

## LIST OF ILLUSTRATIONS.

Plate.	Page.
1. Map of Lake Washington, Wash., showing Soundings in feet.....	38
2. Lake Sammamish, near Seattle, Wash., showing Soundings taken by U. S. Fish Commission.....	46
3. Map showing region of Woods Hole, Mass.....	85
4. Map showing Location of Salmon Weirs and Traps fished in Penobscot River and Bay.....	118
5. (1) Chinook or Quinnot Salmon ( <i>Oncorhynchus tshawytscha</i> ). (2) Atlantic Salmon ( <i>Salmo salar</i> ). (3) Steelhead Trout ( <i>Salmo gairdneri</i> ).....	124
6. (1) <i>Ictalurus anguilla</i> . (2) <i>Notropis welaka</i> . (3) <i>Notropis hudsonius</i> .....	134
7. (4) <i>Signalosa atchafalaya</i> . (5) <i>Alosa alabamae</i> , male. (6) <i>Alosa alabamae</i> , female. (7) <i>Corythoichthys cayorum</i> .....	134
8. (8) <i>Cottogaster cheneyi</i> . (9) <i>Dermatolepis zancus</i> . (10) <i>Anisotremus surinamensis</i> .....	134
9. (11) <i>Lyosphaera globosa</i> . (12) <i>Lyosphaera globosa</i> , young. (13) <i>Lophogobius cyprinoides</i> . (14) <i>Ogilbia cayorum</i> .....	134
10. (1) Lake Lamprey ( <i>Petromyzon marinus unicolor</i> ). (2) Brook Lampreys ( <i>Lampetra wilderi</i> ), a, male; b, female. (3) Pickerel ( <i>Lucius reticulatus</i> ) and Sucker ( <i>Catostomus commersonii</i> ) with Lamprey Scars. (4) Lake Lamprey clinging to the Sucker.....	209
11. (1) A dozen Catfish ( <i>Ameiurus nebulosus</i> ) fatally attacked by Lake Lamprey ( <i>Petromyzon marinus unicolor</i> ). (2) Eight Catfish ( <i>Ameiurus nebulosus</i> ) fatally attacked by Lake Lamprey.....	212
12. Sheepswool Sponge.....	225
13. (1) Sheepswool Sponge from Matecumbe Key. (2) Sheepswool Sponge from Florida Keys.....	240
14. Cluster of connected Sheepswool Sponges.....	240
15. (1) Sheepswool Sponge from Florida Keys. (2) "Wire" or "Bastard" Sheepswool Sponge.....	240
16. Sheepswool Sponges.....	240
17. Sheepswool Sponges artificially grown from Clippings.....	240
18. Velvet Sponge.....	240
19. Yellow Sponge.....	240
20. Yellow Sponge from Matecumbe Key.....	240
21. Yellow Sponge from Florida Keys.....	240
22. (1) Yellow Sponge locally called "Hardhead"; (2) Yellow Sponge from Biscayne Bay.....	240
23. Yellow Sponge from Anclote Keys.....	240
24. Grass Sponge from Matecumbe Key.....	240
25. Grass Sponge from Florida Keys, two views.....	240
26. Grass Sponge locally known as "Niggerhead," two views.....	240
27. Grass Sponge from Anclote Keys.....	240
28. Grass Sponge containing a large piece of Coral in depression, two views.....	240
29. Grass Sponges from Anclote Keys.....	240
30. Glove Sponges from Florida Keys.....	240
31. Glove Sponge from Florida Keys.....	240
I. Shells of Fresh-water Mussel ( <i>Unio crassidens</i> ).....	375
II. Fresh-water Mussel, showing Pearl included between Mantle and Shell.....	377
III. (1) <i>Dipsas plicatus</i> , interior and exterior, interior containing tin-foil figures of Buddha; (2) <i>Dipsas plicatus</i> , containing three strings of beads with a pearly coating.....	379
IV. Salmon-colored Pearl, weighing 14½ pearl grains, lying loose where it was formed in a shell, four views.....	402
V. Interior and exterior views of Shell, showing barrel-shaped adhering Pearl of large size.....	402
VI. A typical Unio of the Mississippi Valley type, showing exterior of Right Valve and interior of Left Valve.....	402
VII. Left Valve of <i>Unio rectus</i> , outside and inside views.....	402
VIII. Sterling Silver Teapot.....	402
IX. Evolution of a Pearl Button.....	425
X. (1) Hollow pearl made by Chinese, by scaling off a layer from a large Oval Pearl and filling it with a composition of hard wax or shellac to strengthen it; (2) Irregular and Button-shaped Pearls.....	426
XI. Encysted Pearls and Pearls with Marked Interiors.....	426
XII. Same as preceding page, but showing Exterior Sides.....	426
XIII. Pearls presenting the aspect of having been turned in a Lathe—i. e., with one or more regular Ridges or Furrows running completely around them.....	426

## LIST OF ILLUSTRATIONS—Continued.

Plate.	Page.
XIV. Grouped Pearls consisting of several originally distinct Pearls joined together at a later stage by a connecting deposit of Nacre.....	426
XV. (1) Wisconsin pearls. Pink, copper-colored, and brown; (2) Twisted and Reniform Pearly Growths, some showing Grouping or Coalescence .....	426
