**LIST OF FISHERY LEAFLETS OF THE
U.S. FISH AND WILDLIFE SERVICE**

by Lola T. Dees
Branch of Reports
Division of Resource Development

Fishery leaflets are correspondence aids giving information on fishes and fisheries. In this report the latest issue or revision of each leaflet is listed, without reference to the original issue. (*Articles preceded by asterisks are out of print, but can be borrowed from some public and college libraries.*)

Available fishery leaflets may be obtained without charge from the U.S. Fish and Wildlife Service. Requests for large amounts will be carefully reviewed to insure fair distribution. Please give title and identification letter and number when making a request.

Created in 1849, the Department of the Interior--
America's Department of Natural Resources--is concerned with
the management, conservation, and development of the Nation's
water, fisheries, wildlife, mineral, forest, and park and recrea-
tional resources. It also has major responsibilities for Indian and
Territorial affairs.

As the Nation's principal conservation agency, the Depart-
ment works to assure that nonrenewable resources are developed and
used wisely, that park and recreational resources are conserved for
the future, and that renewable resources make their full contribu-
tion to the progress, prosperity, and security of the United States--
now and in the future.
