines. The data which are provided by the Market Research Corporation of America under contract with the Bureau of Commercial Fisheries, represent estimates of national purchases projected from a nationwide consumer panel of approximately 6,000 families representing 22,000 persons. They show the general level of purchases of each product, trends in the range of purchases, prices paid by consumers, and other related factors of interest to those engaged in the marketing of these items.

The data in this report represent estimated purchases of canned fish by household consumers only.

All data for single months in the report are based on four week periods (28 days) in order to permit comparisons between periods of equal length.

Reports for canned tuna, canned salmon, and canned sardines are shown by species or style of pack for:

U. S. Total
Five Regions (see Regional Map)
Three Outlet Groups

- a. Chains - Grocery stores owned and operated by firms with 11 or more units.
- b. Independent and Other - Includes food stores owned and operated by firms with 10 or less units; also department stores and country general stores.

The various measurements are defined as follows:

- a. Consumer Purchases - Cases (000's) - Projections to totals based on purchases reported from the sample. Data are shown for standard cases and are derived as follows:

Tuna - The equivalent of 48 - No. 1/2 cans to the case.

Salmon - The equivalent of 48 - 1 lb. cans to the case.

Sardines-California - The equivalent of 48 -
1 lb. cans to the case.

Sardines-Foreign - The equivalent of 100 -
1/4 cans to the case.

- b. Families Buying (000's and % of U.S. or Region)
Number of families buying is projected to totals based on families buying one or more times in the four week (28 day) period. The U. S. percentage is computed as that of the estimated total U. S. families accounted for by buying families. In October 1958, total U. S. families were estimated at 50,960,000. Regional percentages are computed as those of estimated families in each region. ("Families" in this report is defined as a household).
- c. Average Purchase Transaction Size - Cans
Average number of cans purchased per transaction. A transaction is a purchase of the same type and size of product, at the same price, in the same store, on the same date.
- d. Average Price Paid (¢/Can) - Actual consumer price paid per specified can size.

A twelve month report will contain, in addition to most of the above information, such consumer socio-economic factors as:

City-size location.
Income.
Education of head of household.
Size of family.
Age of housewife.
Presence of children by age group.
Employment status of housewife.

This project is financed from funds provided by the Saltonstall-Kennedy Act, and reports will be published monthly through September, 1959.

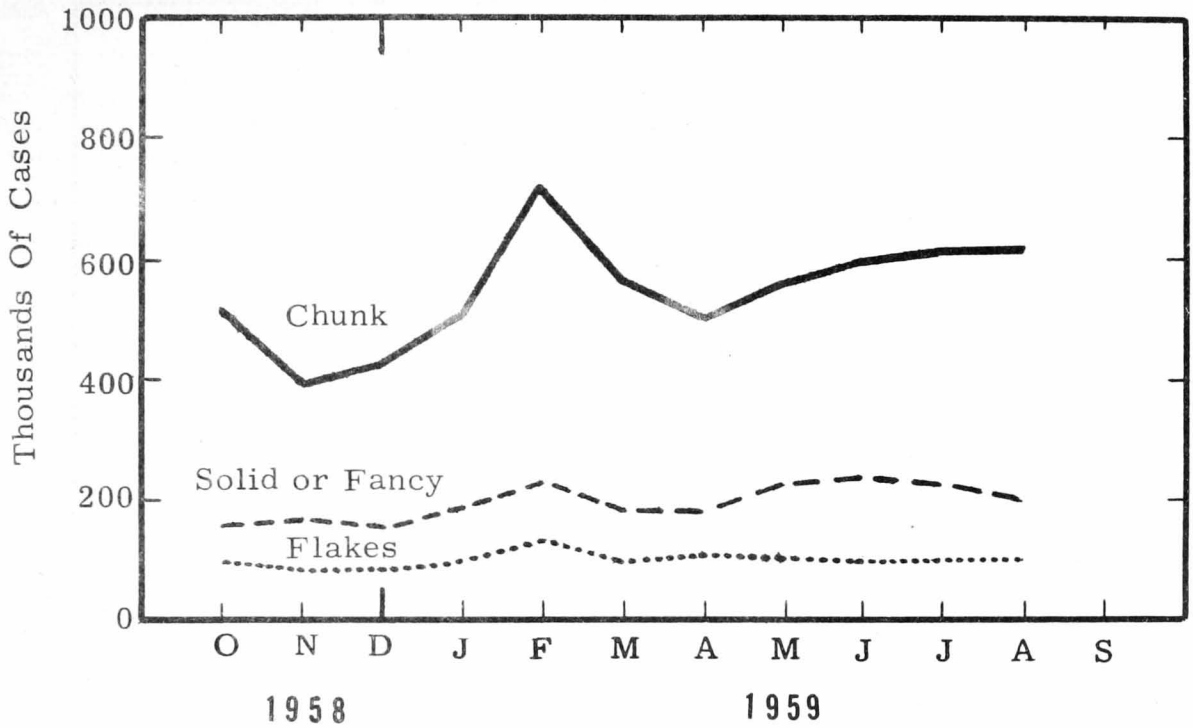

NOTE: - Monthly data for the period from October, 1958 through March, 1959 appeared in Fishery Leaflet 478 d which is now available through the Bureau of Commercial Fisheries, Washington 25, D. C.
