The NOAA Professional Paper NMFS (ISSN 1931-4590) series is published by the Scientific Publications Office, National Marine Fisheries Service, NOAA, 7600 Sand Point Way NE, Seattle, WA 98115.

The Secretary of Commerce has determined that the publication of this series is necessary in the transaction of the public business required by law of this Department. Use of funds for printing of this series has been approved by the Director of the Office of Management and Budget.

The NOAA Professional Paper NMFS series carries peer-reviewed, lengthy original research reports, taxonomic keys, species synopses, flora and fauna studies, and data-intensive reports on investigations in fishery science, engineering, and economics. Copies of the NOAA Professional Paper NMFS series are available free in limited numbers to government agencies, both federal and state. They are also available in exchange for other scientific and technical publications in the marine sciences. Professional Papers are published online in PDF format at <http://spo.nmfs.noaa.gov>

CONTENTS

Introduction	1
<i>Jeffrey M. Leis, William Watson, Bruce C. Mundy, and Peter Konstantinidis (guest editors)</i>	
H Geoffrey Moser's contributions to fisheries biology and ichthyology	3
<i>Bruce C. Mundy, Jeffrey M. Leis, William Watson, and Peter Konstantinidis</i>	
Discovery and description of elaborate larval cusk-eels and the relationships among <i>Acanthonus</i> , <i>Tauredophidium</i> , and <i>Xyelacyba</i> (Teleostei: Ophidiidae)	20
<i>Matthew G. Girard, Ai Nonaka, Carole C. Baldwin, and G. David Johnson</i>	
Morphological and swimming ontogeny in larvae of a small predator on coral reefs: the orchid dottyback (<i>Pseudochromis fridmani</i>) (Teleostei, Pseudochromidae)	43
<i>Jeffrey M. Leis and René Galzin</i>	
Osteological development of the surf silverside (<i>Notocheirus hubbsi</i>) (Teleostei: Atheriniformes: Notocheiridae)	57
<i>Brian S. Dyer, Francisca Zavala-Muñoz, Valentina Bernal-Durán, and Mauricio F. Landaeta</i>	
Larval development of multispotted goby (<i>Sicydium multipunctatum</i> Regan, 1906), <i>Awaous</i> sp. Valenciennes, 1837, and small goby (<i>Evorthodus minutus</i> Meek and Hildebrand, 1928) in the Mexican Pacific	81
<i>Ricardo Javier Saldierna-Martínez, Gerardo Aceves-Medina, Enrique A. González-Navarro, Sylvia Patricia A. Jiménez-Rosenberg, Armando Hernández-López, Martín Enrique Hernández-Rivas, Alejandro Trinidad Hinojosa-Medina, and José De La Cruz-Agüero</i>	
Larvae of the black durgon (<i>Melichthys niger</i>) (Teleostei: Balistidae) from the northern Gulf of Mexico	97
<i>Denice Drass and Glenn A. Zapfe</i>	
Larvae of checked swallowtail (<i>Odontanthias borbonius</i>) (Teleostei: Serranidae: Anthiinae), with comparisons of spiny ornamentation in related anthiine species	106
<i>Yoshinobu Konishi</i>	
Morphological and molecular identification of rare longhorn butterflyfish larvae (Chaetodontidae)	119
<i>Nalani K. Schnell, Ai Nonaka, Elodie Vourey, and G. David Johnson</i>	
Early life stages of the Japanese dory (<i>Zenion japonicum</i>) (Zeniontidae: Zeiformes) from the central North Pacific Ocean	134
<i>Peter Konstantinidis, Alvaro Cortes, Alton Livingstone, Rahiza De Thomas, Daniel Gilles, Alexander Brown, Noah Dolinajec, Sarah Wright, Kate Erly, Nathan Hayes, Colin Mulloy, Jermiko Sims, and Christopher Farnworth</i>	
Early larvae of the whitespotted rockfish (<i>Sebastes moseri</i> Eitner, 1999) and the dwarf-red rockfish (<i>S. rufinanus</i> Lea and Fitch, 1972) (Pisces: Sebastidae) identified by molecular methods	143
<i>Sharon R. Charter, William Watson, and John R. Hyde</i>	
Advancements in ichthyoplankton taxonomy in the large marine ecosystems of Alaska: 1979–2021	155
<i>Alison L. Deary, Morgan S. Busby, Jenna Barrett, Kelia E. Axler, and Ashlee Overdick</i>	
The phylogeny of bristlemouths, lightfishes, and portholefishes with a revised family-level classification of the dragonfishes (Teleostei: Stomiiformes)	167
<i>W. Leo Smith, Matthew G. Girard, H. J. Walker Jr., and Matthew P. Davis</i>	

Ontogenetic vertical distribution and abundance of early life history stages of mesopelagic fishes off central California	185
<i>Noelle M. Bowlin, Andrew R. Thompson, Juan P. Zwolinski, William Watson, and Philip A. Hastings</i>	
Seasonal and oceanographic variation in larval flatfish assemblages off the southeast Australian Coast	202
<i>Anthony G. Miskiewicz, Indiana J. Riley, Amelia J. Caley, Paloma A. Matis, and Iain M. Suthers</i>	
Larval fish assemblage dynamics in the York River estuary, Virginia, U.S.A.	218
<i>Cindy M. Marin Martinez, Robert J. Latour, Mary C. Fabrizio, Edward D. Houde, and Eric J. Hilton</i>	
Spatial and temporal variability of larval fish assemblages in the central region of the Brazilian Exclusive Economic Zone (12–22°S)	233
<i>Márcia Salustiano de Castro, Cristina de Oliveira Dias, and Ana Cristina Teixeira Bonecker</i>	
Species composition, distribution, and growth of <i>Diaphus</i> “slender-type” larvae (Pisces: Myctophidae) in the Kuroshio waters of the East China Sea	253
<i>Chiyuki Sassa, Motomitsu Takahashi, and Youichi Tsukamoto</i>	
Rapid long-distance multispecies transport of shorefish larvae to the oceanic tropical eastern Pacific, revealed by DNA barcodes and otolith aging of larvae captured over the Galapagos Rift	273
<i>Benjamin C. Victor</i>
