

Supplementary Table 1. Water-quality conditions observed during sampling for Gulf sturgeon (*Acipenser oxyrinchus desotoi*) in the Apalachicola River, in Florida, during May–July of 2016–2018. Values for temperature, dissolved oxygen, and salinity are reported as summary statistics for all net sets in which sturgeon were captured. NA indicates that data are not available because no sampling was conducted or no sturgeon were captured during that period.

Year	Mean water temperature (°C)			Maximum water temperature (°C)			Mean dissolved oxygen (mg/L)			Mean salinity		
	May	June	July	May	June	July	May	June	July	May	June	July
2016	NA	29.1	30.2	NA	31.3	31.0	NA	5.48	6.04	NA	0.06	0.07
2017	24.9	26.0	28.4	27.1	26.8	29.2	5.81	5.24	4.37	0.10	0.10	0.10
2018	25.7	29.1	28.9	26.6	29.6	29.7	5.41	4.94	4.77	0.09	0.09	0.09
