FISHERY STATISTICS
OF THE UNITED STATES
1946

BY
A. W. ANDERSON and E. A. POWER

UNITED STATES
GOVERNMENT PRINTING OFFICE
WASHINGTON : 1950

Fishery Statistics of the United States and Alaska are compiled and published annually to make available information on both the economic and biological aspects of the domestic commercial fisheries.

Data on the economic aspects are necessary to persons engaged in the commercial fishery and to governmental agencies concerned with its regulation and protection. Those here given cover the total catch and value by species, the yield and value of manufactured products and byproducts, the employment of men, craft, and gear in the capture of fishery products; and related information.

From the biological standpoint these data are important to sound fishery management in providing detailed information on fluctuations in the commercial catch by species, locality and gear; and on the types of gear and boats operated. They assist conservation agencies in regulating the commercial fisheries so as to produce maximum yields without depletion.

Previous statistical reports on the fishery industries were issued under the Department of the Interior in the Administrative Report series for 1938 and in the Statistical Digest series for succeeding years. Reports for preceding years were issued in the Administrative Report series of the former Bureau of Fisheries.

The following is a listing of the various Statistical Digests issued since 1939:

- No. 1 Fishery Statistics of the United States, 1939
- 2 Alaska Fishery and Fur Seal Industry, 1940
- 3 Propagation and Distribution of Food Fishes, Fiscal year, 1941
- 4 Fishery Statistics of the United States, 1940
- 5 Alaska Fishery and Fur Seal Industry, 1941
- 6 Propagation and Distribution of Food Fishes, 1941
- 7 Fishery Statistics of the United States, 1941
- 8 Alaska Fishery and Fur Seal Industry, 1942
- 9 Propagation and Distribution of Food Fishes, 1942
- 10 Alaska Fishery and Fur Seal Industry, 1943
- 11 Fishery Statistics of the United States, 1942
- 12 Propagation and Distribution of Food Fishes, 1943
- 13 Alaska Fishery and Fur Seal Industry, 1944
- 14 Fishery Statistics of the United States, 1943
- 15 Alaska Fishery and Fur Seal Industry, 1945
- 16 Fishery Statistics of the United States, 1944

INTRODUCTION

This report contains a review of the fishery statistics for the year 1946, collected by the Branch of Commercial Fisheries during 1947. These include data on the volume of the catch of fishery products and their value, employment in the fisheries, quantity of gear operated, the number of fishing craft employed in the capture of fishery products, and certain information on the volume and value of the production of manufactured fishery products and byproducts.

Statistical surveys for 1946 data were conducted in all sections except the Mississippi River States. Statistics on the various fisheries were collected by the following field agents: F. Freeland H. Haberland, D. A. McKown, C. B. Tendick, J. P. Wharton, R. H. Wilson, and F. M. Wood. The surveys in the New England States were supervised by B. E. Lindgren, and those in Washington and Oregon by E. C. Hinsdale. Data for the Great Lakes were assembled by the staff of Dr. John Van Oosten of the Division of Fishery Biology. Those on the fisheries of Alaska were collected by the Alaska Division of the Service.

The statistical surveys conducted during 1947, for 1946 data, were under the general direction of E. A. Power, Chief, Statistical Section, assisted by D. Y. Aska, Statistician. The survey material was assembled, tabulated, and prepared for publication by the staff of the Statistical Section under the direction of C. E. Peterson, Statistician, assisted by Elsie English, Evelyn Hecht, Melissa Tinkey, R. M. Wilkinson, R. J. LaRochelle and S. R. Feldman. G. I. Sundstrom prepared many of the illustrations contained in the report.

In assembling the data on the fisheries, use was made of all records collected by the various State fishery agencies. In the Great Lakes and the Pacific Coast States, these records were such that it was only necessary for the Service personnel to conduct partial surveys. Statistics on the imports and exports of fishery products were furnished by the Bureau of the Census.

Grateful acknowledgement is extended to the State and Federal agencies and to the various individuals who cooperated in furnishing portions of the data contained in this volume.

SECTION 1.- GENERAL REVIEW

Surveys covering the catch of fish and shellfish for the year 1946 were made in all areas except New Hampshire, New Jersey, Delaware, the South Atlantic and Gulf States, and the Mississippi River and its tributaries. All of these areas, except the Mississippi River and its tributaries, were canvassed for 1945, and detailed data published in "Fishery Statistics of the United States, 1945" (Statistical Digest No. 18). The most recent data available for the Mississippi River and its tributaries are for 1931. In the following tables, the most recent employment, operating unit, and catch statistics are shown for each section of the country.

During 1946, wartime problems of the fishing industry were gradually replaced by post-war problems. Availability of material and manpower increased, but costs of operation rose also. With the suspension of price controls on most fishery products, prices of the more popular items rose spectacularly. Consumer resistance to high prices caused cold storage stocks of some items to rise to record highs. This in turn caused fishing for certain species to either be stopped or curtailed until prices and demand had become adjusted. The adjustment of supply to demand was made gradually with less disruption to the industry than many had feared. This probably was due to the fact that the demand for most fishery products remained higher than had been anticipated.

The number of new vessels entering the fishing industry continued to rise sharply in 1946. The average number of vessels obtaining their first documents as fishing craft during the five year prewar period 1936-1940 was 365. During 1945, the number increased to 741, and during 1946, to 1,085. Complete data is not available on the total number of vessels engaged in fishing during 1946. In 1945, there were 6,929 vessels so engaged, and this number undoubtedly increased in 1946. The newer and, in many cases, larger vessels entering the industry raised the general level of efficiency of the fleet. The following table shows the number of vessels obtaining their first documents as fishing craft since 1937. These vessels were either new craft, or vessels that had not previously been documented for fishing.

VESSELS OBTAINING THEIR FIRST DOCUMENTS AS FISHING CRAFT,
1937 TO 1946 INCLUSIVE

<u>YEAR</u>	<u>NUMBER</u>	<u>YEAR</u>	<u>NUMBER</u>
1937	335	1942	358
1938	1/ 376	1943	358
1939	357	1944	635
1940	320	1945	741
1941	354	1946	1,085

1/ DATA ARE PARTLY ESTIMATED.

The total catch of fishery products in the United States and Alaska in 1946 was slightly smaller than in the previous year, and was far less than the record catch of 1941. However, the value of the landings was higher than in any previous year. Landings of pilchard declined sharply, and were surpassed by menhaden for the first time since 1932. The catch of pilchard dropped to 531 million pounds, compared with 850 million pounds the previous year, and the 1936 record yield of 1-1/2 billion pounds. Available data indicate that the 1946 catch of menhaden, which amounted to 920 million pounds, established a new record for this species. The production of cod totaled 103 million pounds--50 million pounds less than in 1945, while the catch of tuna established a new record of 222 million pounds--an increase of 36 million pounds over the previous year's production.

The total catch of fishery products in the United States and Alaska, as based on the most recent surveys available through 1946, amounted to 4,403,282,000 pounds, valued at \$286,117,772 to the fishermen. However, if 1946 data had been available for all areas, it is estimated that the catch would have been found to total about 4,456,000,000 pounds,

GENERAL REVIEW

valued at \$310,000,000. The following table, which contains recorded production for the areas in which surveys were made and estimates for other areas, indicates the trend of the yield and value of the domestic catch during recent years.

YEAR	POUNDS	VALUE TO THE FISHERMEN	AVERAGE PRICE PER POUND
1939	4,443,328,000	\$96,532,000	2.17¢
1940	4,059,524,000	98,957,000	2.44
1941	5,080,341,000	134,172,000	2.64
1942	3,876,524,000	170,338,000	4.39
1943	4,202,000,000	204,000,000	4.85
1944	4,500,000,000	213,000,000	4.73
1945	4,575,400,000	269,900,000	5.82
1946	4,456,000,000	310,000,000	6.96

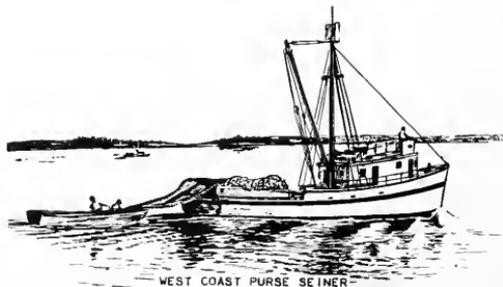

It is estimated that 1,674 million pounds of fish (round weight basis) were marketed as fresh and frozen products, 1,277 million pounds were used for canning, 1,405 million pounds for byproducts and bait, and 100 million pounds for cured products during 1946. The amount used for byproducts, bait, and canning increased slightly over 1945, while the quantity used for fresh and frozen decreased sharply.

The production of canned fishery products in the United States and Alaska during 1946 amounted to 599,375,511 pounds, valued at \$227,629,455, and the output of fishery by-products had a sales value at processors' level of \$76,642,850. The yield of canned fishery products and fishery byproducts set new records although the poundage of canned products was lower than in 1936 and 1941.

The frozen fish trade was very active throughout the year, with total freezings amounting to 280,065,000 pounds. This was approximately 6 million pounds less than was frozen in the previous year, but still far more than any other earlier year.

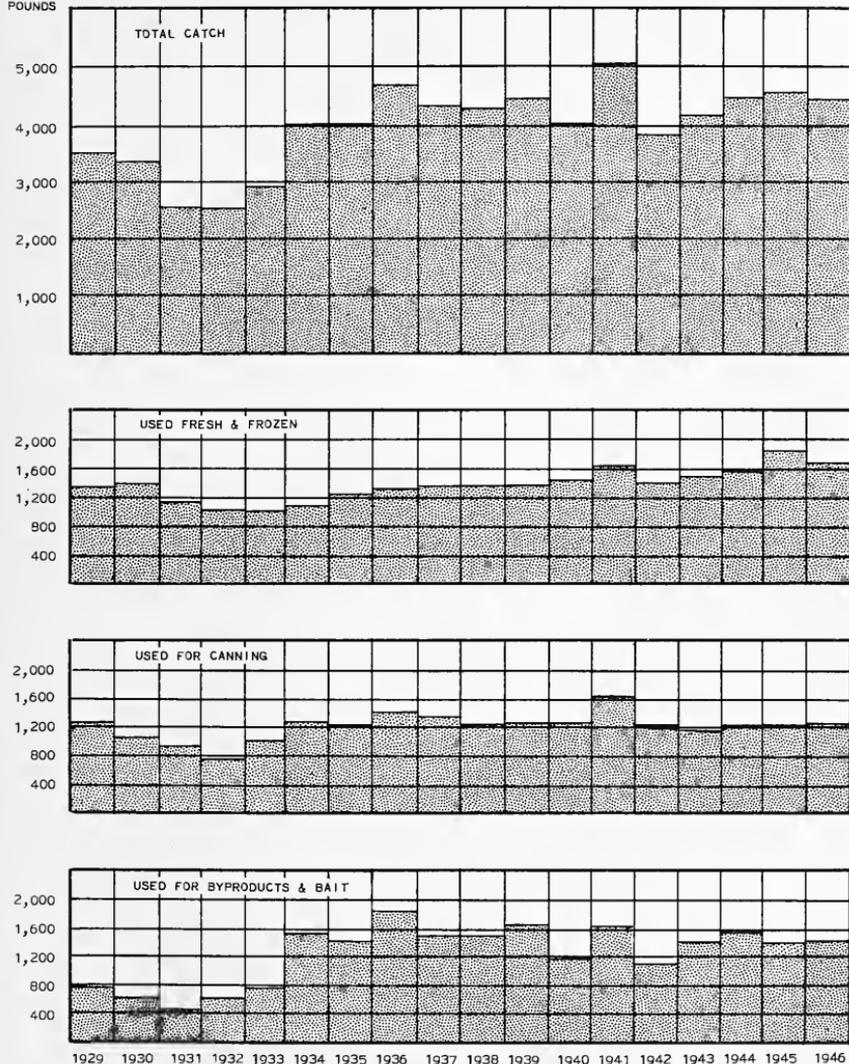

The value of United States foreign trade in fishery products increased 41 percent, compared with the previous year. The value of imports advanced from 101 million dollars in 1945 to 130 million dollars in 1946. During the same period the value of exports increased from 39 million dollars to 68 million dollars. Among the more important imports registering sizeable increases were fresh herring, groundfish fillets, shrimp, and spiny lobster tails; canned sardines, fish cakes, and balls; pickled herring; cod liver oil; and sponges. The largest increases in exports occurred in shipments of canned fishery products, and in fish oils and concentrates. Exports of canned salmon, sardines, groundfish, herring and unclassified shellfish (principally canned squid) all showed large gains.

A review of the fisheries of each geographical area will be found at the beginning of each section in this volume. Summaries of the more important specific fisheries will be found in Section 10. Summarized data of the operating units and catch have been previously published in Current Fisheries Statistics No. 487.

UNITED STATES AND ALASKA CATCH 1929-1946

MANUFACTURED FISHERY PRODUCTS

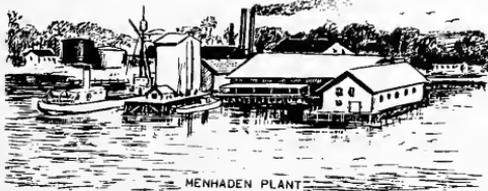

The output of manufactured fishery products (canned, cured, packaged and byproducts) in the United States and Alaska during 1946 had an estimated value of 430 million dollars, making it the most valuable production in history. Of this amount, canned products are estimated to have accounted for 53 percent; byproducts, 18 percent; packaged shellfish, 12 percent; packaged fish, 11 percent; and cured fish, 6 percent. Although 1946 data are not available on the production of packaged shellfish, a spectacular increase is known to have occurred in the value of shucked oysters and clams, and in both the volume and value of the production of packaged shrimp since the last figures were collected for these items in 1940. Consequently, these products account for a considerable portion of the increase over the data published in the following table which represent the most recent data available on the production of manufactured fishery products. The value of manufactured fishery products in the United States and Alaska, listed in the tabulation which amounted to \$385,187,061 represent the most recent complete figures collected by the Service on the volume and value of the production of manufactured fishery products.

Since it was not possible to conduct a survey for data on the 1946 production of cured fishery products (salted, smoked, dried, etc.), packaged shellfish, and manufactured items produced by fishermen, the following compilation of manufactured fishery products consists of composite data, based on the most recent statistics available. Data on the production of canned fishery products, byproducts, and packaged fish are for 1946; statistics on the output of cured products and packaged shellfish are for 1946 in Alaska and for 1940 in all other sections, except the Mississippi River and its tributaries, which are for 1931; and data on the yield of fishermen's prepared products are for 1940 in all areas except the Mississippi River and its tributaries, which are for 1931. Data on the production of manufactured fishery products do not include information on the yield of packaged fish in California, since figures were not collected on the yield in that State. It is estimated that the 1946 production of packaged fish in California amounted to 7.5 million pounds.

The pack of canned fishery products in 1946 totaled 699,375,511 pounds, valued at \$227,629,455 at processors' level. This was an increase of 53 million pounds and 75 million dollars compared with 1945. Production of canned salmon decreased from 1945, while the packs of tuna, clams, and crab meat set new records. The output of canned oysters and shrimp increased substantially, but was still far below prewar averages.

The quantity of meal and scrap processed in 1946 (399,242,000 pounds, valued at \$20,439,423) was slightly less than in 1945, although the value was 42 percent greater. The yield of fish and marine animal oils (152,721,836 pounds, valued at \$34,702,132) was 18 percent below the previous year, but the value was 27 percent greater.

The quantity of packaged fish packed during 1946, excluding the production in California, totaled 188,572,082 pounds, valued at \$46,302,338 at processors' level. This was 16 million pounds and 2 million dollars below the record 1945 production. Data on the production of packaged fish in the following table are slightly larger than those in the Packaged Fish Section of this Digest, as that section contains data for continental United States only, while the following table includes data for Alaska.

- 1/ DATA ON THE PRODUCTION OF CANNED PRODUCTS AND BYPRODUCTS ARE FOR 1946. THOSE ON THE PRODUCTION OF PACKAGED FISH ARE FOR 1946, EXCEPT FOR CALIFORNIA, WHICH IS OMITTED, AS NO DATA ARE AVAILABLE. IT IS ESTIMATED THAT THE 1946 PRODUCTION OF PACKAGED FISH IN CALIFORNIA TOTALED 7,500,000 POUNDS. DATA ON THE PRODUCTION OF CURED PRODUCTS AND PACKAGED SHELLFISH ARE FOR 1946 IN ALASKA, 1931 IN THE MISSISSIPPI RIVER AREA, AND FOR 1940 IN ALL OTHER AREAS. DATA ON PRODUCTION BY FISHERMEN ARE FOR 1931 IN THE MISSISSIPPI RIVER AREA AND FOR 1940 IN ALL OTHER AREAS.
- 2/ THIS IS USUALLY AN INTERMEDIATE PRODUCT AND ALTHOUGH SHOWN IN THE TOTAL MAY ALSO BE SHOWN IN ITS FINAL STAGE OF PROCESSING ELSEWHERE IN THE TABLE.
- 3/ INCLUDED IN UNCLASSIFIED PRODUCTS
- 4/ INCLUDES FRESH FILLETS OF BUFFALOFISH, CARP, RED DRUM, GROUPEL, PERCH, RED SNAPPER, SPANISH MACKEREL, STRIPED BASS, AND UNCLASSIFIED FISH; AND FROZEN FILLETS OF SHAD AND STRIPED BASS.
- 5/ INCLUDES FRESH STEAKS OF COD, GROUPEL, SEA BASS, RED SNAPPER, AND SWORDFISH; AND FROZEN ROCKFISH STEAKS.
- 6/ INCLUDES FRESH PAN-DRESSED CATFISH, CROAKER, SEA BASS, AND SPANISH MACKEREL; FROZEN PAN-DRESSED CROAKER, SEA BASS, MULLET, AND SPANISH MACKEREL; AND FRESH SPLIT "BUTTERFLY" SEA TROUT.
- 7/ INCLUDES FRESH-COOKED SPINY LOBSTER MEAT AND FRESH SHUCKED SURF CLAMS.
- 8/ INCLUDES CANNED COD AND HADDOCK TRIMMINGS, CARP AND BUFFALOFISH, CARP FLAKES, EELS, LAKE HERRING, JELLIED AND FRIED HERRING, MULLET, POLLOCK, TUNA BORS D'OEUVRES, AND LITTLE AND ATLANTIC BLUEFIN TUNA.
- 9/ INCLUDES CANNED ABALONE, CLAM LOAF, PICKLED OYSTERS, DEVILED CRAB AND SHRIMP, AND CRAB AND SHRIMP COCKTAILS.
- 10/ INCLUDES CANNED FINNAN HADDIE; KIPPED HERRING; AND SMOKED CARP FLAKES, PILCHARD, SABLEFISH, AND OYSTERS.
- 11/ INCLUDES SALTED BLUE RUNNER, MENHADEN ROE, SALMON BELLIES, SEA TROUT, AND STURGEON ROE; DRY SALTED BARRACUDA, JEWFISH FILLETS, PILCHARD; PACIFIC SEA BASS, TUNA, BONITO, AND YELLOWTAIL; AND PICKLED TONGUES AND SOUNDS.
- 12/ INCLUDES SMOKED BARRACUDA, HALIBUT, KING MACKEREL, LINGCOD, MOONEYE, POLLOCK, SHEEPSHEAD, THIMBLE-EYED MACKEREL, TUNA, MENOMINEE WHITEFISH, AND WHITING; AND KIPPED ALBACORE.
- 13/ INCLUDES ALEWIFE, CARP, SHARK, TUNA VISCERA, DUNGENESS CRAB, HORSESHOE CRAB, LOBSTER, AND UNCLASSIFIED MEAL AND SCRAP.
- 14/ INCLUDES ALEWIFE, BLACKFISH, GROUND FISH, AND UNCLASSIFIED OIL.
- 15/ INCLUDES BURBOT, ROCKFISH, SABLEFISH, SEA BASS, SWORDFISH, AND UNCLASSIFIED LIVER OIL; AND UNCLASSIFIED VISCERA OIL.
- 16/ INCLUDES ALGIN, AGAR AGAR, ALGINATES, AMINO ACIDS, CLAM EXTRACT, FISH MOSS EXTRACT, ISINGLASS, KELP MEAL, AND POULTRY FOOD AND UNBURNED LIME FROM COQUINA SHELL AND HARD CLAM SHELL.

NOTE:--SOME OF THE ABOVE PRODUCTS HAVE BEEN MANUFACTURED FROM RAW PRODUCTS IMPORTED FROM ANOTHER COUNTRY; THEREFORE, THEY CANNOT BE CORRELATED DIRECTLY WITH THE CATCH WITHIN THE UNITED STATES AND ALASKA. THE LIME AND POULTRY FEED MANUFACTURED FROM SHELL PRODUCTS WAS PRODUCED FROM OYSTER AND CLAM SHELLS WHICH ARE NOT INCLUDED IN THE CATCH STATISTICS FOR THESE SHELLFISH.

PRODUCTION OF CERTAIN MANUFACTURED FISHERY PRODUCTS, 1937 - 1946

CANNED FISHERY PRODUCTS AND BYPRODUCTS

The output of canned fishery products and byproducts in the United States and Alaska in 1946 was valued at \$304,272,305 at the processors' level. This was slightly less than in the record year, 1945, but 90 million dollars above the previous record amount received for these products in 1944. Canned products accounted for \$227,629,455 of the 1946 production and byproducts, \$76,642,850.

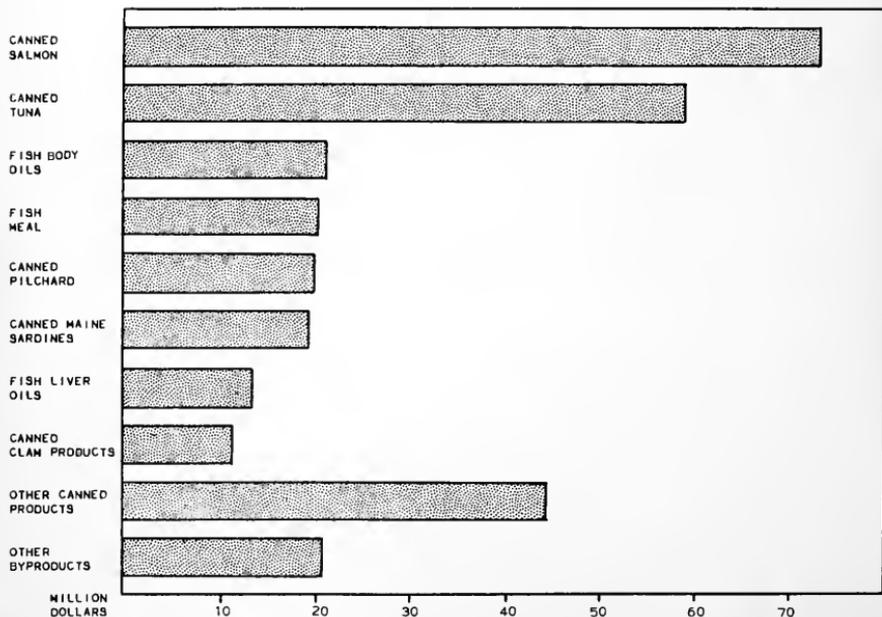

Demand for most canned products and byproducts was exceptionally good, especially during the first part of the year. All remaining price controls were removed during the year, encouraging production and raising the value of the output. Although tin conservation controls remained, they were liberalized to a point where they did not hinder production. However, supplies of cans were sufficiently low to cause concern, although little, if any, actual loss of production could be charged to shortages of containers. Shipping cartons and boxes remained scarce throughout the year.

During 1946, fishery products were canned in 436 plants, 76 more than in 1945. The combined output of these plants amounted to 20,486,164 standard cases or 699,375,511 pounds, an increase of 8 percent above the net weight of the pack in the previous year. Three items, salmon, 221,551,728 pounds, sardines, 195,287,902 pounds, and tuna, 93,887,781 pounds, accounted for 73 percent of the total net weight of the pack.

Fishery byproducts were processed in 287 plants, 33 less than in 1945. Marine animal oil, \$34,702,132, and marine animal scrap and meal, \$20,439,423, accounted for 72 percent of the value of the production.

Canned fishery products and byproducts were prepared in 26 states and Alaska during 1946. California ranked first in value of products, followed by Alaska, Washington, and Maine in that order.

PACKAGED FISH

The total production of fresh and frozen packaged fish (fillets, steaks, pan-dressed, etc.) in the United States during 1946 is estimated to have totaled about 196 million pounds, compared with 215 million pounds in the previous year. Complete information on the production of packaged fish was not available since data were not collected in California. However, it is estimated that the 1946 production in that State amounted to 7.5 million pounds.

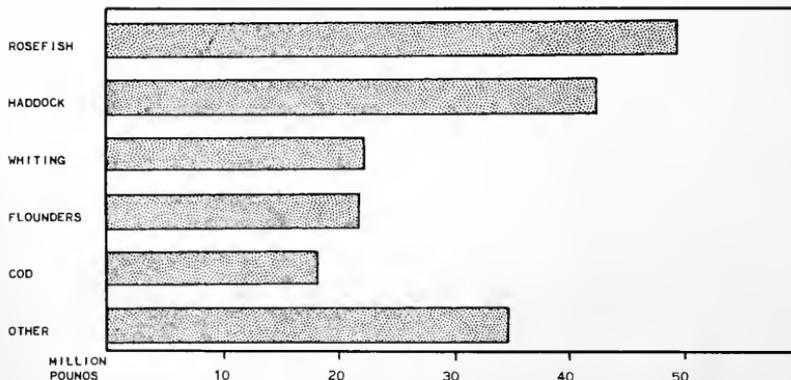

The yield of packaged fish in the coastal and Great Lakes regions, excluding California, amounted to 188,480,086 pounds, valued at \$46,282,538, compared with 204,926,699 pounds, valued at \$48,370,703, in 1945. The spectacular increase in the quantity of rosefish processed, was not sufficient to offset decreased production of packaged cod, haddock, hake, mackerel, rockfish, and whiting.

Rosefish fillets, with a production of 49,507,340 pounds, was the largest single item of packaged fish produced in 1946. Haddock fillets (42,440,850 pounds) and various forms of packaged whiting (22,128,671 pounds) were the second and third in importance. Fillets accounted for 88 percent of the total; pan-dressed fish, 9 percent; split "butterfly" fish, 2 percent; and steaks, 1 percent.

Due to the importance of the groundfish fishery in New England, that area produced 78 percent (152,894,848 pounds) of the 1946 domestic production of packaged fish. The Pacific Coast, (excluding California) was second with 15,462,899 pounds, followed by the Middle Atlantic States with 14,436,858 pounds.

Statistics in this section cannot be correlated directly with those published in the section on manufactured fishery products, as that section includes a small production in Alaska which is not included in the following tables. The following data have been previously published in "Current Fishery Statistics No. 388"

PRODUCTION OF PACKAGED FISH, 1946

1/ INCLUDES A SMALL QUANTITY OF THIS SPECIES PRODUCED IN ANOTHER SECTION WHICH CANNOT BE SHOWN SEPARATELY AS LESS THAN THREE FIRMS REPORTED ITS MANUFACTURE.

2/ DATA ARE SHOWN ONLY WHEN THREE OR MORE FIRMS REPORTED A PRODUCTION OF A SPECIES. IN THOSE INSTANCES WHERE LESS THAN THREE FIRMS REPORTED, THE PRODUCTION HAS BEEN INCLUDED WITH THAT OF ANOTHER SECTION.

3/ NEW ENGLAND INCLUDES SHAD AND SWORDFISH; CHESAPEAKE, SOUTH ATLANTIC AND GULF - CATFISH, GROUPEL, MULLET, RED DRUM, RED SNAPPER, AND STRIPED BASS; AND GREAT LAKES - BUFFALOFISH, CARP, AND MISCELLANEOUS FISH.

NOTE:--PACKAGED FISH WERE PRODUCED IN THE FOLLOWING STATES: NEW ENGLAND - MAINE, MASSACHUSETTS, AND CONNECTICUT; MIDDLE ATLANTIC - NEW YORK AND NEW JERSEY; CHESAPEAKE BAY, SOUTH ATLANTIC AND GULF - VIRGINIA, NORTH CAROLINA, AND ALABAMA; GREAT LAKES - NEW YORK, PENNSYLVANIA, OHIO, ILLINOIS, MICHIGAN, WISCONSIN AND MINNESOTA; AND PACIFIC - WASHINGTON AND OREGON.

PRODUCTION OF PACKAGED FISH, 1929 - 1946

FROZEN FISH TRADE

FISH FROZEN

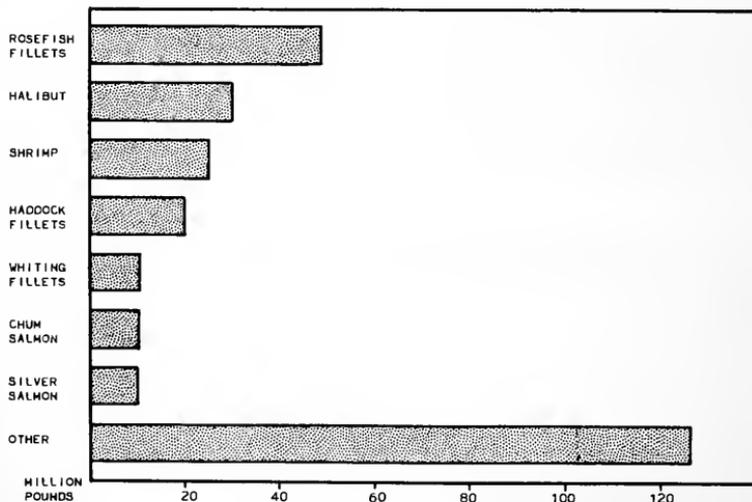

A total of 280,065,393 pounds of fishery products were frozen during 1946 by domestic freezing plants that reported their activities to the Fish and Wildlife Service. This was approximately 6 million pounds less than the record production in the previous year.

In 1946, 84 percent of the freezings consisted of salt-water fish; 13 percent, shellfish; and 3 percent, fresh-water fish. Seven items accounted for 55 percent of the total poundage frozen. These were rosefish fillets, which comprised 16 percent of the total; halibut, 11 percent; shrimp, 9 percent; haddock fillets, 7 percent; and whiting fillets, fall or chum salmon, and silver salmon, 4 percent each. The quantity of rosefish fillets frozen was nearly 18 million pounds more than during the previous year. This increase was more than offset by a decrease of nearly 16 million pounds in the freezings of various forms of whiting, and smaller declines in cod fillets, lake herring and cisco, tuna, and other items.

According to geographical sections, the New England States led all other sections in the freezings of fishery products, accounting for 47 percent of the total. Alaska ranked second with 18 percent, followed by the Pacific Coast States with 14 percent.

The demand for frozen products generally remained high throughout the year, although it became much more selective. Difficulty was experienced in moving some of the less popular items, and for short periods of time, even some of the more popular items experienced some sales resistance as prices rose to new highs. In New England, during the latter part of the year, fishing vessels were held in port on several occasions as the cold storage plants were glutted. These tieups were fortunately of short duration, as demand picked up with the resumption of more realistic prices.

PRODUCTION OF FROZEN FISHERY PRODUCTS, 1946

GENERAL REVIEW

NEW ENGLAND INCLUDES THE SIX STATES OF THAT SECTION; MIDDLE ATLANTIC--NEW YORK, NEW JERSEY, AND PENNSYLVANIA; SOUTH ATLANTIC--DELAWARE, MARYLAND, DISTRICT OF COLUMBIA, VIRGINIA, WEST VIRGINIA, NORTH CAROLINA, SOUTH CAROLINA, GEORGIA, AND FLORIDA; NORTH CENTRAL, EAST--OHIO, ILLINOIS, INDIANA, MICHIGAN, AND WISCONSIN; NORTH CENTRAL, WEST--MINNESOTA, IOWA, MISSOURI, NORTH DAKOTA, SOUTH DAKOTA, NEBRASKA, AND KANSAS; SOUTH CENTRAL--KENTUCKY, TENNESSEE, ALABAMA, MISSISSIPPI, LOUISIANA, TEXAS, OKLAHOMA, AND ARKANSAS; AND PACIFIC--WASHINGTON, OREGON, AND CALIFORNIA.

HOLDINGS

Holdings of frozen fish and shellfish on the first of each month in 1946 averaged 119,261,941 pounds, an increase of 41 percent over the average for the preceding year. Holdings on December 1, 1946, which totaled over 158 million pounds were the highest ever recorded. The low point for holdings during the year was reached on May 1, when 75 million pounds were in storage. According to the geographical distribution of average monthly holdings, the Middle Atlantic States ranked first, followed closely by the New England States.

NEW ENGLAND INCLUDES THE SIX STATES OF THAT SECTION; MIDDLE ATLANTIC--NEW YORK, NEW JERSEY, AND PENNSYLVANIA; SOUTH ATLANTIC--DELAWARE, MARYLAND, DISTRICT OF COLUMBIA, VIRGINIA, WEST VIRGINIA, NORTH CAROLINA, SOUTH CAROLINA, GEORGIA, AND FLORIDA; NORTH CENTRAL, EAST--OHIO, ILLINOIS, INDIANA, MICHIGAN, AND WISCONSIN; NORTH CENTRAL, WEST--MINNESOTA, IOWA, MISSOURI, NORTH DAKOTA, SOUTH DAKOTA, NEBRASKA, AND KANSAS; SOUTH CENTRAL--KENTUCKY, TENNESSEE, ALABAMA, MISSISSIPPI, LOUISIANA, TEXAS, OKLAHOMA, AND ARKANSAS; AND PACIFIC--WASHINGTON, OREGON, AND CALIFORNIA.

COLD-STORAGE HOLDINGS OF CURED FISH

During 1946, monthly cold storage holdings of cured herring averaged 11,378,325 pounds, while those of mild-cured salmon averaged 5,699,307 pounds. Compared with 1945, this represents an increase of 9 percent in the average holdings of cured herring and 87 percent in average mild-cured salmon stocks. Holdings of cured herring were largest between June and December, when stocks remained above 11 million pounds. The largest stocks of mild-cured salmon were held on the first of the months of October, November, and December, when they remained above 8.5 million pounds.

ROSEFISH

FOREIGN FISHERY TRADE ¹

The value of United States foreign trade in fishery products in 1946 amounted to \$197,884,988, of which \$129,660,623 represented the value of these products imported for consumption and \$68,224,365 the value of exports of domestic fishery products. The value of imports for consumption was 28 percent above the record set the previous year. The value of exports of domestic fishery products increased 77 percent above the all-time record of 1945.

Fishery imports consisted of 473,366,462 pounds of edible products, valued at \$89,960,799 and non-edible products valued at \$39,699,824.

Fishery exports were made up of 205,941,417 pounds of edible products valued at \$39,628,685, and non-edible products valued at \$28,595,680.

The data presented in the following tables are preliminary and are subject to minor revisions as they have been prepared for publication prior to the issuing of "Foreign Commerce and Navigation of the United States" by the Bureau of the Census.

¹ These statistics have been furnished by the Bureau of Census, Department of Commerce.

EXPORTS OF DOMESTIC FISHERY PRODUCTS, 1946

NOTE:--THESE DATA ARE PRELIMINARY AS THEY WERE COMPILED PRIOR TO THE ISSUING OF "FOREIGN COMMERCE AND NAVIGATION OF THE UNITED STATES", 1946".

SECTION 2.- NEW ENGLAND FISHERIES

(Area XXII)²

During 1946, wartime difficulties eased somewhat, but they were replaced by postwar problems of almost equal magnitude. Most of the large trawlers fishing out of Boston were tied up for nearly five months, from December 28, 1945 to May 24, 1946, by a dispute over the distribution of shares for the vessel and fishermen. Some of the newer vessels had contracts which were satisfactory to the fishermen, and these vessels, as well as the small and medium trawlers, continued to fish. Price ceilings on most fishery products were suspended for 90 days on May 20 and removed on August 18. Prices on the more popular varieties of fish advanced sharply when ceilings were suspended, while others failed to rise and some even declined. Consumer resistance to high prices caused cold storage stocks of some species, notably rosefish (ocean perch) to rise to record heights. Storage facilities in Gloucester were over-taxed to a point where it was necessary to stop fishing operations while part of the frozen fish was sold and moved into consumption channels. During the summer months, catches of cod, whiting, and mackerel were placed on limits and fishing craft were required to layover in port between trips. Imports of groundfish fillets continued to rise, which increased competition in the sale of the New England fillets. The number of fishing craft and the quantity of gear utilized increased during the year. With the release of additional men from the armed services, and the lessening employment in war industries, the number of men and women available for employment in the fishing industry increased to a point where labor shortages were practically overcome.

Surveys covering the catch of fish and shellfish were conducted in Maine, Massachusetts, Rhode Island, and Connecticut for 1946. No survey was conducted for that year for New Hampshire, so 1945 catch data for that state have been included. This has little effect on the New England total as New Hampshire normally accounts for less than one percent of the total. No surveys were made of operating units in New Hampshire, Massachusetts, or Rhode Island for 1946.

The yield of the commercial fisheries of the New England States during 1946 amounted to 805,562,600 pounds, valued at \$62,071,876 to the fishermen making this the most valuable catch in the history of the fishery. The 1946 catch decreased 5 percent in quantity but increased 10 percent in value compared with 1945. The quantity of fish and shellfish landed in Maine and Connecticut was larger in 1946 than in the preceding year while it was smaller in Massachusetts and Rhode Island. The value was greater in each state than in the previous year.

There were large variations in the landings of the major species. Rosefish (ocean perch) production set a new record, and the haddock catch was the largest since 1939. However, landings of cod were over 52 million pounds below the previous year's catch, and production of whiting decreased nearly 27 million pounds.

The production of packaged fish in the New England States in 1946 decreased 5 percent in volume, but increased 2 percent in value compared with 1945. The large increase in the yield of rosefish (ocean perch) fillets was more than offset by the decrease in the quantity of cod and whiting packaged. The most important item, both in quantity and value, was rosefish (ocean perch) fillets.

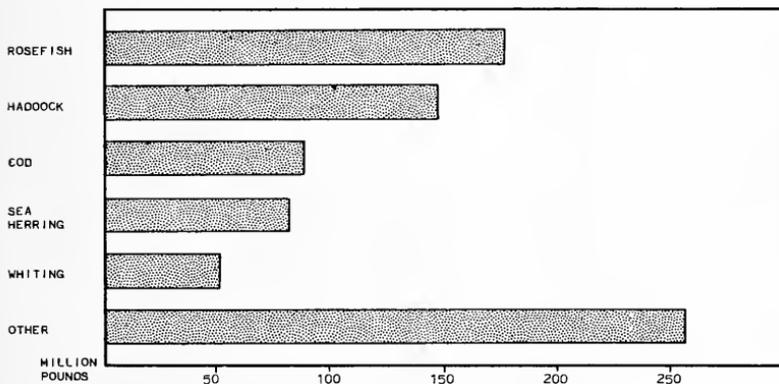

The production of canned fish and fishery byproducts in these States in 1946 was valued at \$36,870,126. This represents an increase of 58 percent compared with 1945. The most important item was canned sardines. The pack of these fish amounted to 3,018,597 standard cases, valued at \$19,548,531, which made this the most valuable ever canned in this area. A total of 60 plants were engaged in producing canned fishery products and 29 plants in producing fishery byproducts.

The last complete survey of the fishery transporting, wholesaling, and manufacturing industries was made for 1940. In that year, 186 men were employed in the operation of 84 vessels engaged in the transporting trade, and 12,650 persons were employed in wholesale and manufacturing establishments. The latter employees received \$7,547,395 in salaries and wages during 1940. Detailed statistics on these branches of the industry for 1940 can be found in Fishery Statistics of the United States, 1944 (Statistical Digest No. 16).

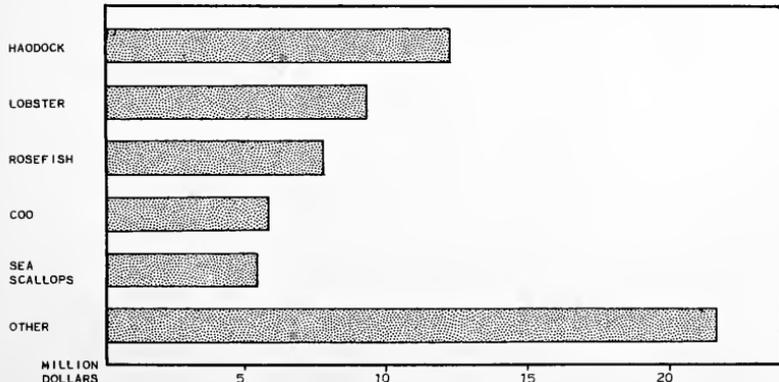

The following tables contain a composite summary of the operating units for Maine and Connecticut for 1946 and for New Hampshire, Massachusetts and Rhode Island for 1945, as well as detailed data on the 1946 catch in all of these states, except New Hampshire. Condensed summary data of the operating units and catch by states of the New England fisheries, appearing in the following pages, have been previously published in Current Fishery Statistics No. 480. Detailed data of the 1945 catch and operating units can be found in Fishery Statistics of the United States, 1945 (Statistical Digest No. 18).

² This number was assigned to this area by the North American Council on Fishery Investigations. It should be explained that there are included in this area craft whose principal fishing ports are in the area but at times fish elsewhere. A notable example is the southern trawl fishery which extends into Area XXIV.

MANUFACTURED FISHERY PRODUCTS - Continued

- 1/ DATA ON THE PRODUCTION OF CANNED PRODUCTS, BYPRODUCTS, AND PACKAGED FISH ARE FOR 1946. DATA FOR ALL OTHER PRODUCTS (SALTED AND SMOKED ITEMS, PACKAGED SHELLFISH, AND FISHERMEN'S PREPARED PRODUCTS) ARE FOR 1940.
- 2/ THIS ITEM HAS BEEN INCLUDED WITH "UNCLASSIFIED PRODUCTS".
- 3/ THIS ITEM HAS BEEN INCLUDED WITH "MISCELLANEOUS PRODUCTS".
- 4/ THIS ITEM IS USUALLY AN INTERMEDIATE PRODUCT AND ALTHOUGH INCLUDED IN THE TOTAL, MAY BE SHOWN IN ITS FINAL STAGE OF PROCESSING IN THIS OR ANOTHER SECTION.
- 5/ FROZEN FILLETS ARE INCLUDED WITH FRESH FILLETS.
- 6/ INCLUDES FRESH PAN-DRESSED WHITING, FROZEN FILLETS OF MACKEREL AND WHITING, AND FROZEN SPLIT BUTTERFLY WHITING.
- 7/ INCLUDES FROZEN SHAD FILLETS AND FRESH COD AND SWORDFISH STEAKS.
- 8/ INCLUDED WITH OTHER CANNED PRODUCTS.
- 9/ INCLUDES CANNED FINNAN HADDIE, POLLOCK, POLLOCK ROE, SHAD, SHRIMP, FISH CAKES, FISH HASH, FISH SPREAD AND SEAFOOD CHOWDER.
- 10/ INCLUDES CANNED ALEWIVES, HADDOCK CHOWDER, COD AND HADDOCK TRIMMINGS, KIPPERED HERRING, SARDINES, CLAM CHOWDER, CLAM LOAF, FISH CAKES, FISH FLAKES, FISH SPREAD, FISH PASTE, SEAFOOD CHOWDER, AND UNCLASSIFIED FISH ROE.
- 11/ INCLUDES SALTED BONELESS AND ABSOLUTELY BONELESS COD AND HAKE; DRY SALTED CUSK, HAKE, AND POLLOCK; AND GREEN SALTED CUSK AND HADDOCK.
- 12/ INCLUDES SALTED ALEWIVES, WHOLE AND BONELESS CUSK, HAKE, POLLOCK, AND BONELESS AND ABSOLUTELY BONELESS HADDOCK AND HAKE; DRY SALTED COD, HADDOCK, HAKE, AND POLLOCK; BRINE SALTED HERRING, MACKEREL AND MACKEREL FILLETS; PICKLED HERRING IN VINEGAR; AND PICKLED TONGUES AND SOUNDS.
- 13/ INCLUDES SMOKED ALEWIVES, CUSK, CUSK FILLETS, HERRING, AND POLLOCK.
- 14/ INCLUDES SMOKED ALEWIFE FILLETS, HAKE FILLETS, HARD BLOATERS, MEDIUM SCALED HERRING, AND MACKEREL FILLETS; AND KIPPERED HERRING.
- 15/ INCLUDES COD, HALIBUT, SHARK, SWORDFISH, TUNA, AND UNCLASSIFIED LIVER OIL; AND BLACKFISH AND ROSEFISH OIL.
- 16/ INCLUDES COD LIVER OIL, LOBSTER AND UNCLASSIFIED MEAL, GLUE, ALGIN, AND FRESH-SHUCKED HARD CLAMS.
- 17/ INCLUDES PEARL ESSENCE, IRISH MOSS EXTRACT, ISINGLASS, AND FRESH SHUCKED HARD CLAMS AND BAY SCALLOPS.
- 18/ INCLUDES FRESH-COOKED CRAB MEAT, SMOKED FINNAN HADDIE, AND CANNED CLAM CHOWDER.
- 19/ INCLUDES FRESH FLOUNDER FILLETS; SMOKED BUTTERFISH, CARP, CHUB AND CISCO, EELS, PADDLEFISH OR SPOONBILL CAT, AND SALMON; AND MARINE PEARL-SHELL BUTTONS.
- 20/ INCLUDES A SMALL QUANTITY PRODUCED IN NEW HAMPSHIRE.

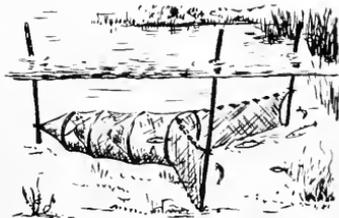

NOTE:--THE TOTAL VALUE OF MANUFACTURED PRODUCTS FOR THE NEW ENGLAND STATES WAS AS FOLLOWS: BY MANUFACTURING ESTABLISHMENTS, \$75,918,575; AND BY FISHERMEN, \$1,356,815. SOME OF THE ABOVE PRODUCTS MAY HAVE BEEN MANUFACTURED FROM PRODUCTS IMPORTED FROM ANOTHER STATE OR A FOREIGN COUNTRY; THEREFORE, THEY CANNOT BE CORRELATED DIRECTLY WITH THE CATCH WITHIN THE STATE.

CONNECTICUT : CATCH BY GEAR, 1946

LANDINGS AT CERTAIN NEW ENGLAND PORTS³

Because of the importance of the ports of Portland, Maine, and Boston, Gloucester, New Bedford, and Cape Cod ports in Massachusetts, as landing points for fishery products, detailed monthly statistics have been collected on these landings and are presented on the following pages. Data on the ports located on Cape Cod were not included in earlier years. The statistics in the following tables include landings by fishing craft of all sizes at the ports named.

It should be noted that these figures represent actual landings which have not been converted to round weight. Therefore the data are not directly comparable to the catch figures shown in the General Review, regional tabulations, and the "Review of Certain Major Fisheries".

During 1946, landings of fishery products at Boston, Gloucester, New Bedford, Cape Cod ports, and Portland by all fishing craft totaled 543,469,053 pounds, valued at \$40,807,424. This represents a decrease of 4 percent in quantity but an increase of 11 percent in value, compared with 1945. For the fourth successive year, landings at Gloucester exceeded those at Boston, although Boston continued to lead in the value of the production. Gloucester and Portland landings showed increases in 1946 over those of 1945, while the landings at the other ports registered moderate declines.

The fishing fleet operating on the fishing banks of the North Atlantic and landing fares at Boston, Gloucester, New Bedford, Cape Cod ports, and Portland during 1946 numbered 1,389 craft of all sizes. Of these, 268 landed in one or more of the Cape Cod ports. There may be some duplication between the craft operating out of Cape Cod ports and those landing at the other ports. The catch listed in the following tables does not represent the entire catch of these vessels, since some of them also landed fares at other New England ports, at New York City, and at more southerly ports in connection with the southern trawl and mackerel fisheries.

Of the total landings, amounting to over 543 million pounds, 23 percent was caught by large otter trawls, 47 percent by medium otter trawls, 19 percent by small otter trawls, 6 percent by purse seines, and the remaining 5 percent by other types of gear. The percentage landed by large otter trawls was smaller than in 1945, due primarily to the tie-up of most of the large otter trawlers in Boston during the first 4-1/2 months of the year. These vessels were kept in port by a dispute over the distribution of the proceeds from the sale of the catch between the vessel owners and the fishermen.

Rosefish (ocean perch) accounted for twenty-nine percent of the total landings; haddock, 23 percent; and cod, 13 percent. The percentage of rosefish (ocean perch) rose markedly, with most of the increase being taken on the distant banks off central and northeastern Nova Scotia. Landings of haddock did not change materially from 1945, while the amount of cod brought in was 44 million pounds less than during the previous year.

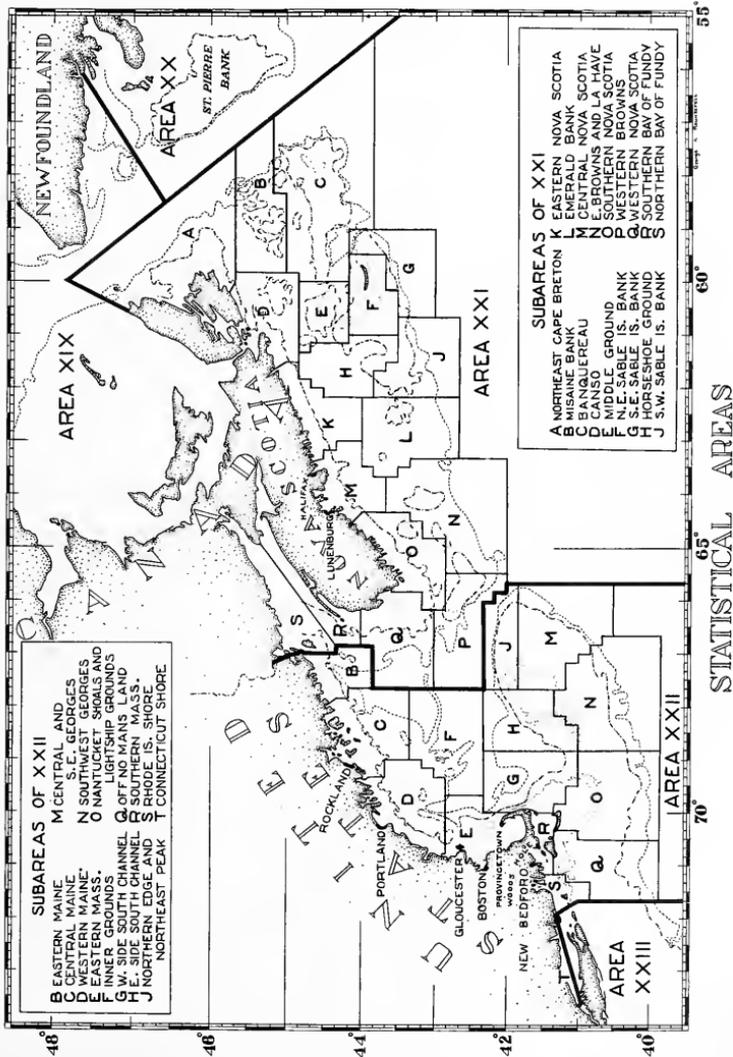

The following tables contain detailed information on the landings of fish and shellfish by fishing craft of all sizes in Boston, Gloucester, New Bedford, Cape Cod ports, and Portland. Preliminary information on the landings by ports has been published in Current Fishery Statistics No. 320, while data on the landings by gear and area can be found in Current Fishery Statistics No. 402.

³ The reader is referred to Section 12 of this document for an account of the years for which surveys of these fisheries have been made.

WHITING

There is shown on the following chart the statistical areas and subareas used in reporting the catch landed at the ports of Boston, Gloucester, and New Bedford, Mass., and Portland, Maine.

1/ REPRESENTS THE CATCH LANDED AT PROVINCE TOWN, WOODS HOLE, CHATHAM, HYANNIS, HARMITCH PORT, AND OTHER CAPE COD PORTS EAST OF BUZZARDS BAY. IT IS NOT POSSIBLE TO ALLOCATE THIS CATCH INTO THE SUBAREAS AS DATA ARE NOT COLLECTED ON THE AREA OF CAPTURE FOR THESE PORTS.

2/ EXCLUSIVE OF DUPLICATION.

3/ INCIDENTAL CATCH.

NOTE: - OTHER TRAWLS ARE CLASSIFIED ACCORDING TO THE SIZE OF THE CRAFT. "SMALL" OTHER TRAWL CRAFT ARE THOSE 50 GROSS TONS CAPACITY OR UNDER; "MEDIUM", 51 GROSS TONS TO 150 GROSS TONS; AND "LARGE", 151 GROSS TONS OR GREATER. A SINGLE TRIP IS SHOWN FOR EACH VOYAGE. WHEN A CRAFT OPERATES IN TWO OR MORE SUBAREAS DURING A VOYAGE, A FRACTIONAL PART (IN TENTHS) OF THE TRIP IS ALLOTTED TO THE SUBAREA ON THE BASIS OF THE CATCH TAKEN IN EACH SUBAREA. "OCCASIONAL" AFTER THE NAME OF SUBAREA INDICATES THAT THE CRAFT CONTRIBUTING TO THE CATCH AS SHOWN FISHED CHIEFLY WITH ANOTHER TYPE OF GEAR.

COMPILED FROM DATA COLLECTED BY THE MASSACHUSETTS DIVISION OF MARINE FISHERIES AND THE FISH AND WILDLIFE SERVICE.

1/ EXCLUSIVE OF DUPLICATION

2/ REPRESENTS THE CATCH LANDED AT PROVIDENTOWN, WOODS HOLE, CHATHAM, HYANNIS, HARMON PORT, AND OTHER CAPE COD PORTS EAST OF BUZZARDS BAY. IT IS NOT POSSIBLE TO ALLOCATE THIS CATCH INTO THE SUBAREAS AS DATA ARE NOT COLLECTED ON THE AREA OF CAPTURE FOR THESE PORTS.

SECTION 3.- MIDDLE ATLANTIC FISHERIES

(Area XXIII)⁴

Due to reduced appropriations, it was necessary to restrict the surveys of the fisheries of the Middle Atlantic States for 1946 to the State of New York. In order to present complete data on this section, summarized data on the fisheries of New Jersey and Delaware for 1945 have been incorporated with the data on New York for 1946 in the Sectional Summaries.

During 1946, the problems facing the fishing industry in the Middle Atlantic States gradually changed from problems of increasing production to meet the war-created demand to those of marketing the catch at a profitable level. The demand remained high on many of the more popular varieties, even in the face of higher prices, but other varieties were faced with reduced demand even with prices below former ceilings. Whiting was especially hard to sell on the regular markets, so large quantities of this species were trucked to the Chesapeake States for canning. The demand for scallops, swordfish, haddock and oysters remained high, although the distribution pattern changed with the removal of price ceilings. While price ceilings were in effect, these products usually went to favored customers or were used to sell other less desirable products. After removal of ceilings, prices advanced and distribution generally was on a price basis.

Available manpower in this region did not increase as much as anticipated due to the failure of some men returning from the armed services to reenter the fishing industry. Many of the younger men decided to further their education with Government aid, while others went into other industries.

Although it was not possible to conduct a general statistical canvass of the fisheries of New Jersey and Delaware for 1946 data, information was obtained on the catch of menhaden in each of the Middle Atlantic States in connection with the byproducts survey of the area. The catch of these fish totaled 479,199,200 pounds, 30 percent larger than the record catch of 1945. Despite the large production of menhaden products, the demand for fish meal and oil remained high throughout the year.

The production of fish and shellfish in the marine and coastal areas of New York during 1946 totaled 141,057,600 pounds, valued at \$14,126,939 to the fishermen. This represents an increase of 20 percent in quantity and 41 percent in value compared with the previous year. While this is less than half the catch recorded for the state in 1880, it is the largest catch in any year for which records are available since 1921. The increase in the volume of the catch was primarily due to larger landings of menhaden, whiting, cod, hard clams, and surf clams. Fifty-three percent of the 1946 New York landings was accounted for by menhaden, but due to its low average price, it represented only 7 percent of the total value. The most valuable items were clams and oysters, each of which represented 27 percent of the total value of the catch.

The production of canned fish and fishery byproducts in New York, New Jersey, Pennsylvania and Delaware in 1946 was valued at \$20,791,860 to the processor, compared with \$12,228,557 in 1945. The most valuable items were menhaden oil, menhaden meal, and canned clam products. A total of 11 plants were engaged in producing canned fishery products and 41 plants in producing byproducts.

The quantity of packaged fish processed in the Middle Atlantic States decreased from 16,450,997 pounds in 1945 to 14,525,774 pounds in 1946. Haddock and flounders were the most important varieties packaged, in both quantity and value.

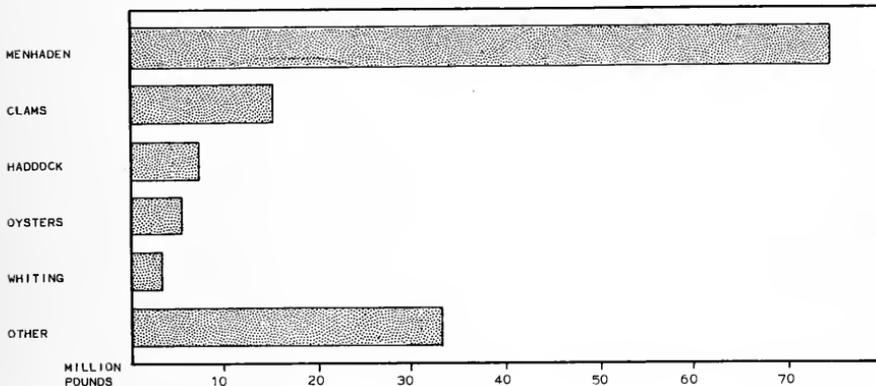

The last complete survey of the fishery transporting, wholesaling, and manufacturing industries in the Middle Atlantic States was made for 1940. In that year, 215 men were employed in the operation of 72 vessels and boats engaged in the transporting trade and

⁴ This number was assigned to this area by the North American Council on Fishery Investigations. It should be explained that there are included in this area craft whose principal fishing ports are in the area but at times fish elsewhere. A notable example is the southern trawl fishery which extends into Area XXIV.

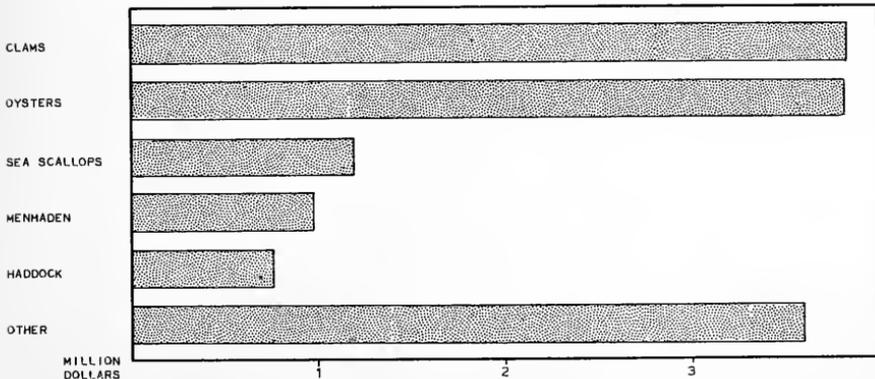

5,880 persons were employed in wholesale and manufacturing establishments. The latter employees received \$6,736,554. in salaries and wages during 1940. Detailed statistics on these branches of the industry for that year can be found in Fishery Statistics of the United States, 1944, (Statistical Digest No. 16).

The following tables contain a composite summary of catch and operating units for New York for 1946, and New Jersey and Delaware for 1945, as well as detailed data on the 1946 catch and operating units in New York. Condensed summary data on the operating units and catch of the New York fisheries in 1946, appearing in the following pages, have been previously published in Current Fishery Statistics No. 469. Detailed data on the 1945 catch and operating units of the Middle Atlantic fisheries can be found in Fishery Statistics of the United States, 1945 (Statistical Digest No. 18).

MIDDLE ATLANTIC FISHERIES

HUDSON RIVER SHAD FISHERY⁵

The shad fishery of the Hudson River in 1946 gave employment to 936 fishermen, who took 2,972,143 pounds of shad valued at \$459,184 to the fishermen. This represented a decrease of 14 percent in weight and 9 percent in value, compared with 1945. The average price per pound received by fishermen in 1946 was 15.4 cents compared with 14.5 cents the previous year.

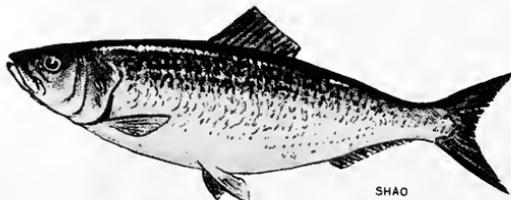

Stake gill nets accounted for 71 percent of the production by weight; drift gill nets, 28 percent; and haul seines, the remaining 1 percent.

Statistics of the operating units and catch of shad in the Hudson River by New York fisherman are also included in the operating unit and catch data for the State of New York.

⁵ The reader is referred to Section 12 of this document for an account of the years for which surveys of this fishery have been made.

LANDINGS AT NEW YORK CITY

Landings of fishery products at New York City during 1946 by fishing craft of all sizes amounted to 18,064,841 pounds. This was 9 percent above the 1945 landings, reversing a downward trend that began in 1940 when the landings dropped to 31.3 million pounds from 40.9 million pounds in 1939.

Ninety-one percent of the New York City landings consisted of fish, and nine percent of shellfish. In the previous year, shellfish accounted for only five percent of the receipts. The increase in the importance of shellfish was primarily due to the doubling of the sea scallop landings. The more important species landed at New York City were haddock, 7,529,995 pounds; fluke, 2,031,845 pounds; scup, 1,881,464 pounds; cod, 1,485,764 pounds; and scallops, 1,407,924 pounds.

Information on the 1946 landings at New York City is also available in "Current Fishery Statistics No. 367".

LANDINGS AT NEW YORK CITY, 1938 - 1946

SECTION 4.- CHESAPEAKE FISHERIES

(Area XXIII)⁶

During 1946, the production of fish and shellfish in the Chesapeake States increased for the fourth successive year, but post-war marketing problems arose and became acute during the latter part of the year. Rising production costs, stemming from more competition for raw products, increased wages, and higher prices for supplies, ran head on into consumer resistance to high prices with disastrous results during October and November. Crab meat and oyster sales were hit hardest during the 45 days following the decontrol of meat. More or less normal marketing of these products was resumed during the final month of the year, although the prices failed to return to those prevailing previous to that time. With the return of a buyer's market, increasing interest was evident in quality control, packages with eye-appeal, sales promotion, and new products. A number of firms began shipping seafoods, particularly oysters, by air to the midwestern markets. A number of new firms entered the industry, and many of the older firms expanded their plants during the year. This expansion was particularly noticeable in the case of firms building their own cold-storage warehouses in conjunction with their regular packing plants. There was increased emphasis on the production of canned fish during 1946. Packs of all species increased over the previous year, and two new species, sea trout and little tuna, were processed. A high mortality rate for oysters on certain bars in upper Chesapeake Bay was reported and caused alarm, but apparently it did not materially decrease the catch during that year. Effects of this may, however, show up in later years.

The 1946 catch of fish and shellfish in the Chesapeake States (Maryland and Virginia) totaled 359,946,000 pounds, valued at \$27,198,823 to the fishermen. This represents a rise of 18 percent in quantity, but a decrease of 10 percent in value, compared with 1945. The total production during this year was the largest recorded for any year for which statistics are available since 1920. The total value was the second highest on record.

The yield of fish and shellfish in Maryland during 1946 increased 16 percent in quantity but decreased 2 percent in value compared with 1945. In Virginia, the yield increased 19 percent in quantity while decreasing 14 percent in value.

Landings of menhaden, which were 67 percent larger than in 1945, were the largest since 1941. Menhaden was by far the most important species from the standpoint of quantity, accounting for 41 percent of the total catch but due to its low price, the fish accounted for only 5 percent of the total value. The catch of hard crabs rose 40 percent from the previous year, and was the largest since 1939. The quantity of oysters caught increased 2 percent, while the value decreased 12 percent, compared with 1945. Oysters and crabs were not under price control, but their price was directly affected by price and ration controls on meat, other fishery products, and poultry.

The quantity of packaged fish processed increased from 760,700 pounds in 1945 to 1,315,114 pounds in 1946. Increases occurred in most of the varieties packaged. The most important items were pan-dressed and fillets of sea trout and pan-dressed croakers.

The production of canned fish and fishery byproducts in Maryland and Virginia during 1946 was valued at \$8,539,649 to the packer. This represents an increase of 150 percent compared with 1945. The most valuable individual item was canned whiting, although the combined value of menhaden meal and oil was much greater. A total of 20 plants were engaged in canning fishery products in 1946 and a similar number of plants were used for processing fishery byproducts.

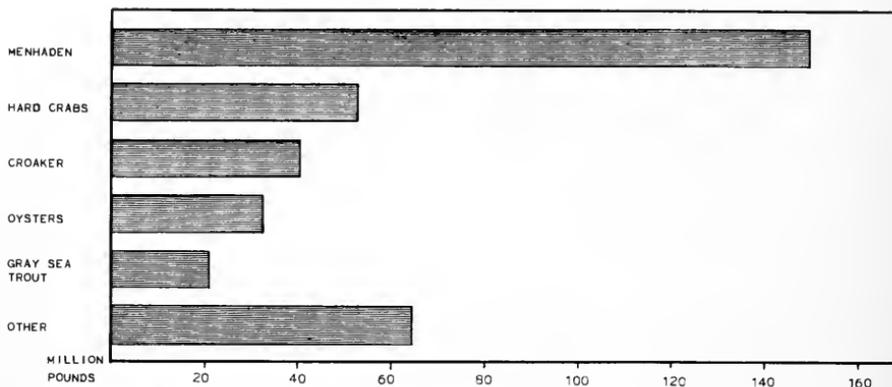

⁶ This number has been assigned to this area by the North American Council of Fishery Investigations. It should be explained that there may be included under this area, craft whose principal fishing ports are in this area but at times fish elsewhere. Data on the operating units and catch of the fisheries of Maryland have been taken largely from statistics collected by the Maryland Department of Tidewater Fisheries. A portion of the data on the fisheries of Virginia have likewise been obtained from the Virginia Commission of Fisheries. Supplementary surveys, compilations, and analyses, have been made by agents of this Service in order that the figures may be presented in a manner comparable with those of other sections.

CHESAPEAKE FISHERIES

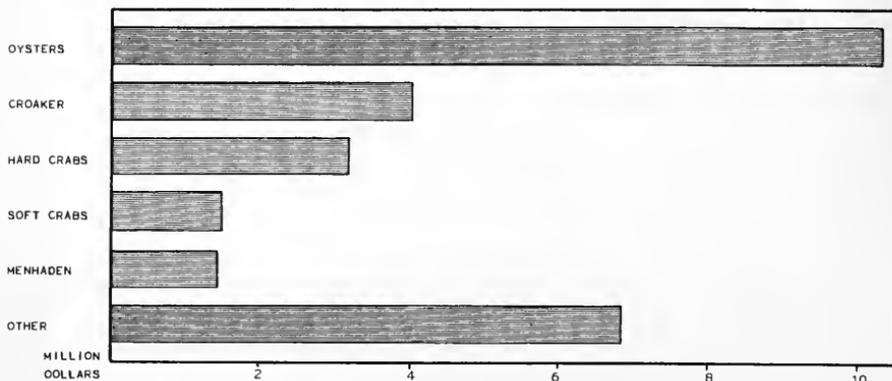

The last complete survey of the fishery transporting, wholesaling, and manufacturing industries was for 1940. In that year, 1,023 men were employed in the operation of 544 vessels engaged in the transporting trade and 12,331 persons were employed in wholesale and manufacturing establishments. The latter employees received \$3,552,827 in salaries and wages during 1940. Detailed statistics on these branches of the industry for 1940 can be found in "Fishery Statistics of the United States, 1944" (Statistical Digest No. 16).

The following tables contain summarized and detailed information on the 1946 catch and operating units of Maryland and Virginia. Condensed summary data of the operating units and catch by states of the Chesapeake Fisheries, appearing in the following pages, have been previously published in Current Fishery Statistics No. 468.

1/ DATA ON THE PRODUCTION OF CANNED FISH, BYPRODUCTS, AND PACKAGED FISH ARE FOR 1946, WHILE THOSE ON THE PRODUCTION OF CURED FISH, PACKAGED SHELLFISH AND FISHERMEN'S PREPARED PRODUCTS ARE FOR 1940.

2/ INCLUDED WITH "UNCLASSIFIED PRODUCTS".

3/ THIS ITEM IS USUALLY AN INTERMEDIATE PRODUCT AND ALTHOUGH INCLUDED IN THE TOTAL MAY BE SHOWN IN ITS FINAL STAGE OF PROCESSING IN THIS OR ANOTHER STATE.

4/ INCLUDED WITH "MISCELLANEOUS PRODUCTS".

5/ INCLUDES FRESH FILLETS OF CROAKER, SCUP, AND SEA BASS; FROZEN CROAKER FILLETS; FRESH AND FROZEN PAN-DRESSED CROAKER, GRAY SEA TROUT, AND WHITING; AND FRESH PAN-DRESSED SEA BASS.

6/ INCLUDES CANNED SHAD ROE, EASTERN TUNA, AND CLAM CHOWDER.

7/ INCLUDES CORNED AND SMOKED ALEWIVES; AND SMOKED CARP, LAKE TROUT, SABLEFISH, SALMON, AND STURGEON.

8/ INCLUDES BLUE CRAB AND UNCLASSIFIED MEAL, AND MARINE PEARL SHELL BUTTONS.

9/ INCLUDES ALEWIFE MEAL AND OIL, UNCLASSIFIED MEAL, BURNED AND UNBURNED LIME FROM OYSTER SHELLS, AND PEARL ESSENCE.

10/ INCLUDES FRESH-SHUCKED HARD CLAMS AND CANNED MACKEREL AND EASTERN TUNA.

NOTE:--THE TOTAL VALUE OF MANUFACTURED PRODUCTS IN THE CHESAPEAKE STATES WAS AS FOLLOWS: BY MANUFACTURING ESTABLISHMENTS, \$16,235,276; AND BY FISHERMEN \$13,306. SOME OF THE ABOVE PRODUCTS MAY HAVE BEEN IMPORTED FROM ANOTHER STATE OR A FOREIGN COUNTRY; THEREFORE, THEY CANNOT BE CORRELATED DIRECTLY WITH THE CATCH WITHIN THE STATE.

VIRGINIA : CATCH BY GEAR, 1946

MARYLAND : CATCH BY GEAR, 1946

POTOMAC RIVER SHAD AND ALEWIFE FISHERY

The catch of shad in the Potomac River in 1946 amounted to 1,124,3 fish, weighing 536,100 pounds, and valued at \$118,113 to the fishermen. The catch of alewives in the Potomac for the same year was 7,648,000 fish, weighing 3,512,500 pounds, valued at \$105,195. Compared with 1945, the catch of shad showed a nominal decrease in weight, but an increase of 26 percent in value, while alewives registered a decrease of 19 percent in weight and 5 percent in value.

A total of 771 fishermen were employed in this fishery during 1946, 122 more than during the previous year.

Statistics on the yield and operating units of shad and alewives in the Potomac River are also included in the catch and operating unit data for Maryland and Virginia.

ALEWIFE

SECTION 5.- SOUTH ATLANTIC AND GULF FISHERIES

(South Atlantic, Area XXIV; Gulf, Area XXV)⁷

Due to budgetary limitations, no general canvass was conducted on the fisheries of the South Atlantic and Gulf States (North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana, and Texas) for the year 1946. During 1945, the last year for which a survey was made, the total catch in these states amounted to 746,026,900 pounds, valued at \$54,330,033 to the fishermen. Of this catch menhaden accounted for 320,784,600 pounds, valued at \$2,170,648.

In conducting the nation-wide canned fish and byproducts survey for 1946, information was obtained on the total quantity of menhaden used for reduction purposes in the South Atlantic and Gulf States. Since nearly the entire catch of these fish is used in the manufacture of oil and meal the poundage used for reduction may be considered the total landings of these fish. The quantity of menhaden taken during 1946 in the South Atlantic States totaled 291,654,350 pounds, valued at \$2,709,175. Compared with the previous year this represents a decrease of 9 percent in poundage, but an increase of 25 percent in value.

The demand for fish meal and oil remained high throughout the year, the prices rose rapidly after ceilings were removed. The removal of price ceilings on shrimp in May resulted in prices advancing to record highs. The canning of shrimp was conducted on a much larger scale than for several years, and competition for fresh and frozen shrimp increased. The pattern of distribution of shrimp changed with the removal of price ceilings. Prior to that time, distribution was frequently limited to favored customers. However, with the increase in competition for the product, and the removal of price restrictions, sales were usually made to the buyer offering the highest price.

Another result of the removal of price ceilings was the increased interest in the canning of oysters and crab meat. Price controls on these two items were removed late in 1945. The 1946 pack of canned crab meat was the largest in history, while that of canned oysters was the largest since 1942.

The production of canned fish and fishery byproducts in the South Atlantic and Gulf States during 1946 was valued at \$22,475,274. This represents an increase of 114 percent compared with 1945. The most valuable individual items were canned shrimp, canned oysters, menhaden meal, canned crab meat, and menhaden oil in that order. A total of 60 plants were engaged in canning fishery products during 1946, and 62 plants were used for processing fishery byproducts.

The last complete survey of the fishery transporting, wholesaling, and manufacturing industries was made in 1940. In that year, 677 men were employed in the operation of 333 vessels and boats engaged in the transporting trade and 18,926 persons were employed in wholesale and manufacturing establishments. The latter employees received a total of \$3,814,342 in salaries and wages in 1940. Detailed statistics on these branches of the industry for 1940 can be found in "Fishery Statistics of the United States, 1944" (Statistical Digest No. 161).

Detailed statistics covering the fisheries of the South Atlantic and Gulf States during 1945 can be found in "Fishery Statistics of the United States" (Statistical Digest No. 181). Condensed summary data of these fisheries appear in the following tables

⁷ These numbers were assigned to these areas by the North Atlantic Council on Fishery Investigations. While the catch of fishery products in Lake Okeechobee is included in the Florida catch tables, the catch of the Mississippi River and tributaries does not appear in this section.

1/ DATA ON THE PRODUCTION OF CANNEO FISH, BYPRODUCTS, AND PACKAGED FISH ARE FOR 1946, WHILE THOSE ON THE PRODUCTION OF CURED FISH, PACKAGED FISH, AND FISHERMEN'S PREPARED PRODUCTS ARE FOR 1940.

2/ THIS ITEM HAS BEEN INCLUDED WITH "MISCELLANEOUS PRODUCTS".

3/ THIS ITEM HAS BEEN INCLUDED WITH "UNCLASSIFIED CANNED PRODUCTS".

4/ INCLUDES CANNED MENHADEN, MENHADEN ROE, CRAB MEAT, DEVILED CRAB, AND OYSTERS.

5/ INCLUDES CANNED ALEWIFE, ALEWIFE ROE, SHAD, SHAD ROE, HARD CLAM PRODUCTS, AND TURTLE MEAT.

6/ INCLUDES CANNED SHRIMP SPECIALTIES AND PATE; SMOKED OYSTERS; OYSTER SOUP, BROTH, AND JUICE; AND TURTLE SOUP.

7/ INCLUDES ALEWIFE, BLUE CRAB, AND UNCLASSIFIED SCRAP AND MEAL; MENHADEN ACID SCRAP; AND BURNED AND UNBURNED LIME FROM OYSTER SHELLS.

8/ INCLUDES FRESH PAN-DRESSED CATFISH, CROAKER, SEA TROUT, AND SPANISH MACKEREL; FRESH FILLETS OF CROAKER, RED DRUM, FLOUNDER'S, SEA BASS, SEA TROUT, SPANISH MACKEREL, AND STRIPED BASS; AND FRESH STEAKS OF SEA BASS AND STRIPED BASS.

9/ INCLUDES MENHADEN OIL, MEAL, DRY SCRAP, AND ACID SCRAP; CANNED CRAB MEAT AND DEVILED CRAB; AND FRESH-SHUCKED HARD CLAMS.

10/ INCLUDES CANNED CRAB MEAT, SHRIMP, AND OYSTERS.

11/ INCLUDES SHARK MEAL AND LIVER OIL, POULTRY FEED AND UNBURNED LIME FROM OYSTER AND COQUINA SHELLS; FRESH-COOKED SPINY LOBSTER MEAT, FRESH-SHUCKED HARD CLAMS, SALTED BLUE RUNNER, AND SMOKED KING MACKEREL.

12/ INCLUDES CANNED MULLET, CRAB MEAT, SHRIMP, SHRIMP SPECIALTIES, DEVILED SHRIMP, OYSTERS, OYSTER SOUP, BROTH, AND JUICE, AND TURTLE SOUP; BLUE CRAB AND SHRIMP SCRAP OR MEAL; FRESH GROUPEL FILLETS AND STEAKS, AND RED SNAPPER FILLETS AND STEAKS; COOKED PEELED SHRIMP; AND FROZEN PACKAGED SHRIMP.

13/ INCLUDES MENHADEN OIL, SCRAP AND MEAL; SHRIMP BRAN OR MEAL, AND CANNED CRAB MEAT.

14/ INCLUDES MENHADEN OIL, MEAL, AND SCRAP; BLUE CRAB MEAL AND SCRAP; AND POULTRY FEED, BURNED AND UNBURNED LIME FROM OYSTER SHELLS.

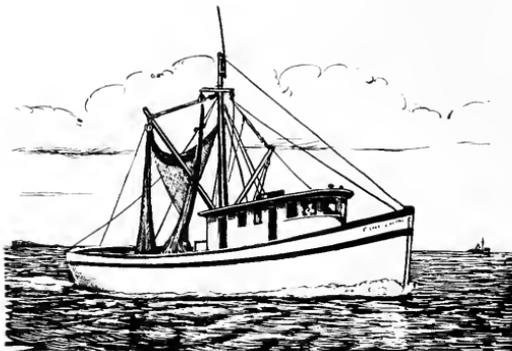

15/ INCLUDES CANNED CRAB MEAT AND SHRIMP, AND POULTRY FEED AND UNBURNED LIME FROM OYSTER SHELLS.

NOTE:--THE TOTAL VALUE OF MANUFACTURED PRODUCTS IN THE SOUTH ATLANTIC AND GULF STATES WAS AS FOLLOWS: BY MANUFACTURING ESTABLISHMENTS, \$27,214,975; AND BY FISHERMEN, \$109,845. SOME OF THE ABOVE PRODUCTS MAY HAVE BEEN MANUFACTURED FROM PRODUCTS IMPORTED FROM ANOTHER STATE OR A FOREIGN COUNTRY; THEREFORE, THEY CANNOT BE CORRELATED DIRECTLY WITH THE CATCH WITHIN THE STATE.

TARPON SPRINGS SPONGE FISHERY

During 1946, a total of 156,916 pounds of sponges, valued at \$2,945,831, were sold on the Exchange at Tarpon Springs, Florida. This was a decrease of 23 percent in poundage, but an increase of 8 percent in value compared with the transactions on the Exchange in 1945.

Sales of sponges on the Exchange during 1946 were as follows: large wool, 16,588 pounds, valued at \$616,590; small wool, 19,038 pounds, valued at \$505,402; wool rags, 63,273 pounds, valued at \$1,468,698; yellow, 11,925 pounds, valued at \$112,863; and grass, 46,092 pounds, valued at \$242,278.

SECTION 6.- PACIFIC COAST FISHERIES⁸

The year 1946 was a period showing wide fluctuations in the fishing industry of the Pacific Coast. In northern California (Monterey and San Francisco Districts), the run of pilchard or sardines was the poorest in history so most of the fleet went south to San Pedro during the latter part of the season. Landings in the San Pedro district rose to unprecedented heights, and fishing vessels were placed on limit during most of the season as processing facilities in the area were inadequate. There were several strikes during the year in the pilchard fishery, but these were usually of short duration. The price in the San Pedro area rose from \$20 per ton to \$40 during the year. The plant operators in the San Francisco area chartered a plane to scout for sardines, and the Navy allowed fishery observers to make several trips on training flights of lighter-than-air-craft. However, even these measures failed to locate fish in quantity, and the production of this species for the state as a whole was smaller than in any year after 1933.

During the same period, tuna landings reached an all-time high. With the increased demand for canned tuna and the removal of ceiling prices, more and larger tuna clippers and purse seiners entered the fishery and fished over a larger territory than ever before. Albacore did not appear in the Pacific Northwest in as large quantities as in the previous two years. The limited supply of cans provided a constant source of worry to plant operators, but at no time did it reach a point where production had to be stopped for lack of cans.

In Puget Sound, salmon fishermen were on strike for a week during June and cannery shoreworkers were on strike for a short time during July, but this had little effect on the total production as the supply of fish remained at a low level until late July. Fresh and frozen fall chums were canned in greater quantities than for a number of years, due to the excellent demand for canned fish and the lessening of demand for fresh and frozen fish that accompanied the removal of price controls. The halibut season was the shortest on record, with the largest production since 1915. However, a large part of the increase was taken by Canadian craft. The catch landed in the Pacific Coast States was 11 percent above 1945. With the exception of a short period during July, price ceilings were kept on halibut until August 16, just 3 days before the close of the season. Halibut landings were allocated during the first part of the season by the Fish and Wildlife Service in a similar manner to the preceding year.

During 1946, the production of fish and shellfish in the Pacific Coast States (Washington, Oregon, and California) totaled 1,161,881,800 pounds, valued at \$76,020,862 to the fishermen. This represents a decrease of 19 percent in volume, but an increase of 21 percent in value, compared with 1945. The decline in the catch was primarily due to the decreased landings of pilchard. Although the total catch was the smallest since 1934, it was the most valuable in the history of the fishery. No survey was made of the operating units of these states for 1946. Summary data of the 1945 operating units are included for comparative purposes.*

The quantity of packaged fish produced during 1946 in Washington and Oregon totaled 15,462,899 pounds, nearly 6 million pounds less than in 1945. Data is not available on the quantity processed in California, but it is estimated that the production amounted to 7.5 million pounds. The decrease was primarily due to the decline in the demand for rockfish fillets, caused by smaller Army purchases and greater availability of other food items for civilians.

⁸ *Data on the operating units and catch of the fisheries of the Pacific Coast States have been taken largely from statistics collected by the various State agencies. Supplementary surveys, compilations, and analyses, have been made by agents of this Service in order that the figures may be presented in a manner comparable with those of other sections. While statistics on the fisheries of California are for the calendar year, those for Oregon and Washington are for the fiscal year ending March 31, 1947, except that statistics of the halibut fishery for Washington are for the calendar year.*

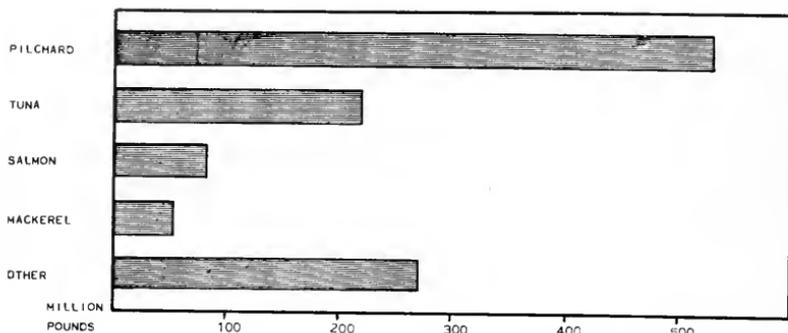

PACIFIC COAST FISHERIES

The production of canned fish and fishery byproducts in the Pacific Coast States in 1946 was valued at \$147,817,953, 37 percent more than in 1945. The three most valuable items canned were tuna, salmon, and sardines. The production of canned crab meat increased spectacularly with the beginning of the first post-war season without price controls. Substantial quantities of a new item, canned rockfish, were packed. Canning of this product was begun in an effort to utilize the catch of rockfishes when the demand for frozen fillets declined. A total of 151 plants in the three Pacific Coast States engaged in canning fishery products, and 110 plants produced fishery byproducts.

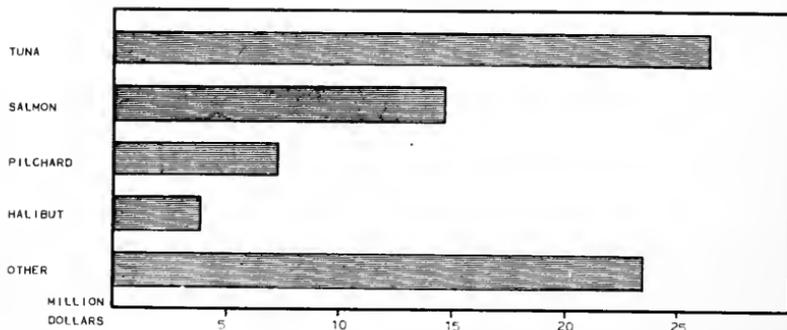

The last complete survey of the fishery transporting, wholesaling, and manufacturing industries was made for 1940. In that year, 141 men were employed on 58 vessels operating in the transporting trade and 19,109 persons were employed in wholesale and manufacturing establishments. The latter employees received \$11,440,359 in salaries and wages during 1940. Detailed statistics on these branches of the industry for 1940 can be found in "Fishery Statistics of the United States, 1944" (Statistical Digest No. 16).

The following tables contain a summary of 1946 catch and 1945 operating units and detailed information on the 1946 catch in the Pacific Coast States. Condensed summary data of the catch by states of the Pacific Coast fisheries, appearing in the following pages, have been previously published in Current Fishery Statistics No. 481. Detailed data of the 1945 operating units can be found in Fishery Statistics of the United States, 1945 (Statistical Digest No. 18).

1/ USED CHIEFLY IN THE SARDINE FISHERY OF CALIFORNIA; ONLY 10 VESSELS ENGAGED IN THE WASHINGTON PILCHARD FISHERY AND 1 IN THE OREGON FISHERY.

2/ FISHED ONLY ON INDIAN RESERVATIONS.

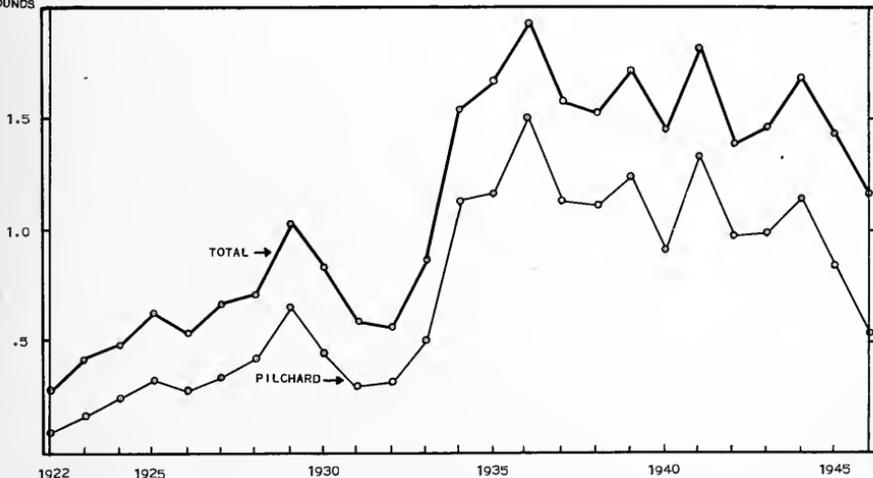

3/ TRAWL, SET, AND HAND LINES IN CALIFORNIA ARE INCLUDED WITH TROLL LINES.

4/ INCLUDES ONLY VESSELS THAT TROLLED OR FISHED EXCLUSIVELY FOR TUNA AND DID NOT TROLL FOR SALMON. MANY OF THE SALMON TROLLERS ALSO TROLLED FOR TUNA.

NOTE:--STATISTICS ON THE OPERATION OF VESSELS ARE FOR CRAFT MAKING THEIR HOME PORT IN ONE OF THE DISTRICTS OF WASHINGTON, OREGON, OR CALIFORNIA. VESSELS, AS WELL AS ALL TYPES OF GEAR OPERATED, HAVE BEEN INCLUDED ONLY IN THE DISTRICT IN WHICH EACH VESSEL MADE ITS HOME PORT, ALTHOUGH IN SOME INSTANCES THEY WERE OPERATED IN OTHER DISTRICTS.

1/ MAY INCLUDE SOME SILVER SALMON.
 2/ INCLUDES GRAYFISH.

NOTE:--THE LANDED WEIGHT OF LINGCOD, SABLEFISH, AND ROCKFISHES (EXCEPT IN THE OTTER TRAWL FISHERIES IN WHICH THE FISH ARE LANDED ROUND) WAS CONVERTED TO ROUND WEIGHT BY MULTIPLYING THE DRESSED WEIGHT BY THE FACTOR 1.43. THE FACTOR USED TO CONVERT HALIBUT FROM MARKETED WEIGHT TO ROUND WEIGHT WAS 1.33. THE POUNDAGE AND VALUE OF THE CATCH SHOWN FOR WASHINGTON AND OREGON INCLUDE 5,092,254 POUNDS OF FISH LIVERS AND VISCERA, VALUED AT \$4,771,864 TO THE FISHERMEN. COMPRISING THIS TOTAL WERE: COD LIVERS, 118,282 POUNDS, VALUED AT \$10,884; GRAYFISH LIVERS 3,028,830 POUNDS, VALUED AT \$1,680,258; HAKE LIVERS, 16,894 POUNDS, VALUED AT \$2,757; HALIBUT LIVERS, 275,848 POUNDS, VALUED AT \$545,269; LINGCOD LIVERS, 261,556 POUNDS, VALUED AT \$579,249; RATFISH LIVERS, 267,014 POUNDS, VALUED AT \$26,701; ROCKFISH LIVERS, 3,300 POUNDS, VALUED AT \$2,166; SABLEFISH LIVERS, 124,063 POUNDS, VALUED AT \$223,370; SKATE LIVERS, 1,905 POUNDS, VALUED AT \$190; BLUEFIN SHARK LIVERS, 39,379 POUNDS, VALUED AT \$10,673; SOUPFIN SHARK LIVERS, 196,216 POUNDS, VALUED AT \$1,436,582; AND HALIBUT, LINGCOD, AND SABLEFISH VISCERA, 758,967 POUNDS, VALUED AT \$253,765. MOST OF THE CARCASSES OF DOGFISH AND SOUPFIN SHARK WERE NOT LANDED, BUT WERE DISCARDED AT SEA AFTER REMOVAL OF THE LIVERS. SIMILAR DATA FOR CALIFORNIA ARE NOT AVAILABLE.

- 1/ DATA ON THE PRODUCTION OF CANNED PRODUCTS AND BYPRODUCTS IN THE THREE STATES AND ON PACKAGED FISH IN WASHINGTON AND OREGON ARE FOR 1946. THOSE ON THE PRODUCTION OF PACKAGED SHELLFISH, SALTED AND SMOKED FISH AND FISHERMEN'S PREPARED PRODUCTS ARE FOR 1940. DATA ARE NOT AVAILABLE ON THE PRODUCTION OF PACKAGED FISH IN CALIFORNIA.
- 2/ DATA ON THE PRODUCTION OF PACKAGED FISH IN CALIFORNIA ARE NOT AVAILABLE.
- 3/ THIS ITEM HAS BEEN INCLUDED UNDER "UNCLASSIFIED CURED PRODUCTS".
- 4/ THIS ITEM HAS BEEN INCLUDED UNDER "UNCLASSIFIED PACKAGED FISH".
- 5/ THIS ITEM HAS BEEN INCLUDED UNDER "UNCLASSIFIED CANNED PRODUCTS".
- 6/ THIS ITEM HAS BEEN INCLUDED UNDER "MISCELLANEOUS PRODUCTS".
- 7/ INCLUDES FRESH PERCH FILLETS; FROZEN SALMON FILLETS; AND FROZEN STEAKS OF LINGCOD, ROCKFISH, AND SABLEFISH.
- 8/ INCLUDES FRESH STEAKS OF LINGCOD, SABLEFISH, AND SALMON; FRESH SABLEFISH FILLETS; FROZEN FILLETS OF HALIBUT AND SABLEFISH; AND FROZEN STEAKS OF SABLEFISH AND SALMON.
- 9/ INCLUDES CANNED COD FLAKES; SMOKED SABLEFISH; SHAD ROE; SHRIMP; HARD CLAM PRODUCTS; MINCED RAZOR CLAMS; PICKLED OYSTERS; AND CRAB, SHRIMP, AND OYSTER COCKTAILS.
- 10/ INCLUDES CANNED PILCHARD; SMOKED PILCHARD; SMOKED SABLEFISH; SHAD; SMOKED OR KIPPERED STURGEON; MINCED RAZOR CLAMS; PACIFIC OYSTERS, SMOKED OYSTERS; ANCHOVY, FISH LIVER, AND SALMON PASTE; AND SALMON EGGS FOR BAIT.
- 11/ INCLUDES CANNED SMOKED PILCHARD, CHINOOK AND SILVER SALMON, SHAD ROE, CRAB MEAT, AND TUNA HORS D'OEUVRES.
- 12/ INCLUDES SALTED SALMON BELLIES AND STURGEON ROE, AND SMOKED BLOATERS.
- 13/ INCLUDES MILD-CURED SALMON AND KIPPERED SALMON, STURGEON, AND ALBACORE.
- 14/ INCLUDES DRY SALTED BARRACUDA, COD, JEWFISH FILLETS, MACKEREL, PILCHARD, SEA BASS, TUNA FILLETS, BONITO, AND YELLOWTAIL; HARD SALTED SALMON; KIPPERED SALMON; AND SMOKED BARRACUDA FILLETS, CHUB, WHITEFISH, AND BLOATERS.
- 15/ INCLUDES FRESH SHUCKED BAY SCALLOPS; HALIBUT, LINGCOD, SABLEFISH, TUNA, AND UNCLASSIFIED LIVER OILS; PILCHARD, SALMON, AND UNCLASSIFIED OILS; UNCLASSIFIED VISCERA OIL; PILCHARD, DUNGENESS CRAB, AND UNCLASSIFIED MEAL AND SCRAP; AND POULTRY FEED AND UNBURNED LIME FROM CLAM AND OYSTER SHELL.
- 16/ INCLUDES FRESH SHUCKED EASTERN OYSTERS; LINGCOD, ROCKFISH, SHARK, TUNA, AND UNCLASSIFIED LIVER OILS; PILCHARD, SALMON, AND UNCLASSIFIED OILS; UNCLASSIFIED VISCERA OIL; PILCHARD AND UNCLASSIFIED MEAL AND SCRAP; AND POULTRY FEED AND UNBURNED LIME FROM OYSTER SHELL.
- 17/ INCLUDES HALIBUT, LINGCOD, TUNA, AND UNCLASSIFIED LIVER OILS; TUNA AND MACKEREL AND UNCLASSIFIED OIL; CARP, SHARK, TUNA VISCERA, TUNA AND MACKEREL, CRAB, AND UNCLASSIFIED MEAL AND SCRAP; POULTRY FEED AND UNBURNED LIME FROM OYSTER SHELL; AGAR AGAR; GLUE; KELP MEAL; FISH SUBLUBLES; AND AMINO ACIDS.
- 18/ THIS ITEM IS USUALLY AN INTERMEDIATE PRODUCT AND ALTHOUGH INCLUDED IN THE TOTAL, MAY BE SHOWN IN ITS FINAL STAGE OF PROCESSING IN THIS OR ANOTHER STATE.

^{1/} CAUGHT ALMOST ENTIRELY FOR THE UTILIZATION OF THE LIVERS IN THE EXTRACTION OF VITAMIN OILS. MOST OF THE CARCASSES WERE DISCARDED.

^{2/} THE SALMON CAUGHT BY HAUL SEINES WERE TAKEN ONLY BY INDIANS ON RESERVATIONS.

^{3/} FISHED ONLY ON INDIAN RESERVATIONS.

^{4/} THE WEIGHT OF CRABS SHOWN IS BASED ON AN AVERAGE OF 22 POUNDS PER DOZEN.

^{5/} THE STATISTICS ON HARD CLAMS ARE BASED ON YIELDS OF 25 PERCENT OF EDIBLE MEAT.

^{6/} THE STATISTICS ON OYSTERS ARE BASED ON 18 PERCENT EDIBLE MEATS FOR NATIVE OYSTERS AND 10 PERCENT FOR PACIFIC OYSTERS.

^{7/} THE WEIGHT OF BAY SCALLOPS ARE BASED ON 8.5 POUNDS PER GALLON WHEN SHUCKED.

NOTE:--THE POUNDAGE AND VALUE OF THE CATCH SHOWN ABOVE INCLUDES THE FOLLOWING ITEMS OF LIVERS AND VISCERA: COD LIVERS, 107,919 POUNDS, VALUE \$10,027; GRAYFISH LIVERS, 2,519,023 POUNDS, VALUE \$1,360,272; HAKE LIVERS, 11,938 POUNDS, VALUE \$1,194; HALIBUT LIVERS, 266,684 POUNDS, VALUE \$533,368; LINGCOD LIVERS, 191,926 POUNDS, VALUE \$412,427; RATFISH LIVERS, 267,014 POUNDS, VALUE \$26,701; ROCKFISH LIVERS, 2,000 POUNDS, VALUE \$1,500; SABLEFISH LIVERS, 92,944 POUNDS, VALUE \$176,594; SKATE LIVERS, 1,905 POUNDS, VALUE \$190; SCUPPIN SHARK LIVERS, 71,258 POUNDS, VALUE \$534,286; AND HALIBUT, LINGCOD AND SABLEFISH VISCERA, 683,366 POUNDS, VALUE \$240,351.

1/ OF THE ABOVE SPECIES THE FOLLOWING ARE TAKEN OFF THE OREGON AND WASHINGTON COASTS BUT LANDED IN THE COLUMBIA RIVER DISTRICT: TRUE COD, SOLE, GRAYFISH, HAKE, HALIBUT, PILCHARD, ROCKFISHES, SABLEFISH, SHARK, SKATE, TUNA, CRABS, AND SOME OF THE STURGEON. MOST OF THE FLOUNDERS, LINGCOD, AND TROLL CAUGHT SALMON ARE ALSO TAKEN IN COASTAL WATERS.

2/ CAUGHT ALMOST ENTIRELY FOR THE UTILIZATION OF THE LIVERS IN THE EXTRACTION OF VITAMIN OILS. MOST OF THE CARCASSES WERE DISCARDED.

3/ THE WEIGHT OF CRABS SHOWN IS BASED ON AN AVERAGE OF 24 POUNDS PER DOZEN.

NOTE:--THE POUNDAGE AND VALUE OF THE CATCH SHOWN ABOVE INCLUDES THE FOLLOWING ITEMS OF LIVERS AND VISCERA: COD LIVERS, 5,238 POUNDS, VALUE \$413; GRAYFISH LIVERS, 290,355 POUNDS, VALUE \$191,478; HAKE LIVERS, 3,813 POUNDS, VALUE \$1,449; HALIBUT LIVERS, 5,659 POUNDS, VALUE \$7,130; LINGCOD LIVERS, 29,543 POUNDS, VALUE \$73,858; ROCKFISH LIVERS, 300 POUNDS, VALUE \$66; SABLEFISH LIVERS, 17,875 POUNDS, VALUE \$26,812; BLUEFIN SHARK LIVERS, 37,421 POUNDS, VALUE \$10,478; SOUFFIN SHARK LIVERS, 92,387 POUNDS, VALUE \$661,491; AND HALIBUT, LINGCOD, AND SABLEFISH VISCERA, 44,459 POUNDS, VALUE \$7,719.

PACIFIC COAST FISHERIES

WASHINGTON: CATCH BY GEAR, 1946

OREGON: CATCH BY GEAR, 1946

CALIFORNIA: CATCH BY GEAR, 1946

LANDINGS BY HALIBUT FLEET AT SEATTLE, WASH.

Landings of halibut, lingcod, rockfishes, and sablefish at Seattle, Washington, by the United States halibut fleet during 1946 amounted to 15,570,679 pounds, valued at \$3,111,971 to the fishermen. In addition, a total of 1,104,606 pounds of assorted fish livers and viscera, valued at \$1,517,566, was also landed by these vessels. The combined landings were 14 percent larger than in the previous year, and the value was 42 percent greater.

All landings reported in the following tables are reported as dressed weight, and so are not directly comparable with data contained in the sectional and state catch tables. A summary of the 1946 landings at Seattle by the United States halibut fleet is contained on the following page. For additional information on the Pacific Coast halibut fishery the reader is referred to Section II of this document entitled "Review of Certain Major Fisheries."

1/ IN ADDITION, VESSELS OF THE SEATTLE HALIBUT FLEET LANDED THE FOLLOWING QUANTITIES OF FISH LIVERS DURING 1946: GRAYFISH, 152,789 POUNDS, VALUED AT \$80,978; HALIBUT, 234,116 POUNDS, VALUED AT \$486,961; LINGCOD, 31,853 POUNDS, VALUED AT \$109,893; SABLEFISH, 65,912 POUNDS, VALUED AT \$148,302; SOUPFIN SHARK, 66,154 POUNDS, VALUED AT \$494,832; AND MISCELLANEOUS LIVERS AND VISCERA, 553,782 POUNDS, VALUED AT \$196,600, A TOTAL OF 1,104,606 POUNDS, VALUED AT \$1,517,566 TO THE FISHERMEN.

NOTE:--THE 1946 HALIBUT SEASON OPENED ON MAY 1 AND CLOSED AUGUST 19.

RECEIPTS BY SEATTLE WHOLESALE DEALERS

The total quantity of fresh and frozen fish, shellfish, livers, and viscera received by Seattle wholesale dealers during 1946 from all sources totaled 77,399,992 pounds, valued at \$15,431,556. This represented a decrease of 14 percent in quantity, but an increase of 3 percent in value compared with 1945. The following table contains information on these receipts by species, origin, and type of dressing for the year 1946. The Seattle Fishery Market News Service office issues detailed information on these receipts monthly.

SECTION 7.- LAKE FISHERIES^o

During 1946, the commercial catch of fish by United States fishermen in the Great Lakes and the International Lakes of northern Minnesota amounted to 78,333,900 pounds, valued at \$11,677,941 to the fishermen. This represents a decrease of less than 1 percent in volume but a decline of 15 percent in value, compared with 1945. In addition, the Canadian catch in these lakes amounted to 29,125,300 pounds. Lake Erie was the leading producer, with United States fishermen taking 29,120,700 pounds and Canadian fishermen, 18,925,100 pounds. Of the individual states, Michigan had the largest production, with 24,159,100 pounds.

The leading species in the United States catch was lake herring, 20,170,400 pounds, followed by yellow pike, 7,850,500 pounds, lake trout, 7,457,400 pounds, and cisco, 6,638,400 pounds. The catch of lake herring was the largest since 1941. The yield of yellow pike was the largest ever recorded, while that of lake trout was the smallest since 1913 when continuous records first became available. Production of cisco has shown an amazing recovery from a low in 1943 of 25,900 pounds and 98,400 pounds in 1944 to over 6 million pounds in 1946.

The most recent data available on operating units employed in the fisheries of the Lake States are for 1940. In that year, 5,142 United States fishermen were employed. If the Lake fisheries have followed the same trend as in other areas, it can be assumed that the number of fishermen in 1946 was somewhat greater than in 1940.

The last complete survey of the fishery transporting, wholesaling, and manufacturing industries was made for 1940. In that year, 35 men were employed on 11 vessels operating in the transporting trade and 3,030 persons were employed in wholesale and manufacturing establishments. The latter employees received \$2,842,680 in salaries and wages in 1940. Detailed statistics on these branches of the industry for 1940 can be found in "Fishery Statistics of the United States, 1944" (Statistical Digest No. 16), and in earlier publications of the same series.

The following tables contain a summary of the United States and Canadian catch in the Great Lakes and the International Lakes of northern Minnesota as well as detailed data on the United States catch in these waters by individual States and Lakes and according to gear of capture. Condensed summary data on the catch by States of the Lake fisheries have been previously published in Current Fishery Statistics No. 413. Historical data on the fisheries of the Great Lakes can be found in the Report of the International Board of Inquiry for the Great Lakes, which can be purchased from the Superintendent of Documents, Washington 25, D. C.

^o The statistics of the catch were obtained principally from records of the various State agencies and from the Dominion Bureau of Statistics, Ottawa, Canada. The data for the operating units (fishermen, vessels, boats, and gear) of the United States, which are for 1940, were obtained largely by agents of this Service in a special survey, although State records in several instances were very helpful in this work. In all cases, the statistics collected are for the calendar year except for Rainy Lake, Lake of the Woods, and Namakan Lake in Minnesota, which are for two seasons; for Lake of the Woods, the seasons are from June 1 to November 1 and December 1 to April 1; and for Rainy and Namakan Lakes the seasons are from May 15 to November 1 and December 1 to April 1. The catches for these two seasons, in the order named, have been combined to constitute a year. The quantity of fish taken in these Lakes between January 1 and April 1 is estimated to be less than 3 percent of the total catch.

1/ INDIANA PRODUCTION ESTIMATED.
2/ LESS THAN 50 POUNDS OR 50 CENTS.

NOTE:--THESE STATISTICS DO NOT INCLUDE THE CATCH OF SMELT BY DIP NETS OR THE PRODUCTION OF MUSSEL SHELLS IN THE STREAMS TRIBUTARY TO THE GREAT LAKES SINCE DATA ON THE YIELD OF THESE ITEMS WERE NOT COLLECTED. ALTHOUGH THE MICHIGAN DEPARTMENT OF CONSERVATION MADE NO ESTIMATE OF THE POUNDS OF SMELT DIPPED FROM THE STREAMS OF THAT STATE IN 1946, ALL REPORTS INDICATE THAT THE TAKE WAS SUBSTANTIALLY GREATER THAN IN 1945.

1/ DATA ON THE PRODUCTION OF CANNED PRODUCTS, BYPRODUCTS, AND PACKAGED FISH ARE FOR 1946, WHILE DATA ON THE PRODUCTION OF SALTED AND SMOKED FISH, AND FISHERMEN'S PREPARED PRODUCTS ARE FOR 1940.

2/ A SMALL AMOUNT OF SMOKED CHUB, LAKE TROUT, AND WHITEFISH PRODUCED IN INDIANA HAS BEEN INCLUDED WITH THE PRODUCTION OF ILLINOIS.

3/ THIS ITEM HAS BEEN INCLUDED UNDER "UNCLASSIFIED CURED FISH".

4/ THIS ITEM HAS BEEN INCLUDED UNDER "UNCLASSIFIED PACKAGED FISH".

5/ THIS ITEM HAS BEEN INCLUDED UNDER "MISCELLANEOUS PRODUCTS".

6/ INCLUDES FRESH SUCKER FILLETS; FRESH AND FROZEN FILLETS OF SHEEPSHEAD AND WHITE BASS; AND FROZEN FILLETS OF BLUE PIKE, LAKE TROUT, SAUGER, WHITEFISH, YELLOW PERCH, AND YELLOW PIKE.

7/ INCLUDES FRESH FILLETS OF LAKE HERRING AND UNCLASSIFIED FISH.

8/ INCLUDES FRESH FILLETS OF LAKE TROUT, PIKE OR PICKEREL, SHEEPSHEAD, AND UNCLASSIFIED FISH; AND FROZEN FILLETS OF LAKE HERRING, SALMON, AND SHEEPSHEAD.

9/ INCLUDES FRESH AND FROZEN FILLETS OF COD, FLOUNDER, LAKE HERRING, LAKE TROUT, PIKE, SALMON, SAUGER, SHEEPSHEAD, SUCKER, WHITE BASS, WHITEFISH, AND YELLOW PIKE; FRESH BLUE PIKE FILLETS; AND FROZEN YELLOW PERCH FILLETS.

10/ INCLUDES FRESH FILLETS OF BUFFALOFISH, CARP, HADDOCK, LAKE TROUT, HACKEREL, PIKE, SCUP, SUCKER, AND UNCLASSIFIED FISH; AND FROZEN FILLETS OF BLUE PIKE, LAKE TROUT, WHITEFISH, AND YELLOW PERCH.

11/ INCLUDES FRESH FILLETS OF CARP, PIKE, AND SUCKER; AND FROZEN FILLETS OF LAKE HERRING, SAUGER, AND YELLOW PIKE.

12/ INCLUDES SPICED ALEWIVES AND SEA HERRING; SMOKED CHUB, CISCO, AND TULLIBEE, LAKE HERRING, SEA HERRING, SALMON, AND STURGEON; AND KIPPERED SALMON.

13/ INCLUDES SPICED ALEWIVES; AND SMOKED CARP, CHUB, CISCO, AND TULLIBEE, MOONEYE, SABLEFISH, SALMON, SHEEPSHEAD, AND WHITEFISH.

14/ INCLUDES SPICED ALEWIVES AND SEA HERRING; AND SMOKED BUTTERFISH, CARP, HACKEREL, AND MENOMINEE WHITEFISH.

15/ INCLUDES SMOKED BUFFALOFISH, BUTTERFISH, CARP, SEA HERRING, SHAD, STURGEON, AND WHITEFISH.

16/ INCLUDES SPICED ALEWIVES AND SEA HERRING, SMOKED SALMON AND WHITEFISH, SALTED LAKE HERRING, AND KIPPERED SALMON.

17/ INCLUDES SMOKED CARP AND SALMON, AND CANNED WHITEFISH CAVIAR.

18/ INCLUDES FRESH AND FROZEN LAKE HERRING FILLETS; FRESH PIKE AND SUCKER FILLETS; CANNED CARP FLAKES, SMOKED CARP FLAKES, AND LAKE HERRING; AND BURBOT LIVER OIL.

NOTE--THE TOTAL VALUE OF THE MANUFACTURED PRODUCTS FOR THE LAKE STATES WAS AS FOLLOWS: BY MANUFACTURING ESTABLISHMENTS, \$4,936,338; AND BY FISHERMEN, \$148,968. SOME OF THE ABOVE PRODUCTS MAY HAVE BEEN MANUFACTURED FROM PRODUCTS IMPORTED FROM ANOTHER STATE OR A FOREIGN COUNTRY; THEREFORE, THEY CANNOT BE CORRELATED DIRECTLY WITH THE CATCH WITHIN THE STATE.

SECTION 8.- MISSISSIPPI RIVER FISHERIES

The most recent catch statistics of the fisheries of the Mississippi River and its Tributaries are those collected for the year 1931. The yield of fishery products in that year amounted to 82,382,523 pounds, valued at \$2,897,357, which was a decrease of 22 percent in quantity and 36 percent in value compared with the quantity and value of the catch in 1922, when the preceding survey was made.

Detailed statistics on the fisheries of the Mississippi River and its Tributaries for 1931 were published in Appendix III to Report of Commissioner of Fisheries for the fiscal year 1933 entitled "Fishery Industries of the United States, 1932".

A summary of these fisheries in 1931 was published in the Bureau of Fisheries annual reports entitled "Fishery Industries of the United States," by R. H. Fiedler, for the years 1933 to 1939, inclusive and in Statistical Bulletin 994. Information regarding the production of cured fishery products in the Mississippi River area in 1931, and canned fishery products and byproducts in 1946 appear in the following table.

^{1/} DATA FOR MUSSEL-SHELL PRODUCTS AND CANNED PRODUCTS ARE FOR 1946, AND DATA FOR ALL OTHER PRODUCTS ARE FOR 1931.

^{2/} THIS ITEM HAS BEEN INCLUDED WITH "UNCLASSIFIED, SMOKED".

^{3/} INCLUDES SMOKED BUFFALOFISH AND TULLIBEE, AND CANNED CARP AND BUFFALOFISH.

^{4/} INCLUDES SMOKED EELS, STURGEON, AND SALMON.

^{5/} INCLUDES SMOKED BUFFALOFISH, BUTTERFISH, CARP, LAKE TROUT, PADDFLEFISH, SABLEFISH, SALMON, TULLIBEE, AND WHITEFISH.

NOTE:--THE TOTAL VALUE OF THE MANUFACTURED PRODUCTS FOR THE MISSISSIPPI RIVER AND ITS TRIBUTARIES WAS AS FOLLOWS: BY MANUFACTURING ESTABLISHMENTS, \$5,490,716, AND BY FISHERMEN, \$8,751. SOME OF THE PRODUCTS MAY HAVE BEEN MANUFACTURED FROM PRODUCTS IMPORTED FROM ANOTHER STATE OR A FOREIGN COUNTRY; THEREFORE, THEY CANNOT BE CORRELATED DIRECTLY WITH THE CATCH FROM WITHIN THE STATE.

SECTION 9.- ALASKA FISHERIES

The commercial catch of fish and shellfish in Alaska during 1946 totaled 651,446,014 pounds, valued at \$24,622,456 to the fishermen. This represents an increase of 9 percent in quantity and 10 percent in value, compared with 1945. The poor catch of salmon, which was the smallest since 1927, was more than offset by the second largest herring catch on record.

In 1946, the salmon industry resumed normal operations after 3 years of operation under the wartime industry concentration program. A total of 116 canneries operated, an increase of 20 plants over the previous year. However, due to below normal runs of salmon, particularly pink and chum, the pack was the lowest since 1927.

Herring catch quotas were raised from 700,000 barrels in 1945 to 900,000 barrels in 1946. A barrel consists of 250 pounds. The bulk of the catch was used for reduction purposes, with smaller quantities being used for pickling, dry-salting, and for bait.

Halibut landings in United States and Alaskan ports were again subject to allocation by the Office of the Coordinator of Fisheries during the first part of the season. With the exception of a short period during July, price ceilings remained on halibut until August 16, just 3 days before the close of the season. Landings of halibut in Alaska increased from 33-1/3 million pounds (round weight basis) in 1945 to 35 million in 1946.

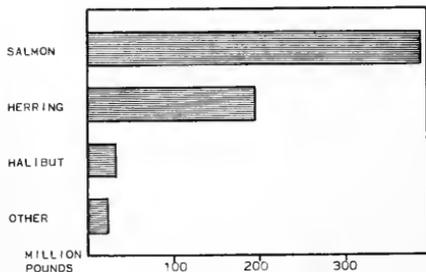

Approximately 6 percent more razor clams were taken in Alaska during 1946 than in the previous year. With the exception of small quantities sold fresh in the shell, or frozen in packages, the entire catch was used for canning.

The quantity of sharks caught increased 141 percent, but the value decreased 16 percent. The decrease in value was caused in part by increasing emphasis on the catch of grayfish, whose livers are less valuable than the livers of the soupfin shark.

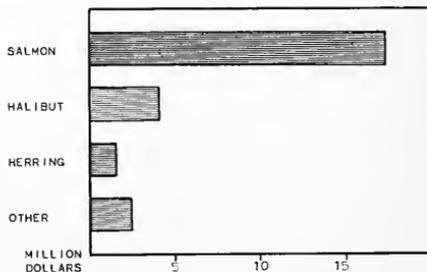

Detailed data on the number of fishermen, fishing craft, and quantity of gear employed in the fisheries of Alaska during 1946 as well as information on the volume and the catch and the production of manufactured fishery products will be found on the following pages. Condensed summary data on the operating units, catch, and products prepared for market have been previously published in Current Fishery Statistics No. 401. Additional information on the fisheries of Alaska during 1946 can be found in "Alaska Fishery and Fur-seal Industries, 1946" (Statistical Digest No. 17).

¹⁰ Statistics on the fisheries of Alaska are collected and compiled by the Alaska Branch of this Service.

- ^{1/} INCLUDES CATCHES OF HALIBUT, SABLEFISH, LINGCOD AND ROCKFISHES LANDED BY VESSELS OF THE ALASKA HALIBUT FLEET, INCLUDING LANDINGS AT ALASKAN AND BRITISH COLUMBIA PORTS. ROUND WEIGHTS OF FISH TAKEN BY HALIBUT VESSELS WERE OBTAINED BY MULTIPLYING REPORTED WEIGHTS WHICH REPRESENT POUNDAGE OF FISH AFTER Evisceration AND REMOVAL OF HEADS BY THE FOLLOWING FACTORS: HALIBUT, 1.33; AND SABLEFISH, LINGCOD AND ROCKFISHES, 1.43. VALUES INCLUDE PAYMENTS RECEIVED FOR LIVERS AND VISCERA AS FOLLOWS: HALIBUT \$830,275; SABLEFISH \$417,837; LINGCOD \$10,923; ROCKFISHES \$1,423; COD TONGUES \$120.
- ^{2/} MISCELLANEOUS LIVERS, NOT SEGREGATED AS TO SPECIES, ARE LISTED FOR VALUE ONLY, AS IT IS ASSUMED THAT ROUND WEIGHTS OF THE FISH ARE REPORTED ELSEWHERE.

SECTION 10.- HAWAIIAN FISHERIES

The following tabulation of the catch of fish and shellfish in the Territory of Hawaii, has been compiled from monthly reports submitted by the Board of Commissioners of Agriculture and Forestry of the Territory of Hawaii, Division of Fish and Game.

The catch listed in this section has not been included in the tabulations of the catch of the United States and Alaska listed in the sections entitled "General Review" or "Review of Certain Major Fisheries".

Detailed information on operating units used in the fisheries of Hawaii are not available. Based on licenses issued during the fiscal year ending June 30, 1946, 3,424 fishermen were employed in the Territory during that fiscal year. During the same period, 529 powered fishing craft were also licensed to operate in the fisheries.

BONI TO

There are presented in this section of the Digest complete data on the catch of certain of the major species of fish and shellfish taken commercially in the United States and Alaska. Although these data are included in the detailed catch tables for the various States, they have been republished in individual fishery tables in this portion of the report to provide readers with a single source of catch data for cod, haddock, halibut, mackerel, menhaden, pilchard, rosefish, salmon and tuna. Statistics on the oyster and shrimp fisheries are being omitted this year since data were not collected in the South Atlantic and Gulf States for 1946 and a substantial portion of the catch of these items comes from that area. Most of the above species are taken by fishermen operating in several States or districts, and a number are taken by several types of fishing gear. Because of this, the casual reader of the Digest often experiences difficulty in locating complete data on the catch of the species in individual State catch tables. The information contained in this section includes the volume and value of the catch by individual types of gear and by States and districts.

HALIBUT SCHOONER

UNITED STATES AND ALASKA COD FISHERY

The catch of cod in the United States and Alaska during 1946 totaled 103,199,530 pounds, valued at \$6,728,768, approximately 50 million pounds less than in the preceding year. Otter trawl landings in Massachusetts decreased 54 million pounds—largely because most of the large otter trawls fishing out of Boston were tied up for nearly five months early in the year by a dispute over the distribution of the proceeds from the sale of the catch between the vessel owners and fishermen.

Otter trawls accounted for 81 percent of the total landings, while 14 percent were caught by lines. Smaller quantities were landed by craft fishing with gill nets, floating traps, pound nets, purse seines, and pots.

Massachusetts, with a catch of 80 million pounds of cod, led in the production of this species, followed by Maine (7.4 million pounds) and Washington (5.8 million pounds). Otter trawls were the most important type of gear in all of the more important areas, except Alaska. In the Territory the catch was taken by hand lines.

ATLANTIC COAST HADDOCK FISHERY

Haddock production in the United States during 1946 amounted to 155,034,600 pounds, valued at \$13,042,834 to the fishermen, compared with 154,988,600 pounds, valued at \$10,828,600 in 1945. The total catch would have been considerably greater had there been no tie-up of the large otter trawls fishing out of Boston during most of the first five months of the year.

Otter trawls accounted for 95 percent of the total landings. The balance were caught with trawl and hand lines, gill nets, purse seines, pound nets and dredges

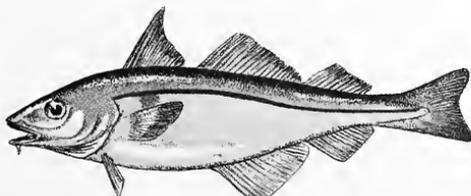

The haddock fishery is confined to the Atlantic Coast, with practically the entire catch being taken by craft landing in New York or the New England States. Massachusetts produced 95 percent of the entire catch, followed by New York and Maine. Small quantities were also landed in New Hampshire, Rhode Island, Connecticut, New Jersey and Virginia.

HADDOCK

PACIFIC COAST HALIBUT FISHERY

The total North Pacific halibut catch by both United States and Canadian craft was the largest since 1915, while the catch by the United States and Alaskan fleet was the largest since 1930. The quota set by the International Fisheries Commission was 52.5 million pounds, the same as in 1945. However, over a million pounds of halibut was taken outside of quota restrictions by vessels operating in other fisheries, and the fishing intensity in the halibut fishery was so great that the catch of each area was higher than it was anticipated it would be when the closing dates were set. In 1946, there were 438 vessels of United States registry regularly engaged in the halibut fishery, compared with 234 in 1936.

The season opened on May 1 and closed in Area II (Willapa Bay to Cape Spencer) on June 11, and in Area III (west of Cape Spencer) on August 19. The 1946 season, which lasted only 42 days in Area II and 111 days in Area III, was the shortest in history. In 1936, 10 years earlier, the season in Area II extended for 148 days and for 233 days in Area III. Landings of halibut in the United States and Alaska ports were allocated by the office of the Coordinator of Fisheries during the first part of the season.

The data listed in the following tables represent dressed weight, which is the weight upon which the quota is based, while those in the various State and sectional tables represent the round weight of the catch. The dressed weight can be converted to round weight by multiplying by 1.33.

NOTE:-- IN ADDITION TO THE ABOVE, THERE WERE 1,608,267 POUNDS OF HALIBUT, SABLEFISH, LINGCOD, ROCKFISH, GRAYFISH (DOG FISH), SOUPFIN SHARK AND MISCELLANEOUS LIVERS VALUED AT \$2,590,039 LANDED BY THE UNITED STATES HALIBUT FLEET AT PACIFIC COAST PORTS DURING 1946. THESE VESSELS ALSO LANDED 1,830,573 POUNDS OF HALIBUT, SABLEFISH AND LINGCOD VISCERA VALUED AT \$611,197 DURING THE SAME PERIOD. VESSELS OF THE CANADIAN HALIBUT FLEET LANDED A TOTAL OF 18,372,000 POUNDS OF HALIBUT VALUED AT \$3,215,000 DURING 1946 OF WHICH 495,000 POUNDS VALUED AT \$89,500 WERE LANDED IN ALASKA PORTS.

THESE STATISTICS ARE COMPILED FROM DATA COLLECTED BY THE INTERNATIONAL FISHERIES COMMISSION FOR WASHINGTON AND BRITISH COLUMBIA AND BY FISH AND WILDLIFE SERVICE AGENTS FOR ALASKA. THE TABULATION DOES NOT INCLUDE LANDINGS AT PORTS SOUTH OF SEATTLE, WASHINGTON, WHICH AVERAGE LESS THAN 3 PERCENT OF THE ANNUAL PACIFIC COAST CATCH. THESE DATA REPRESENT DRESSED WEIGHT, WHICH IS THE WEIGHT UPON WHICH THE QUOTA IS BASED.

UNITED STATES AND CANADIAN HALIBUT CATCH, 1946

UNITED STATES AND CANADIAN HALIBUT CATCH, 1925 - 1946

ATLANTIC COAST MACKEREL FISHERY

As no surveys were conducted in New Jersey or New Hampshire for 1946, information presented in the following table is composite data covering 1945 in those States and 1946 in all other States. In 1945 only a negligible quantity of mackerel was landed in New Hampshire, while landings in New Jersey amounted to less than 10 percent of the total.

Based on available data, it appears that the 1946 catch of mackerel on the Atlantic Coast was 11 percent less than in the previous year. Landings by purse seiners in Massachusetts were over 9 million pounds less than in 1945.

More Atlantic Coast mackerel are landed by purse seine than by all other types of gear combined. In 1946 the next most important types of gear were floating traps, drift gill nets and pound nets.

PACIFIC COAST MACKEREL FISHERY

In 1946 the total catch of Pacific mackerel totaled 53,875,300 pounds, valued at \$1,431,462. Compared with the previous year, this represented a nominal increase in poundage, but a gain of 28 percent in value. The mackerel catch has been subject to large variations in recent years, partially due to changes in fishing intensity. In the years since 1928, the catch has varied from 35 million pounds to 146 million pounds.

The Pacific Coast mackerel fishery is confined to the State of California, with the bulk of the catch being taken in the San Pedro district. Practically all of the catch is taken with brail or scoop nets, and seines. Small quantities are also caught by lines, gill and trammel nets, and otter trawls.

REVIEW OF CERTAIN MAJOR FISHERIES

ATLANTIC COAST MENHADEN FISHERY

The menhaden catch in 1946 amounted to over 920 million pounds, setting a new record for this species. For the first time since 1932, the yield of menhaden exceeded pilchard landings. Nearly all of the menhaden were used for reduction into meal and oil. Small quantities were used for bait or for canning.

In 1946 no general canvass of the fisheries was conducted in New Jersey, Delaware, or the South Atlantic and Gulf States. However, in conducting the canned fish and byproducts survey, information was obtained on the total quantity of menhaden used for reduction purposes in these States. Since nearly the entire catch is used in the manufacture of oil and meal, the poundage used for reduction has been listed as the landings in those States which were not canvassed for 1946 data.

The Middle Atlantic States led in the production of menhaden in 1946, followed by the South Atlantic and Gulf States and the Chesapeake States. Only small quantities were landed in New England.

PACIFIC COAST PILCHARD FISHERY

The catch of pilchards in 1946, which amounted to 531 million pounds, was the smallest since 1933. Although landings in the San Pedro area were at record levels, they were not large enough to offset the disastrous season suffered by operators in the San Francisco and Monterey areas. As usual, the California catch accounted for over 95 percent of the total landings in the Pacific Coast States.

During the years since 1934, the catch has totaled less than 900 million pounds in only 1945 and 1946, and less than one billion pounds in only three additional years. From 1932 to 1945 inclusive, the pilchard fishery accounted for a larger annual catch than any other species taken by United States fishermen.

ROSEFISH FISHERY

The 1946 catch of rosefish (ocean perch), which amounted to 178 million pounds, was the largest in history. This fishery did not become commercially important until 1935, when landings reached 17 million pounds.

Seventy-seven percent of the 1946 catch was delivered to Massachusetts ports, principally Gloucester and Boston, with most of the balance being landed at Portland and Rockland, Maine. The leading port for this species is Gloucester, Massachusetts.

Practically all of the catch is used in the production of fillets. In 1946 only 1-1/2 percent of these fillets was marketed fresh, the balance being frozen. Waste from filleting is used in the production of rosefish oil and meal.

REVIEW OF CERTAIN MAJOR FISHERIES

PACIFIC COAST SALMON FISHERY

The 1946 salmon catch in the Pacific Coast States and Alaska totaled 478 million pounds, approximately 1 percent less than in 1945. The largest decreases occurred in the Central District of Alaska and the Puget Sound District of Washington. The decrease in the Central District of Alaska was general in all species, except silver or coho salmon. In the Puget Sound District the largest decline was in pink salmon and was due to the fact that this species occur in this area in quantity only in odd-numbered years. These were partially offset by increased landings in Southeastern and Western Alaska.

The most important types of gear used in taking salmon were purse seines, pound nets (including floating traps), and gill nets. The catch of each of these types of gear amounted to over 100 million pounds. Smaller quantities were also taken by lines, haul seines, dip nets and reef nets.

Alaska led with a production of 391.7 million pounds, followed by Washington, with 55.2 million pounds; Oregon, 17.7 million pounds; and California, 13.7 million pounds.

REVIEW OF CERTAIN MAJOR FISHERIES PACIFIC COAST TUNA FISHERY

Landings of tuna and tunalike fishes in the Pacific Coast States during 1946 established a new record of over 220 million pounds. This was due primarily to the addition of new vessels to the fleet, the expansion of fishing areas, and increased intensity of fishing. The new and larger vessels entering the fishery permitted longer trips and increased the size of the fares that could be landed.

The albacore catch, while greater than in any year prior to 1943, was less than half the record established in 1944. Landings of bluefin tuna were the second largest on record, while those of skipjack were the third largest. The record tuna catch was due primarily to the tremendous increase in the production of yellowfin tuna, practically all of which were taken off the coasts of Central and South America.

The San Diego and San Pedro districts of California accounted for most of the landings, with relatively small amounts being landed in the other districts of California and in Oregon and Washington.

SECTION 12.- STATISTICAL SURVEY PROCEDURE

This report is another in a series of annual statistical reports containing data on the quantity and value of the commercial catch of fishery products and the numbers of persons and operating units engaged in the commercial fisheries of the United States and Alaska. The report has been prepared and published by the Branch of Commercial Fisheries, Fish and Wildlife Service, Department of the Interior, and is a continuation of a series inaugurated by its predecessor organizations in the Departments of the Interior, Commerce, Commerce and Labor, and the United States Fish Commission.

In order that those who use the statistical data contained in this and previous reports may be informed as to the source of the figures and methods for their collection, it has been deemed advisable to outline, in moderate detail, the survey procedure followed. This procedure has been developed over a period of years, and changes in method have been made at times when such changes have appeared to work toward general improvement. While the surveys in the several sections are not made in the same manner, owing to varying facilities and records in different States, an attempt has been made to make the data collected by various methods in the producing areas comparable with respect to the same year as well as over a period of years. Throughout the entire plan it has been the intention to coordinate State and Federal fishery statistical work so that there will be as little duplication of effort as possible.

SECTIONAL SURVEYS

Statistical surveys of the fisheries and fishery industries of the various sections of the United States occupy by far the greatest part of the time of the statistical personnel of the Branch. In the course of these surveys, the field representatives visit the individual fishing localities of the various States to collect statistics on the volume and value of the catch of fish and shellfish, employment in the fisheries, quantity of fishing gear, number and classification of fishing and transporting craft, and the volume and value of manufactured fishery products and byproducts. The various phases of these surveys are discussed in detail in the sections following.

History.—The first comprehensive statistical survey of the fisheries and fishery industries of the United States was made for the year 1880 by George Brown Goode, Assistant Director of the United States National Museum, and associates, with the cooperation of the Commissioner of Fisheries and the Superintendent of the Tenth Census. Data for specific fisheries, or restricted sections for years prior to 1880, also were collected in the early survey and recorded in Mr. Goode's reports. The survey for 1880, however, did not include the Mississippi River and its tributaries. Periodic general surveys of a limited number of States or limited areas of the United States were made for various of the intervening years between 1880 and 1908 and from 1909 to 1928. In 1908 a survey of the entire United States, except the Mississippi River and its Tributaries, was made. The next general survey of the entire United States was not made until 1931, although complete data for all sections, excluding the Mississippi River and its Tributaries, were collected for 1929 and 1930. Complete data on the catch and operating units for these same sections were also collected for 1932. In the latter survey, however, lack of sufficient funds prohibited collection of data on wholesale and manufacturing operations except those data collected as a part of the canned fishery products and byproducts survey. Complete canvasses of the catch were made in the New England States for 1933, 1935, for each year for 1937 to 1940, inclusive, and for 1942 to 1946, inclusive, except that no survey was made in New Hampshire for 1946. With the exception of data for Massachusetts and Rhode Island for 1946, complete operating units statistics, in this section were obtained for the same years. Information was collected on the catch and operating units in the Middle Atlantic States for the following years: 1933; 1935; 1937 to 1940, inclusive; 1942 to 1945, inclusive; and in the State of New York for 1946. Statistics on the catch and operating units of the South Atlantic and Gulf States, except for Florida operating units for 1945, were collected for 1934, the years from 1936 to 1940, inclusive, and 1945. Data on the catch of the Pacific Coast States were obtained for the years 1933 to 1946, inclusive. Data on the operating units of the Pacific Coast States were obtained for the years 1933 to 1945, inclusive. Statistics on the catch of the Lake States are available for the years 1933 to 1946, inclusive. Data on the operating units of these states were collected for 1934, and for the years 1936 to 1940, inclusive. Data on the wholesale and manufacturing industries were collected in all of the surveys from the years 1933 to 1940 inclusive. In the years since 1940, the lack of personnel and funds precluded collection of data on wholesale and manufacturing firms except those data collected as a part of the canned fishery products and byproducts surveys.

The following chart indicates the years for which surveys have been made in the various sections. Figures for more recent years are available from the Service in bulletin form, but data for the earlier years are available only in the Fish Commission and Bureau of Fisheries printed reports. These reports are available for reference in the Department of the Interior library and in many public libraries.

Since the surveys of the fisheries have varied in completeness three legends have been used for the years shown in the chart to indicate whether complete, partial, or no surveys were conducted in the individual regions. The designation "Complete survey" has been used to indicate that basic operating unit and catch data were obtained and that complete information was collected on employment in wholesale and manufacturing establishments and on the production of manufactured fishery products. The legend "Partial survey" usually indicates that operating unit and catch statistics were collected, but that no information was obtained on employment in wholesale and manufacturing establishments and that only partial data were obtained on the production of manufactured fishery products. In some instances the designation "Partial survey" is used for regions in which only catch statistics were collected. The legend "No survey" indicates that a general canvass was not conducted to obtain operating unit, catch, employment in wholesale and manufacturing, plants, and complete manufactured products data. Although the chart indicates that in certain regions no surveys were conducted, some information may be available on the landings at certain important ports. Likewise information on the catch of certain species such as menhaden may be available as a result of information collected in connection with the annual canned fish and byproducts survey. Data on the annual production of canned fishery products and byproducts have been collected for all regions since 1921, while information was obtained on the production of packaged fish for 1926 and annually since 1928.

Information on surveys of special fisheries and limited areas can be found in Statistical Digest No. 16 (Fishery Statistics of the United States, 1944) and in earlier publications of the same series.

Field Personnel.—The statistics contained in this volume have been collected by a group of trained marketing specialists which comprises a part of the permanent staff of the Branch of Commercial Fisheries of this Service.

Period Covered.—These specialists are assigned permanent field stations, generally in the principal port within their field, and travel from that station in conducting their various surveys. They collect statistics of fishery operations for the year preceding that in which they are working; and since their field work occupies the greater part of the year, it is usually at least a year from the end of the calendar year for which they are collecting data until the figures are published. The data usually are collected and published on a calendar year basis, although for some States they are on a fiscal year basis. Prior to 1930, statistics on the catch of oysters in the Atlantic and Gulf States were collected for the oyster season; that is, from September to April, inclusive. Beginning with 1930 and continuing to the present time, they have been collected on the basis of the calendar year.

Scope.—The scope of the coastal statistical surveys include canvasses of the commercial fisheries of the oceans and bays and of the coastal rivers as far inland as commercial fishing is important. This usually coincides with the range of commercial fishing for anadromous species. Statistics of the fisheries of the Mississippi River cover canvasses of the fisheries of the Mississippi River proper as well as all of its tributaries where in commercial fishing for either fish, crustaceans, or mollusks is prosecuted. Statistics of the fisheries of the Great Lakes cover canvasses of the fisheries prosecuted in the lakes proper, adjacent bays, the International Lakes of northern Minnesota, and rivers which sustain a commercial fishery having outlets into these waters. Statistics on the fisheries of Florida include the commercial fisheries prosecuted in Lake Okechobee. Surveys for statistics of the wholesale and manufacturing fishery industries cover such plants located in the coastal, river, and lake areas adjacent to the waters mentioned above.

Methods of Collection.—Several methods for the collection of fishery statistics are employed, each of which has been carefully studied to obtain the best results with the available personnel and funds. In most instances the field personnel obtain lists of the names of fishing vessels, names and numbers of motorboats, and names of owners of these craft from local custom officials. Also it usually is possible to obtain the names of licensed commercial fishermen and some statistics on the catch from State fishery agencies; from other State, county or city sources; or from private organizations.

With such preliminary records as are available for their guidance the field specialists visit each fishing community in their field unless these preliminary records are so complete that personal visits may be eliminated. If complete catch data are not available from central sources, wholesale dealers and manufacturers of fishery products are visited and data are obtained from them on their purchases of fishery products. While it is impossible for the few Service representatives available for this work to interview each fisherman in a

given locality, the more important ones are visited, and a sufficient number of those of lesser importance are interviewed to obtain reliable information on their production, the number of fishing craft employed, the quantity of gear operated, and the number of persons employed as fishermen.

In the Great Lakes and Pacific Coast States such exceptional cooperation has been obtained in recent years from the State fishery agencies in the collection of statistics that only fragmentary surveys need be made by the Service specialists to obtain other necessary data. Also the State fishery agencies in Maine, New York, and Maryland more recently have developed very complete statistical systems which greatly facilitate the Service's surveys in these States.

As regards the fisheries of the Great Lakes and International lakes of Northern Minnesota, the Service obtains most of the catch statistics and usually the value of the catch direct from the records of the State fishery agencies. To obtain data on the number of fishermen, boats, vessels, and gear, the Service conducts such personal surveys among the fishermen as may be necessary to supplement the State records.

Service statistical personnel are stationed at Seattle, Wash., and San Pedro, Calif., who survey the fisheries of the Pacific Coast States. As a rule they obtain figures on the volume of the catch from the records of the State fishery departments. The value of the catch is derived from dealers' records. In Washington and Oregon, the offshore fisheries are surveyed separately by the Service to obtain data on the number of operating units. Statistics of the wholesale fishery industry for this section are obtained largely by personal interviews.

In the administration of the Alaska fisheries the Service obtains sworn statements concerning the activities of those prosecuting the fisheries in this area. These statements are compiled by the Alaska Branch of this Service and the summary data, by districts, are reproduced in this report.

Statistics on the volume of the catch of fish of the Great Lakes States usually are shown in weights as landed, which may be in the round or dressed condition. Statistics on the volume of the catch of fish taken in the remainder of the United States are shown in round weight.

The figures in the tables for shellfish represent the weight of the meats in the cases of univalve and bivalve mollusks and gastropods, and the round weight of crustaceans and such mollusks as squid and octopus.

Shore and vessel fisheries.—In general, statistics of the shore fisheries, as collected by the Service's representatives, include data on the number of casual and regular fishermen; number of motor and other fishing boats and accessory boats; type and quantity of gear used; and the volume, value, and method of capture of each species caught by boats (for our purpose craft of less than 5 net tons capacity are called "boats") for each locality or group of localities. This method is not followed in some sections where the availability of data collected by the State's fishery agencies obviates the necessity of detailed locality surveys.

Statistics of the vessel fisheries include data on the number of the crew, rig of vessels, net tonnage, kind and quantity of gear used, accessory boats carried, and volume, value, and method of capture of each species. For our purpose craft of 5 net tons capacity or more are called "vessels". As in the shore fisheries, the availability of figures collected by State fishery agencies may eliminate the necessity of our agents collecting these data for individual vessels.

Statistics of the quantity of gear operated indicate the maximum number of units fished at any one time during the year. Gear carried in reserve for replacement is not enumerated.

All persons engaged in commercial fishing operations are included as fishermen. For our purpose these have been divided into "regular" and "casual" fishermen. Regular fishermen are defined as those who receive more than one-half of their annual income from fishing; whereas casual fishermen are those whose principal business is something other than fishing, and who receive less than one-half of their annual compensation from fishing.

The catch of fish and shellfish is credited to the port where it is landed and the craft making the catch is credited to the locality where it landed the greatest portion of its

STATISTICAL SURVEY PROCEDURE

catch during the year. Prior to the survey for 1942 it was the practice of the Service to credit the entire catch of a vessel to the principal port of landing, regardless of the actual point of landing. This policy was discontinued, however, since it quite often resulted in inconsistencies by presenting catches of certain fish in areas to which they are not common inasmuch as fishing vessels frequently operate in areas far removed from their principal fishing port. An outstanding example of this is the case of the Southern trawl fishery. In this fishery off the New Jersey, Maryland, Virginia, and North Carolina coasts, many fishing vessels from Massachusetts operate for 6 to 10 weeks during the winter season. Prior to the survey for 1942 the catch of these fish, principally common to these waters, was credited to Massachusetts. Under the present system the catch is credited to the southern port at which it was landed and the vessel, crew, and gear are credited to the port at which the major portion of their catch was landed.

Publication of Data.—Statistics of employment in the fisheries, craft and gear engaged, quantity and value of catch, and certain data on industries related to the fisheries are summarized according to the geographic division and published in bulletin form as soon as possible after the completion of each survey. Later, the figures, in more detail, are included in the annual reports of the service entitled "Fishery Statistics of the United States" and in "Alaska Fishery and Fur Seal Industries."

Since 1928, data on the operating units (fishermen, fishing craft, and gear) by counties for the Atlantic Coast and Gulf States have usually been included in the annual statistical reports "Fishery Statistics of the United States" or its predecessor publication "Fishery Industries of the United States." However, funds were not available for the publication of county data for 1932, or the years from 1939 to 1944, inclusive. County data were collected for the areas in which surveys were conducted during those years, and the data are on file in the Washington, D. C. office of the Branch.

LOCAL AND SPECIAL SURVEYS

Landings at Certain New England Ports.—Detailed statistics are collected on the landings of aquatic products by individual fishing craft at Boston, Gloucester, New Bedford, and Provincetown and other Cape Cod ports, Massachusetts, and Portland, Maine. Service representatives are permanently stationed at each of these ports. They obtain daily figures on the quantity of fish landed by each fishing craft, the value of such fish landed, the date of departure and arrival of the craft, the grounds from which the fish were taken and the gear used in their capture. The Branch of Fishery Biology and the Fishery Market News Service cooperate in the collection of these data.

Statistics of the landings at the above ports are released monthly and annually in bulletin form and detailed data are published in annual statistical reports of the Branch. Products of American fisheries received duty free at Boston and Gloucester, Massachusetts, and Portland, Maine, from the treaty coasts of Newfoundland, Magdalen Islands, and Labrador, have not been included in the landings at these ports since 1938. Data on the landings at Boston and Gloucester, Massachusetts, have been collected annually since 1893. Some data are also available for these ports for earlier years. Information on landings at Portland, Maine, have been collected annually since 1915, and at New Bedford, Massachusetts since 1938.

Statistics on the Landings of Fish at Seattle, Washington.—Data on the landings by the United States halibut fleet at this port are assembled by the Service from information collected by the International Fisheries Commission. Generally, the halibut fleet is considered as consisting of those vessels belonging to members of the Fishing Vessel Owner's Association, Inc., which sell their fares through the Seattle Fish Exchange. This fleet originally fished almost exclusively for halibut. With the shortening of the halibut season, particularly in Area II, a portion of the fleet has fished for other species during the closed season for halibut, and has continued selling their fish through the Exchange. Data on other fishery products received by Seattle Wholesale Dealers, including receipts from Alaska and Canada, which appear in this report, are collected by the Service's Seattle representatives. Prior to 1944, receipts from Alaska and British Columbia were not included in the Seattle receipts published in the Statistical Digests. However, since October, 1938, these data were contained in the monthly and annual reports published by the Seattle Fishery Market News Office.

Shad and Alewife Fisheries.—Owing to the importance of the Hudson and Potomac Rivers in the production of shad, surveys for statistics of the catch, value of the catch, and operating units are made annually. On the Potomac River similar statistics are also obtained for the alewife fishery. Much of the data required for these surveys are available from the State fishery agencies.

Statistics of the annual shad and alewife fisheries are not published separately in bulletin forms. However, a summary of the data is published in the annual Statistical Digest.

Statistics of the shad fishery of the Hudson River are available for 1896, 1897, 1898, 1901, 1904, 1910, and from 1915 to 1945, inclusive, while data for the shad fishery of the Potomac River are available for 1896, 1901, 1904, 1909, 1915, from 1919 to 1942, inclusive, 1944, and 1945. Statistics of the alewife fishery of the Potomac River are available for 1896, 1909, 1915, 1919 to 1942, inclusive, 1944 to 1946, inclusive.

Pacific Halibut Fishery.—Statistics of the Pacific halibut fishery are obtained by the Service's personnel in Seattle, aided by Service representatives in Alaska, and the International Fisheries Commission. The fleet classification is that of the International Fisheries Commission, under which vessels that are listed by the Commission as having their home port in Alaska are included in the "Alaska fleet", and all other vessels of United States registry landing at Seattle or ports in British Columbia or Alaska are included in the "Washington fleet". The catch is credited to the point where landed in the section "Review of Certain Major Fisheries". In the other sections of this report, all halibut is credited to the port where landed, except that all halibut landed by United States and Alaskan craft in British Columbia is credited to Alaska. Monthly and annual statistical bulletins are available on this fishery, being published along with the statistics of the landings of fishery products at Seattle, Washington and detailed statistics are published in the annual statistical reports of the Branch. Statistics of the landings of halibut at Pacific Coast ports have been collected since 1925.

Canned Fishery Products and Byproducts.—Beginning in 1921, the Service has made annual surveys for statistics of the canned fishery products and byproducts industries of every section. These are begun the first week in January of each year for statistics of the production in the preceding year. The Service obtains by mail, so far as possible, the production of canned fishery products or byproducts from each plant in the United States engaged in this business. Where it is impossible to obtain reports by mail, the report is secured by personal visit by the Service's agents. They obtain statistics of the production and value of the production for each commodity by can sizes, case sizes, and trade classifications. The value shown for canned products constitutes the gross amount received by the packer at the production point, no deductions being made for commissions or expenses. Statistics of the canned fishery products and byproducts produced in Alaska are received on the same statements obtained by the Alaska Branch that include statistics of general fishery operations.

Annual statistical bulletins are issued on this trade, and detailed statistics of the output are published in the annual Statistical Digest. In addition to the data obtained on the output of these products annually since 1921, data also usually were obtained prior to 1921 for the years the various sections were surveyed.

Packaged Fish Trade.—Statistics of the annual production and value of fish packaged in the United States are obtained as a part of the survey for the statistics of the canned fishery products and byproducts industries. These data are released in bulletin form annually and later in more detailed and adjusted form in the annual Statistical Digest. Statistics of the production of packaged fish are available for 1926 and annually since 1928, except that no data was collected for the years 1941 to 1946, inclusive, in California.

Cold-Storage Holdings of Fish.—Information on the monthly freezings and holdings of fishery products is obtained from cold storage warehouses by mail and by Service employees in various cities of the country. Data are also obtained on the holdings of certain cured fish. Bulletins showing these statistics are issued monthly and annually.

Detailed cold-storage statistics also are published in the annual Statistical Digests issued by the Branch. Information regarding cold-storage holdings of fishery products

STATISTICAL SURVEY PROCEDURE

have been published since 1917 and data on quantities of fish frozen, for the years from 1920 to 1925, inclusive and annually since 1928.

Sponge Market, Tarpor Springs.—The major proportion of the output of sponges in Florida is sold on the Sponge Exchange at Tarpor Springs. The Service has obtained, from a representative of the Exchange, annual statistics of the quantity and value of the sponges sold by variety. Data of the quantity of sponges marketed by the Exchange is published in the Branch's annual Statistical Digest. Information regarding the transactions on the sponge exchange also are available in bulletin form for 1913, 1914, and for the years since 1917.

Foreign Fishery Trade.—Statistics of the foreign fishery trade are obtained from compilations made by the Bureau of the Census, Department of Commerce. Statistics of all known fishery products imported or exported have been assembled and published annually since 1926 in the Branch's Statistical Digest. For earlier years, they are available in the reports of the Bureau of the Census, Bureau of Foreign and Domestic Commerce, the Bureau of Statistics, the Department of Commerce and Labor, or the Treasury Department.

PRACTICES AND TERMS

Certain practices and terms of importance used in the compilation of fishery statistics are explained below.

Days Absent.—In computing "days absent" for vessels landing fares at the various ports, the day of arrival, but not the day of departure is included; thus a vessel leaving port on the 8th of the month and returning on the 15th of the month will be credited with 7 days absence. Prior to 1944, "days absent" included both the day of departure and the day of arrival. Statements appearing in the 1942 and 1943 editions of "Fishery Statistics of the United States" indicating that data on "days absent" for these years did not include the day of departure, were in error. The change in the method of computing "days absent" did not occur until 1944.

Operating Units.—Operating units as referred to in this document include persons engaged in the fisheries, and craft and gear employed in the fisheries.

Vessel.—The term "vessel" refers to a craft having a capacity of 5 net tons or more.

Boat.—The term "boat" refers to a craft having a capacity of less than 5 net tons.

Incidental Catch.—The term "incidental catch" refers to the catch of certain species by a type of gear which ordinarily does not capture such species.

Percentages.—Percentages are usually shown as whole numbers. Fractions of percents are dropped if less than five-tenths, and the percentage is raised to the next higher integer if the fraction is greater than five-tenths. If the fraction is exactly five-tenths, the integer is raised or lowered to make it an even number.

Fish.—The term "fish" as used in this report includes all species belonging to the class Pisces.

Shellfish, etc.—A shellfish is an aquatic invertebrate animal having a shell, such as a mollusk, or crustacean. However, in order to reduce the classifications appearing in the catch tables, all items not properly listed as "Fish" or "Whale Products" have been included under "Shellfish, etc." Accordingly, there is included under this classification turtles, frogs, sponges, sea weed, worms, etc.

Whale Products.—Since data are not available on the poundage of whales taken, statistics appearing in catch tables on the yield of these animals represent the weight of whale products produced such as meal, sperm oil, whale oil, etc. The values shown represent the amount received by the manufacturer for the products.

Converting.—Many of the figures shown in the statistical tables published herewith have been converted to thousands of pounds or dollars. In making these conversions the largest number from which a group of items is computed is raised or lowered to the nearest thousands place. The individual items are adjusted to conform to the total thus obtained.

Confidential Data.—The statistical data collected by the Branch are confidential, and unless specific authorization is given, are not divulged in any manner except to employees of the Fish and Wildlife Service whose duties require this information. Statistics on the production of wholesale and manufacturing firms are published only for commodities or geographical areas where the production of three or more firms may be grouped, unless special permission is obtained from the firms involved to release the data.

CONVERSION FACTORS

It is the policy of the Service to show detailed catch figures of all products in pounds for the sake of uniformity and for purposes of comparison. This presents little difficulty in the case of fish since in very rare instances are fish reported in units of measure other than pounds. For shellfish, however, the units of measure may be bushels, sacks, barrels, thousands of shellfish, gallons of meats, etc. These many units make standardization difficult, and when combined with the wide variation in the requirements or definitions of some of these units in the various States the problem becomes even more complex.

All bivalve mollusks are reported in pounds of meats in the detailed catch tables presented in this report. In addition, there are included supplementary tables for most of the sections, which give data on the production in bushels. These supplementary tables also give the production of certain other shellfish, such as crabs, in number.

Oysters.—Probably the greatest problem in the presentation of fishery statistics in uniform units of measure is in the case of oysters. Usually the production of oysters on the Atlantic and Gulf coasts is reported to Service personnel in bushels; and prior to the data obtained for the year 1930 conversion from bushels to pounds of meats was effected on the basis of a uniform yield of 7 pounds of meats to the bushel. However, investigations have shown considerable variation from this figure. There follows a table which gives the measures used for oysters in the various States and the average yields per bushel. The statistical tables in this report are based on these average yields.

MEASURES AND YIELDS OF OYSTERS

STATE	CAPACITY OF STATE BUSHEL	MARKET OYSTERS			
		VARIATION FROM U. S. STANDARD BUSHEL		YIELD PER STATE BUSHEL	YIELD PER STANDARD BUSHEL

1/ INCLUDES OCEAN QUAHOG.

NOTE:--DATA ON YIELDS FOR NEW HAMPSHIRE AND THE SOUTH ATLANTIC AND GULF STATES ARE FOR 1945. ALL OTHER DATA ARE FOR 1946.

Other Conversion Factors.--The principal other conversion factors that have been used in this report are as follows:

Crabs, blue, soft and peelers:

To convert number of crabs to weight in pounds in Florida, divide by 4.3; in Connecticut and Delaware, by 4; in New Jersey, Maryland, and Virginia, by 3; in Louisiana by 2.9; and in North Carolina, by 2.4.

Crabs, blue, hard:

In Virginia, divide by 4.08; in New Jersey and Maryland, divide by 4; in Connecticut and Delaware, by 3; in Florida, by 2.67; in Alabama, by 2.4; in Louisiana, by 2.05; in North Carolina, South Carolina, Georgia, and Mississippi, by 2; and in Texas, by 1.26.

Crabs, rock:

In Maine, New Hampshire, and Massachusetts, divide by 3; and in Rhode Island, by 4.3.

Crabs, stone:

In Florida, divide by 1.

Horseshoe crabs:

In New Jersey, multiply by 4.

Sponges, dried:

In Florida, convert number of bunches to weight in pounds as follows: large wool, multiply by 11; small wool, by 6; wool rags, by 4.57; yellow, by 3; and grass, by 4.

SECTION 13.- GLOSSARY OF NAMES OF FISHERY PRODUCTS

In order to prevent misunderstanding in the use of common names employed in the tables and discussions, the following list of common and scientific names is given.

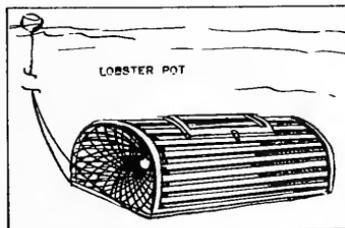

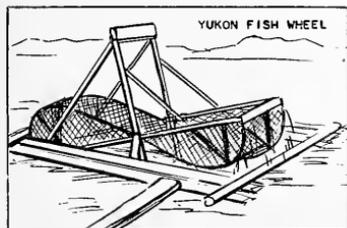

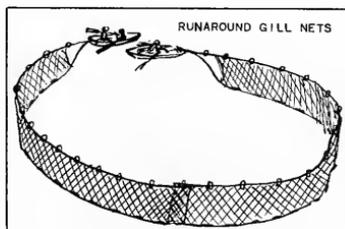

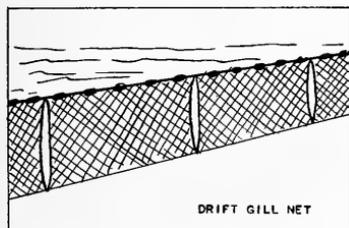

COMMON NAMES AS SHOWN IN SERVICE REPORTS	OTHER COMMON NAMES	SCIENTIFIC NAMES
ALEWIFE	BRANCH HERRING, BIG-EYED HERRING, RIVER HERRING	PMOLOBUS PSEUDOHAERENGUS
AMBERJACK	BLUEBACK, GLUT HERRING, SHAD HERRING	PMOLOBUS AESTIVALIS
ANCHOVY	JACK	SERIOLOA SPECIES ENGRAULIS MORDAX POMACANTHUS SPECIES MOLACANTHUS SPECIES
ANGELFISH	GOOSEFISH, ALLMOUTH, HEADFISH, MONKFISH, BELLYFISH	LOPHIUS PISCATORIUS SPHYRAENA SPECIES
BARRACUDA	SMALLMOUTH BASS	MICROPTERUS GLOMIEU
BLACK BASS	LARGEMOUTH BASS	MICROPTERUS SALMOIDES
BLUEFISH	TAILOR, SKIPJACK	POMATOMUS SALTATRIX
BLUE PIKE	PIKE PERCH, HARD PIKE, BLUE PICKEREL (CANADA)	STIZOSTEDION VITREUM GLAUCUM
BLUE RUNNER OR HARDTAIL	RUNNER	CARANX CRYOSUS
BONITO	SEE TUNA AND TUNALIKE FISHES	
BOWFIN	FRESH-WATER DOGFISH, TCHOUPIQUE, GRINDLE	AMIA CALVA

SECTION 14. - PICTORIAL SECTION

As many of the readers of this publication may not be familiar with all of the species of fish and shellfish, etc., taken commercially in the United States and Alaska, illustrations of many of the various species are included in the following pages. The descriptive material appearing with each species includes the areas in which they are taken commercially and does not constitute the extreme limits in which they occur. Similarly, the gear listed for each species do not represent the only types of apparatus by which these species are obtained, but represent those types of apparatus which are normally used in their capture. The gear do not necessarily appear in the order of their importance.

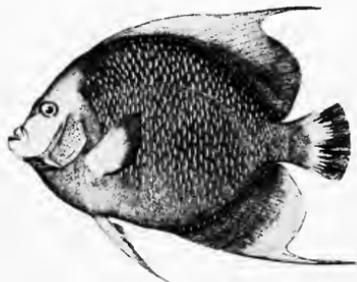

For more detailed information on the nomenclature of the fishery products listed below, the reader is referred to Section 12 of this publication entitled, "Glossary of Names of Fishery Products".

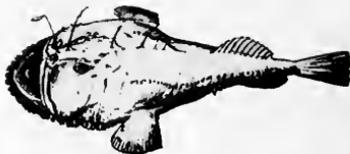

ALEWIFE
RANGE - FLORIDA TO NEW ENGLAND
GEAR - POUND NETS, GILL NETS, WEIRS,
DIP NETS, HAUL SEINES,
FLOATING TRAPS, FYKÉ NETS

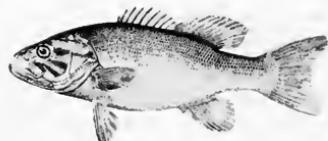

AMBERJACK
RANGE - FLORIDA
GEAR - HAND LINES, TROLL LINES

ANGELFISH
RANGE - FLORIDA
GEAR - HAUL SEINES

ANGLERFISH
RANGE - NEW JERSEY TO MASSACHUSETTS
GEAR - OTTER TRAWLS, POUND NETS

BLACK BASS
RANGE - FRESH-WATER
GEAR - HAUL SEINES, FYKÉ NETS, POUND
NETS, LINES

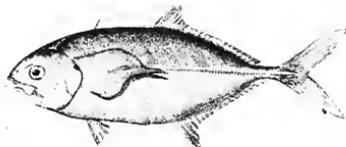

BARRACUDA, (PACIFIC)
RANGE - CALIFORNIA
GEAR - PURSE SEINES, SET LINES,
HAND LINES, TROLL LINES,
GILL AND TRAMMEL NETS.

BARRACUDA, (ATLANTIC)
RANGE - FLORIDA
GEAR - TROLL LINES, HAND LINES

BLUEFISH
 RANGE - GULF OF MEXICO TO NEW ENGLAND
 GEAR - HAUL SEINES, GILL NETS, POUND NETS, TROLL LINES, PURSE SEINES

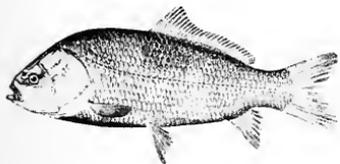

BLUERUNNER OR HARDTAIL
 RANGE - GULF OF MEXICO
 GEAR - HAUL SEINES, GILL NETS, POTS

BONITO, (ATLANTIC)
 RANGE - NORTH CAROLINA TO MASSACHUSETTS
 GEAR - POUND NETS, TROLL LINES, GILL NETS

BOWFIN
 RANGE - FRESH-WATER
 GEAR - HAUL SEINES, TRAP NETS, FYKE NETS

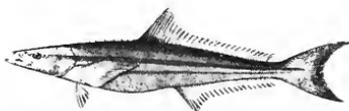

BUFFALOHEAD
 RANGE - FRESH-WATER
 GEAR - HAUL SEINES, FYKE NETS, TRammel NETS, TROT LINES

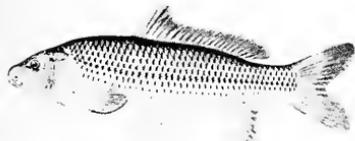

BURBOT
 RANGE - GREAT LAKES
 GEAR - GILL NETS, FYKE NETS, POUND NETS (TRAP NETS)

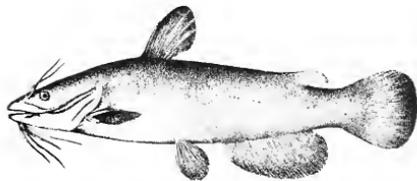

BUTTERFISH
 RANGE - FLORIDA TO NEW ENGLAND
 GEAR - POUND NETS, HAUL SEINES, OTTER TRAWLS

CABIO
 RANGE - FLORIDA TO VIRGINIA
 GEAR - HAND LINES, POUND NETS

CARP
 RANGE - FRESH-WATER
 FEAR - HAUL SEINES, GILL NETS, TRAP NETS, FYKE NETS, POUND NETS, TROT LINES

CATFISH
 RANGE - FRESH-WATER
 GEAR - HAUL SEINES, TROT LINES, POUND NETS, POTS, FYKE NETS

CHUB
RANGE - GREAT LAKES
GEAR - GILL NETS

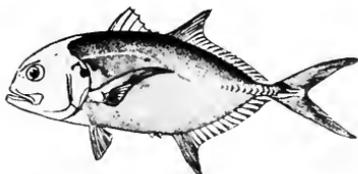

CIGARFISH
RANGE - FLORIDA
GEAR - HAUL SEINES

COD
RANGE - VIRGINIA TO MAINE, WASHINGTON
AND ALASKA
GEAR - OTTER TRAWLS, LINE TRAWLS,
GILL NETS

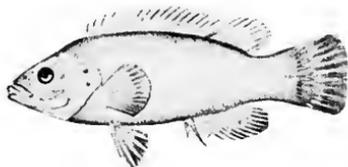

CRAPPIE
RANGE - FRESH-WATER LAKES
GEAR - HAUL SEINES, LINES, POTS

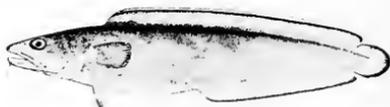

CREVALLE
RANGE - SOUTH ATLANTIC AND GULF STATES
GEAR - HAUL SEINES, GILL NETS, LINES

CROAKER, (ATLANTIC)
RANGE - GULF OF MEXICO TO NEW YORK
GEAR - POUND NETS, OTTER TRAWLS,
HAUL SEINES, GILL NETS

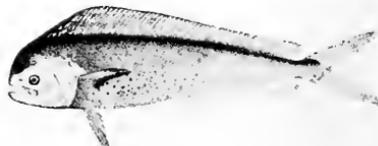

CUNNER
RANGE - NEW ENGLAND
GEAR - OTTER TRAWLS, HAND LINES

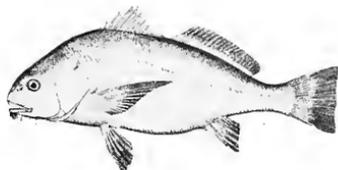

CUSK
RANGE - NEW ENGLAND
GEAR - OTTER TRAWLS, TRAWL LINES

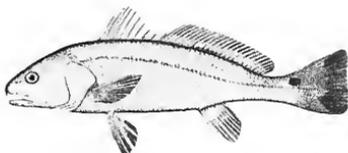

DOLLY VARDEN TROUT
RANGE - PACIFIC COAST
GEAR - POUND NETS, GILL NETS, LINES

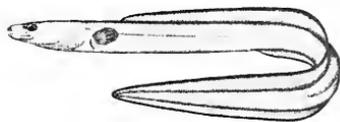

DOLPHIN
RANGE - FLORIDA TO NORTH CAROLINA
GEAR - TROLL LINES

DRUM, BLACK
 RANGE - TEXAS TO NORTH CAROLINA
 GEAR - HAUL SEINES, POUND NETS, LINES

DRUM, RED
 RANGE - TEXAS - MARYLAND
 GEAR - POUND NETS, HAUL SEINES,
 GILL NETS, LINES

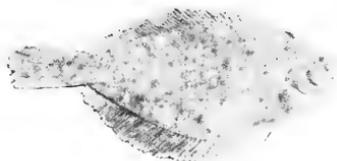

EEL, CONGER
 RANGE - FLORIDA TO NEW ENGLAND
 GEAR - OTTER TRAWLS

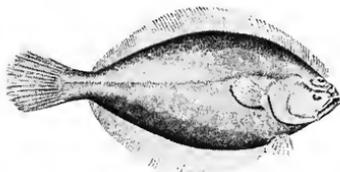

EEL, COMMON
 RANGE - FLORIDA TO NEW ENGLAND AND
 IN MISSISSIPPI RIVER, LAKE
 ONTARIO
 GEAR - POTS, SPEARS, POUND NETS

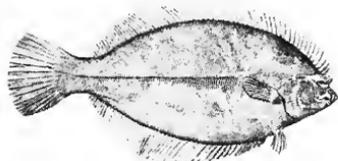

GRAY SOLE
 RANGE - MASSACHUSETTS TO MAINE
 GEAR - OTTER TRAWLS

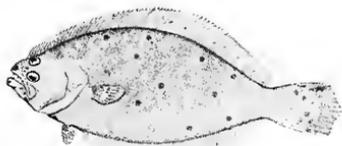

LEMON SOLE
 RANGE - NEW YORK TO MAINE
 GEAR - OTTER TRAWLS

DAB
 RANGE - MASSACHUSETTS TO NOVA SCOTIA
 GEAR - OTTER TRAWLS, TRAWL LINES

BLACKBACK OR WINTER FLDUNDER
 RANGE - NORTH CAROLINA TO MAINE
 GEAR - OTTER TRAWLS, POUND NETS,
 FYKE NETS, SPEARS, LINES

FLUKE
 RANGE - TEXAS TO MASSACHUSETTS
 GEAR - OTTER TRAWLS, SPEARS, LINES

FLYING FISH
 RANGE - PACIFIC AND ATLANTIC
 OCEANS
 GEAR - GILL NETS

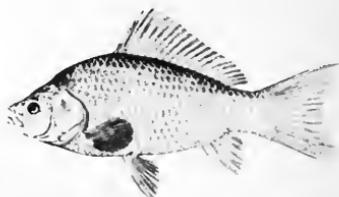

FRIGATE MACKEREL
RANGE - MIDDLE ATLANTIC
GEAR - POUND NETS

GARFISH
RANGE - FRESH-WATER
GEAR - HAUL SEINES, LINES

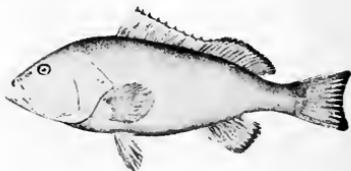

GIZZARD SHAD
RANGE - NORTH CAROLINA TO
MARYLAND, GREAT LAKES
GEAR - HAUL SEINES, POUND NETS,
GILL NETS

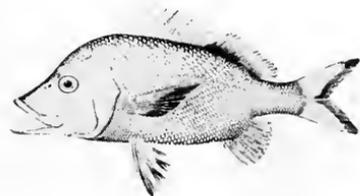

GOLDFISH
RANGE - LAKES AND RIVERS
GEAR - HAUL SEINES, TRAP NETS, FYKE
NETS

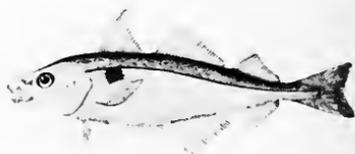

GRAYFISH
RANGE - PACIFIC COAST STATES
GEAR - TRAWL LINES, OTTER TRAWLS,
GILL NETS

GROUPER
RANGE - TEXAS TO SOUTH CAROLINA
GEAR - HAND LINES, POTS

GRUNT
RANGE - FLORIDA
GEAR - POTS, GILL NETS, LINES

HADDOCK
RANGE - NEW ENGLAND STATES
GEAR - OTTER TRAWLS, GILL NETS,
LINE TRAWLS

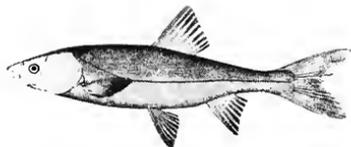

HAKE, RED
RANGE - CHESAPEAKE BAY TO NEW ENGLAND
GEAR - GILL NETS, OTTER TRAWLS, LINE TRAWLS

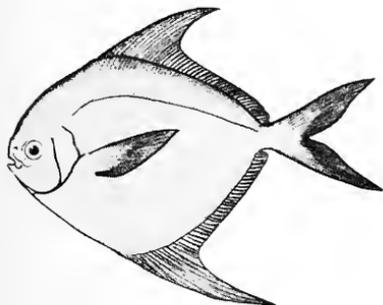

HAKE, WHITE
RANGE - CHESAPEAKE BAY TO NEW
ENGLAND
GEAR - GILL NETS, OTTER TRAWLS,
LINE TRAWLS

HALIBUT
 RANGE - PACIFIC COAST - NEW ENGLAND
 GEAR - TRAWL LINES, OTTER TRAWLS

HARDHEAD
 RANGE - CALIFORNIA
 GEAR - FYKE NETS

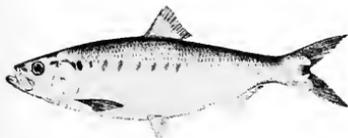

HARVESTFISH OR "STARFISH"
 RANGE - NORTH CAROLINA TO
 CHESAPEAKE BAY
 GEAR - HAUL SEINES, POUND NETS

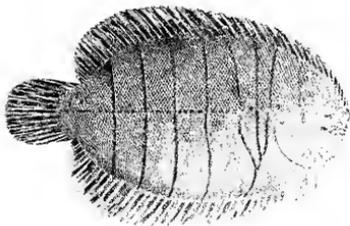

HERRING, LAKE
 RANGE - GREAT LAKES
 GEAR - GILL NETS, HAUL SEINES,
 POUND NETS, TRAP NETS

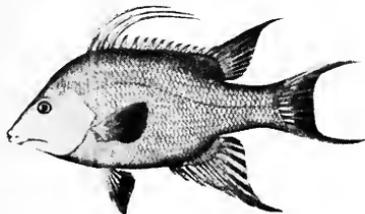

HERRING, SEA
 RANGE - NEW JERSEY TO NEW ENGLAND
 PACIFIC COAST STATES AND
 ALASKA
 GEAR - PURSE SEINES, WEIRS,
 FLOATING TRAPS, STOP SEINES

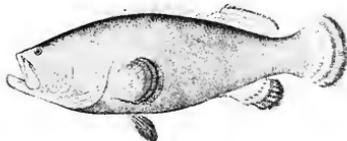

HICKORY SHAD
 RANGE - FLORIDA TO RHODE ISLAND
 GEAR - POUND NETS, HAUL SEINES, GILL NETS
 FLOATING TRAPS

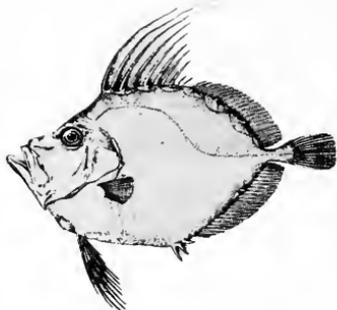

HOGCHOKER
 RANGE - CHESAPEAKE BAY
 GEAR - POUND NETS, HAUL SEINES

HOGFISH
 RANGE - FLORIDA
 GEAR - LINES

JEWFISH
 RANGE - FLORIDA
 GEAR - HAND LINES

JOHN DORY
RANGE - MIDDLE ATLANTIC STATES
GEAR - OTTER TRAWLS

LAKE TROUT
RANGE - GREAT LAKES
GEAR - GILL NETS, LINES, POUND NETS
(TRAP NETS)

LAUNCE
RANGE - NEW ENGLAND
GEAR - HAUL SEINES

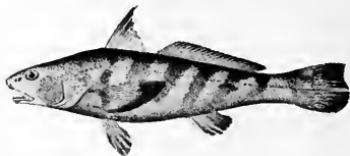

MACKEREL
RANGE - CHESAPEAKE BAY TO GULF OF
ST. LAWRENCE, CALIFORNIA
GEAR - PURSE SEINES, GILL NETS,
POUND NETS, FLOATING TRAPS,
OIP NETS, LAMPARA NETS

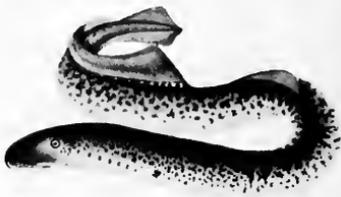

MOONEYE
RANGE - GREAT LAKES
GEAR - HAUL SEINES

KING MACKEREL
RANGE - TEXAS TO NEW YORK
GEAR - TROLL LINES, GILL NETS,
HAND LINES

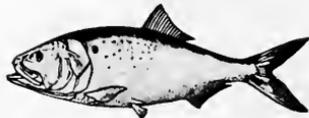

KING WHITING
RANGE - TEXAS TO MASSACHUSETTS
GEAR - OTTER TRAWLS, HAUL SEINES,
POUND NETS

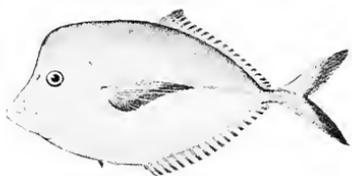

LAMPREY
RANGE - FRESH-WATER
GEAR - POTS, FYKE NETS

LINGCOD
RANGE - CALIFORNIA TO ALASKA
GEAR - OTTER TRAWLS, TRAWL LINES,
SET LINES, HAND LINES

MENHADEN
RANGE - GULF OF MEXICO TO NEW ENGLAND
GEAR - PURSE SEINES, POUND NETS

MOONFISH
 RANGE - FLORIDA
 GEAR - HAND LINES, HAUL SEINES

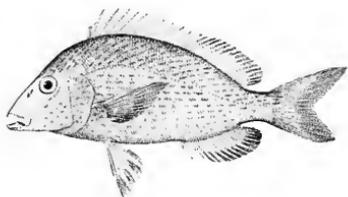

MULLET
 RANGE - TEXAS TO NEW JERSEY
 GEAR - GILL NETS, HAUL SEINES,
 POUND NETS, CAST NETS

OCEAN POUT
 RANGE - NEW ENGLAND
 GEAR - OTTER TRAWLS

PADDLEFISH
 RANGE - GULF OF MEXICO, MISSISSIPPI
 RIVER
 GEAR - HAUL SEINES, TROT LINES

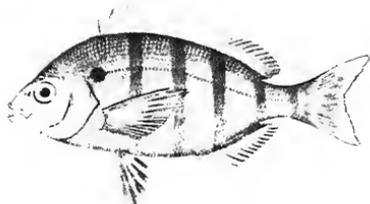

PIGFISH
 RANGE - FLORIDA
 GEAR - POTS, HAND LINES, GILL NETS

PIKE OR PICKEREL
 RANGE - FRESH WATER
 GEAR - TRAP NETS, FYKE NETS,
 GILL NETS, POUND NETS,
 HAND LINES

PILCHARD
 RANGE - CALIFORNIA TO WASHINGTON
 GEAR - PURSE SEINES, LAMPARA AND
 RING NETS, GILL NETS

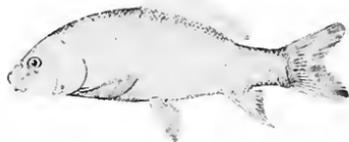

PINFISH
 RANGE - FLORIDA TO NORTH CAROLINA
 GEAR - HAUL SEINES, GILL NETS

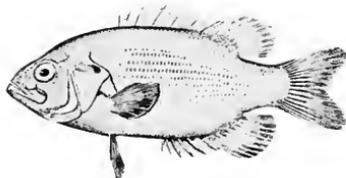

POLLOCK
 RANGE - MIDDLE ATLANTIC AND NEW
 ENGLAND STATES
 GEAR - TRAWL LINES, FLOATING TRAPS,
 POUND NETS, OTTER TRAWLS,
 GILL NETS

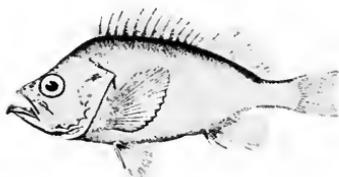

POMPANO
 RANGE - TEXAS TO NORTH CAROLINA
 GEAR - TRAMMEL NETS, HAUL SEINES,
 GILL NETS, HAND LINES

QUILLBACK
 RANGE - FRESH-WATER
 GEAR - HAUL SEINES, TROT LINES, FYKES

ROCK BASS
 RANGE - GREAT LAKES
 GEAR - TRAP NETS, FYKES,
 HAUL SEINES, GILL NETS

ROSEFISH
 RANGE - NEW ENGLAND
 GEAR - OTTER TRAWLS

SABLEFISH
 RANGE - PACIFIC COAST STATES AND
 ALASKA
 GEAR - TRAWL LINES, OTTER TRAWLS

SALMON, CHUM OR KETA
 RANGE - OREGON TO ALASKA
 GEAR - POUND NETS, PURSE SEINES,
 GILL NETS, HAUL SEINES

RATFISH
 RANGE - WASHINGTON TO ALASKA
 GEAR - BEAM TRAWLS, TRAWL LINES

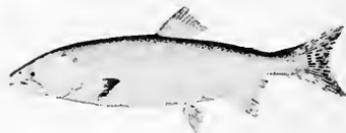

ROCKFISH
 RANGE - CALIFORNIA TO ALASKA
 GEAR - LINES, OTTER TRAWLS
 PARANZELLA NETS, GILL NETS

RUDDERFISH
 RANGE - CALIFORNIA
 GEAR - LAMPARA AND RING NETS

SALMON, RED OR SOCKEYE
 RANGE - OREGON TO ALASKA
 GEAR - GILL NETS, PURSE SEINES,
 POUND NETS

SALMON, PINK
 RANGE - WASHINGTON TO ALASKA
 GEAR - PURSE SEINES, POUND NETS
 GILL NETS

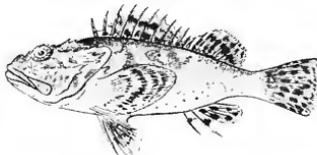

SALMON, SILVER OR COHO
 RANGE - CALIFORNIA TO ALASKA
 GEAR - HAUL SEINES, PURSE SEINES, GILL
 NETS, TROLL LINES, POUND NETS.

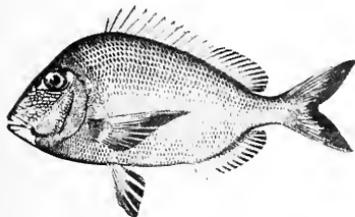

STEELHEAD TROUT
 RANGE - OREGON TO ALASKA
 GEAR - HAUL SEINES, POUND NETS,
 GILL NETS, LINES, OIP NETS

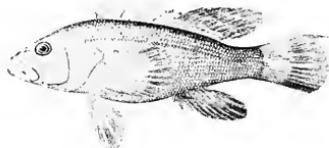

SAUGER
 RANGE - GREAT LAKES
 GEAR - GILL NETS, HAUL SEINES, TRAP
 NETS, FYKE NETS

SCULPIN
 RANGE - PACIFIC COAST STATES AND
 ALASKA
 GEAR - LINES, GILL NETS, POTS

SCUP OR PORGY
 RANGE - FLORIDA TO NEW ENGLAND
 GEAR - OTTER TRAWLS, POUND NETS

SEA BASS
 RANGE - FLORIDA TO NEW ENGLAND
 GEAR - OTTER TRAWLS, HAND LINES, POTS

SEA CATFISH
 RANGE - TEXAS TO CHESAPEAKE BAY
 GEAR - OTTER TRAWLS, HAUL SEINES, HAND
 LINES

SEA TROUT OR WEAKFISH, GRAY
 RANGE - FLORIDA TO MASSACHUSETTS
 GEAR - OTTER TRAWLS, POUND NETS,
 PURSE SEINES, GILL NETS,
 HAUL SEINES

SEA TROUT OR WEAKFISH, SPOTTED
 RANGE - MARYLAND TO TEXAS
 GEAR - GILL NETS, TRAMMEL NETS,
 HAUL SEINES, POUND NETS,
 OTTER TRAWLS, HANO LINES

SEA TROUT OR WEAKFISH, WHITE
 RANGE - GULF OF MEXICO
 GEAR - GILL NETS, HAUL SEINES,
 HAND LINES

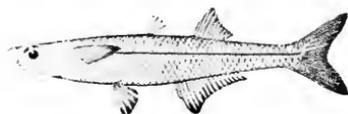

SEA ROBIN
 RANGE - CHESAPEAKE BAY TO NEW ENGLAND
 GEAR - POUND NETS, OTTER TRAWLS

SHARK
 RANGE - ATLANTIC COAST, GULF,
 PACIFIC COAST STATES
 GEAR - TRAWL LINES, GILL NETS,
 OTTER TRAWLS

SHEEPSHEAD, CALIFORNIA
 RANGE - CALIFORNIA
 GEAR - SET LINES, TRAWL NETS

SILVERSIDES
 RANGE - NEW YORK
 GEAR - HAUL SEINES, OTHER TRAWLS

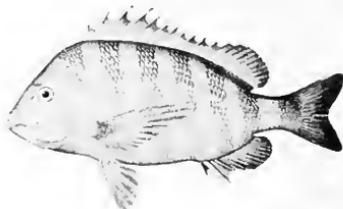

SKIPPER OR BILLFISH
 RANGE - VIRGINIA TO NOVA SCOTIA
 GEAR - POUND NETS, WEIRS

SKATE
 RANGE - PACIFIC COAST, CHESAPEAKE
 BAY TO NEW ENGLAND
 GEAR - LINES, OTTER TRAWLS, POUND
 NETS, HAUL SEINES

SHAD
 RANGE - FLORIDA TO NEW ENGLAND
 GEAR - GILL NETS, POUND NETS,
 FYKE NETS, HAUL SEINES

SHEEPSHEAD
 RANGE - TEXAS TO CHESAPEAKE BAY
 GEAR - HAND LINES, POTS

SILVER PERCH
 RANGE - TEXAS TO NEW YORK
 GEAR - HAUL SEINES, GILL NETS,
 POUND NETS

SMELT
 RANGE - NEW YORK TO MAINE,
 PACIFIC OCEAN, GREAT LAKES
 GEAR - POUND NETS, DIP NETS, GILL NETS,
 HAUL SEINES

LANE SNAPPER
 RANGE - FLORIDA
 GEAR - HAND LINES

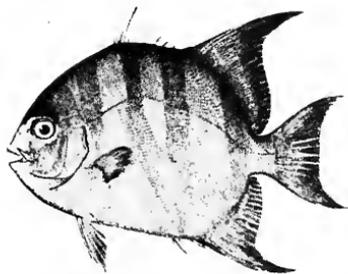

GRAY SNAPPER
RANGE - FLORIDA
GEAR - HAND LINES, GILL NETS

RED SNAPPER
RANGE - TEXAS TO FLORIDA
GEAR - HAND LINES

SNOOK
RANGE - TEXAS TO FLORIDA
GEAR - GILL NETS, HAND LINES,
HAUL SEINES

SPACEFISH
RANGE - FLORIDA
GEAR - GILL NETS, TRAMMEL NETS

SPANISH MACKEREL
RANGE - TEXAS TO VIRGINIA
GEAR - GILL NETS, LINES, HAUL
SEINES

SQUAWFISH
RANGE - CALIFORNIA
GEAR - FYKE NETS, GILL NETS

SPOT
RANGE - GULF OF MEXICO TO MIDDLE
ATLANTIC STATES
GEAR - HAUL SEINES, GILL NETS, POUND
NETS, OTTER TRAWLS

STRIPED BASS
RANGE - NORTH CAROLINA TO NEW
ENGLAND, CALIFORNIA TO
OREGON
GEAR - HAUL SEINES, GILL NETS, POUND
NETS, HAND LINES, FYKE NETS

STURGEON
RANGE - COASTAL AND RIVER AREAS
GEAR - GILL NETS, LINES

STURGEON, SHOVELNOSE
RANGE - FRESH-WATER
GEAR - HAUL SEINES, LINES, POUND NETS

SUCKER
RANGE - FRESH-WATER
GEAR - POUND NETS, FYKE NETS, GILL
NETS, HAUL SEINES, TRAP NETS

SUNFISH
 RANGE - FRESH-WATER
 GEAR - POTS, SEINES, TRAP NETS

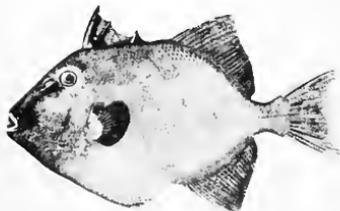

SWORDFISH
 RANGE - NEW ENGLAND AND CALIFORNIA
 GEAR - HARPOONS

TENPOUNDER
 RANGE - FLORIDA
 GEAR - HAUL SEINES

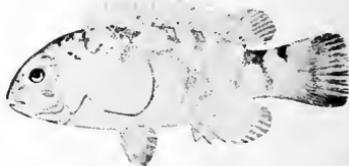

TILEFISH
 RANGE - MIDDLE ATLANTIC AND NEW
 ENGLAND STATES
 GEAR - TRAWL LINES

TRIGGERFISH
 RANGE - FLORIDA
 GEAR - HAND LINES

SWELLFISH
 RANGE - CHESAPEAKE BAY TO MIDDLE
 ATLANTIC
 GEAR - POUND NETS, HAUL SEINES,
 OTTER TRAWLS

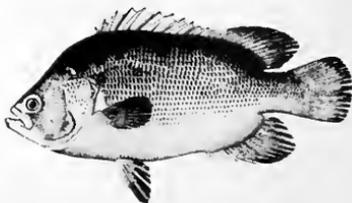

TAUTOG
 RANGE - CHESAPEAKE BAY TO NEW
 ENGLAND
 GEAR - POUND NETS, HAND LINES, POTS

THIMBLE-EYED HAKE
 RANGE - CHESAPEAKE BAY TO NEW ENGLAND
 GEAR - POUND NETS, PURSE SEINES,
 OTTER TRAWLS

TOMCOD
 RANGE - PACIFIC COAST, MIDDLE
 ATLANTIC AND NEW ENGLAND
 STATES
 GEAR - OTTER TRAWLS, DIP NETS

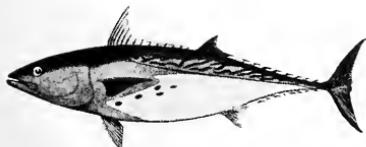

TRIPLETAIL
 RANGE - FLORIDA
 GEAR - HAUL SEINES, GILL NETS, LINES

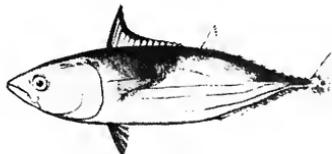

TUNA, ALBACORE
RANGE - PACIFIC COAST
GEAR - LINES

TUNA, BLUEFIN
RANGE - CALIFORNIA, NEW JERSEY TO MAINE
GEAR - PURSE SEINES, LAMPARA NETS, TROLL LINES, POUND NETS, HARPOONS

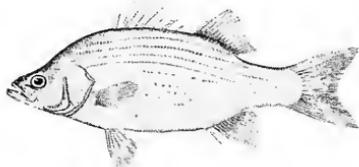

TUNA, LITTLE
RANGE - MISSISSIPPI TO TEXAS
GEAR - POUND NETS, TROLL LINES, OTTER TRAWLS

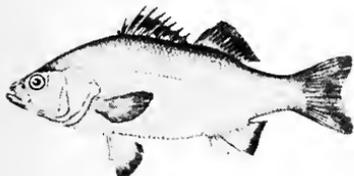

TUNA, SKIPJACK
RANGE - CALIFORNIA
GEAR - LINES, PURSE SEINES

WHITEFISH, MENOMINEE
RANGE - ALASKA, UPPER GREAT LAKES, TO NEW ENGLAND, IN LAKES
GEAR - GILL NETS, HAUL SEINES, TRAP NETS, POUND NETS

WHITE BASS
RANGE - GREAT LAKES
GEAR - TRAP NETS, FYKES, HAUL SEINES, POUND NETS

WHITE PERCH
RANGE - NORTH CAROLINA TO MAINE
GEAR - POUND NETS, FYKE NETS, HAUL SEINES

WHITEFISH, COMMON
RANGE - GREAT LAKES
GEAR - GILL NETS, POUND NETS, TRAP NETS

WOLFFISH
RANGE - MASSACHUSETTS AND MAINE
GEAR - OTTER TRAWLS, LINES TRAWLS

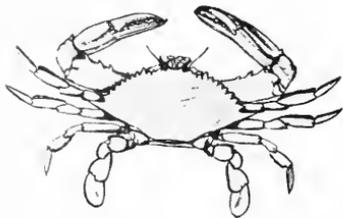

WHITING
RANGE - VIRGINIA TO MAINE
GEAR - OTTER TRAWLS, POUND NETS

YELLOW PERCH
 RANGE - GREAT LAKES, OTHER LAKES
 GEAR - GILL NETS, TRAP NETS, POUND
 NETS, FYKE NETS

YELLOW PIKE
 RANGE - GREAT LAKES
 GEAR - POUND NETS, FYKE NETS, GILL
 NETS, TRAP NETS

BLUE CRAB
 RANGE - TEXAS TO RHODE ISLAND
 GEAR - TROT LINES, POTS, FYKE NETS,
 DIP NETS, SCRAPES, DREDGES

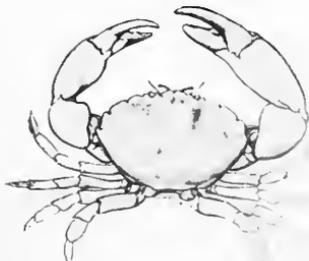

KING CRAB
 RANGE - ALASKA
 GEAR - TANGLE NETS, OTTER TRAWLS

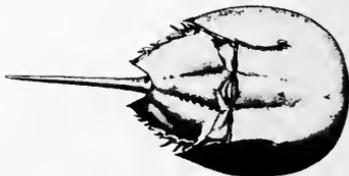

DUNGENESS CRAB
 RANGE - PACIFIC COAST STATES AND
 ALASKA
 GEAR - TRAPS

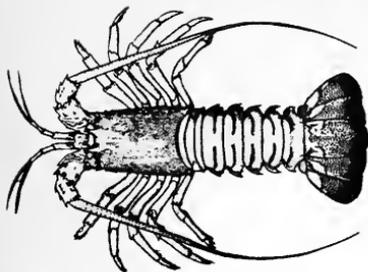

ROCK CRAB
 RANGE - NEW ENGLAND
 GEAR - POTS

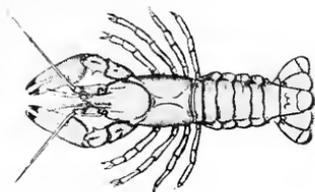

STONE CRAB
 RANGE - FLORIDA
 GEAR - DIP NETS, CRAB POTS

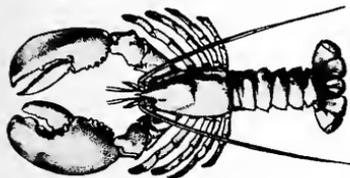

HORSESHOE CRAB
 RANGE - MARYLAND TO NEW YORK
 GEAR - POUND NETS, WEIRS, BY HAND

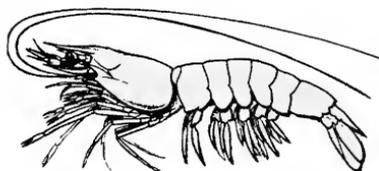

SEA CRAWFISH OR SPINY LOBSTER
 RANGE - CALIFORNIA AND FLORIDA
 GEAR - DIP NETS, POTS, HOOKS

FRESH-WATER CRAWFISH
 RANGE - RIVERS AND LAKES
 GEAR - CRAWFISH (POTS)

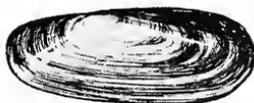

LOBSTER
 RANGE - VIRGINIA TO MAINE
 GEAR - POTS

SHRIMP
 RANGE - TEXAS TO NORTH CAROLINA,
 MAINE, CALIFORNIA,
 WASHINGTON, AND ALASKA
 GEAR - SHRIMP TRAWLS

SOFT CLAM
 RANGE - MIDDLE ATLANTIC TO
 NEW ENGLAND, PACIFIC
 COAST STATES
 GEAR - FORKS, HOES, RAKES

RAZOR CLAM, PACIFIC
 RANGE - OREGON, WASHINGTON AND
 ALASKA
 GEAR - SHOVELS

HARD CLAM
 RANGE - FLORIDA TO MAINE
 GEAR - HOES, DREDGES, TONGS, RAKES
 HAND

LIMPET
 RANGE - NEW YORK AND NEW ENGLAND
 GEAR - DREDGES

LITTLE-NECK CLAM
 RANGE - PACIFIC COAST
 GEAR - SHOVELS

PICTORIAL SECTION

CONCH
 RANGE - FLORIDA TO MAINE
 GEAR - SPONGE HOOKS, OTTER TRAWLS,
 DREDGES, POTS

BUTTER CLAM
 RANGE - PACIFIC COAST
 GEAR - SHOVELS

TREPANG
 RANGE - WASHINGTON
 GEAR - BEAM TRAWLS

FRESH-WATER MUSSEL
 RANGE - FRESH-WATER STREAMS
 GEAR - CROWFOOT BARS, PICKS, HAND

OCEAN MUSSEL
 RANGE - NORTH CAROLINA TO MAINE
 GEAR - DREDGES, TONGS, RAKES, HAND

OYSTER
 RANGE - TEXAS TO MASSACHUSETTS,
 PACIFIC COAST STATES
 GEAR - TONGS, DREDGES, RAKES, HAND

SQUID
 RANGE - VIRGINIA TO MAINE,
 CALIFORNIA AND
 WASHINGTON
 GEAR - LAMPARA NETS, GILL NETS
 OTTER TRAWLS, POUND NETS

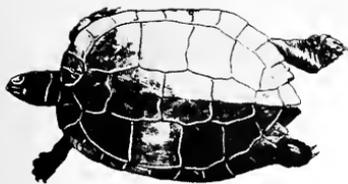

BAY SCALLOP
 RANGE - FLORIDA TO MASSACHUSETTS,
 WASHINGTON
 GEAR - DREDGES, SCRAPES, PUSH NETS,
 TONGS, RAKES

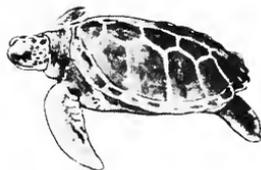

SEA SCALLOP
 RANGE - NEW JERSEY TO MAINE
 GEAR - DREDGES

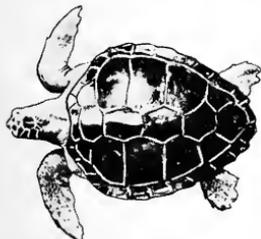

STARFISH
 RANGE - ATLANTIC AND PACIFIC COASTS
 GEAR - HOOKS, SCRAPES, "MOPS"

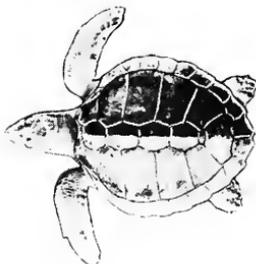

TERRAPIN
 RANGE - TEXAS TO NEW JERSEY
 GEAR - HAUL SEINES, HAND

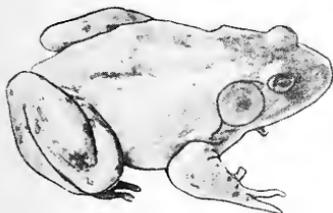

GREEN TURTLE
 RANGE - FLORIDA
 GEAR - GILL NETS, TANGLE NETS

LOGGERHEAD TURTLE
 RANGE - FLORIDA TO NEW JERSEY
 GEAR - GILL NETS

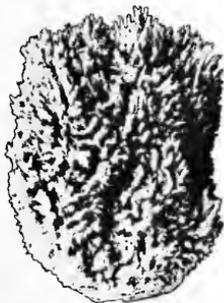

HAWKSBILL TURTLE
 RANGE - GULF OF MEXICO AND ATLANTIC
 COAST TO NEW YORK
 GEAR - HAND, TANGLE NETS, POUNO NETS

FROG
 RANGE - FRESH-WATER, MARSHES, PONOS
 GEAR - SPEARS, GRABS

SOFT-SHELL TURTLE
 RANGE - LAKES AND RIVERS
 GEAR - HAUL SEINES, FYKE NETS,
 POTS

SPONGE
 RANGE - FLORIDA TO WEST INDIES
 GEAR - HOOKS, DIVING OUTFITS

IRISH MOSS
 RANGE - NEW ENGLAND
 GEAR - RAKES

SECTION 15.- STATISTICAL PUBLICATIONS

The following list of publications includes all reports issued in the Current Fishery Statistics series from number 1 to the last one issued in 1946. In future Statistical Digests, this section will carry a list of those reports issued during the year covered by the Digest. Previously reports of this type were published in the Statistical Bulletin series, which ended with number 1437.

<u>C.F.S. NO.</u>	<u>TITLE</u>
1	COLD STORAGE HOLDINGS OF FISHERY PRODUCTS, AUGUST 15, 1941

UNITED STATES
DEPARTMENT OF THE INTERIOR
FISH AND WILDLIFE SERVICE
WASHINGTON 25, D. C.

April 7, 1950

Mr. Leonard Schultz
U. S. National Museum
Washington, D. C.

Dear Leonard:

There is enclosed a spiral bound copy of Fishery Statistics of the United States, 1946 -- our most recent digest -- which contains detailed information on the fisheries of the United States, Alaska, and Hawaii. The report contains 1946 data for all of the Coastal and Great Lakes States, except New Hampshire, New Jersey, Delaware, and the South Atlantic and Gulf States. Data were not collected for those States. More current summary information is contained in the Service's monthly and annual fishery statistical bulletins which are issued as rapidly as the figures become available.

For the first time, information on the fisheries of Hawaii has been included in the digest. It is planned that the Hawaiian section will be a permanent part of future digests. A new section entitled Statistical Publications, which lists all of the reports issued in the Current Fishery Statistics series through 1946, has also been included. This listing will be brought up-to-date in future editions.

We hope to have Fishery Statistics of the United States for 1947 available for release next fall. It will cover the same general field as the 1946 issue, and, in addition, it will contain data on the fisheries of New Hampshire, New Jersey, and Delaware.

We wish these digests to be of maximum value, and we want the material to be presented in the most accessible manner. Therefore, when you have an opportunity, I would appreciate your reviewing the enclosed report and sending me any suggestions you may have for its improvement.

Sincerely yours,

A. W. Anderson, Chief
Branch of Commercial Fisheries

Enclosure
