

Supplementary Figure 2

Images of 3 otoliths from picarel (*Spicara smaris*) sampled in the Saronikos Gulf, Greece. (A) First annulus has not started to form, and only a preannual zone can be seen (fish total length [TL]=5.1 cm, date of capture [DC]=July 1999). (B) First annulus is complete and is opaque on the edge (TL=14.9 cm, DC=July 1999). (C) Six annuli with the sixth on the edge (TL=19.3 cm, DC=June 1999).
