

GENERAL INDEX

	Page		Page
abundance:		Hawaiian waters, observations on juvenile skipjack (<i>Katsuwonus pelamis</i>) from.....	245-247
apparent, definition of.....	385	Hobbs, Derisley F.....	360
adjustment, estimates of.....	380, 381	index, catch-per-unit.....	370, 371
Columbia River salmon.....	365	juvenile forms:	
estimation from catch-per-unit.....	374-376	yellowfin tuna, Philippines.....	395-399
<i>albacora</i> , <i>Neothunnus</i>	430	bonito, Philippines.....	400-403
<i>argenteivittatus</i> , <i>Neothunnus</i>	441	frigate mackerel, Philippines.....	234-239
Atlantic mackerel.....	251	skipjack, Philippines.....	399-400
Barnaby, Joseph T.....	359	<i>Grammatocygnus bicarinatus</i> , Philippines.....	458
biometric comparison between yellowfin tunas (<i>Neothunnus</i>) of Angola and of the Pacific Coast of Central America.....	425-443	Katsuwonidae, description of juveniles.....	245-247
body proportions, tuna.....	241-244	larval forms:	
bonito (<i>E. yaito</i>):		bonito, Philippines.....	471-477
juvenile forms, Philippines.....	400-403	frigate mackerel, Philippines.....	477-483
larval stages, Philippines.....	471-477	skipjack, Philippines.....	465-471
spawning observations, Philippines.....	409-410	yellowfin, Philippines.....	458-475
Bonneville Dam fish count.....	374	<i>Grammatocygnus bicarinatus</i> , Philippines.....	458-458
calipers for measuring tunas.....	242	length-frequency records, mackerel, Atlantic.....	317
cannery records, Columbia River.....	366	mackerel, Atlantic.....	251
catch:		distribution.....	253
Columbia River chinook salmon.....	373	food.....	268
per-unit-of-effort.....	367	length-frequency records.....	317
zero.....	360, 370	marking experiments.....	347
chain link method.....	368	migration:	
chinook salmon.....	365	adult mackerel.....	268
Columbia River salmon, fluctuations in abundance.....	365	young mackerel.....	312
dams, effect on salmon survival.....	381	morphometric evidence.....	314
deliveries of salmon, frequency of.....	369, 370	oil content.....	268
description of a projection device for use in age determination from fish scales.....	405-407	schooling habits.....	262
distribution, mackerel, Atlantic.....	253	seasonal distribution.....	254
Eastern Pacific Ocean, Observations on juvenile sierra mackerel (<i>Scomberomorus sierra</i>) from.....	247-250	vertical distribution.....	265
Eckles, Howard H.: Observations on juvenile oceanic skipjack (<i>Katsuwonus pelamis</i>) from Hawaiian waters and sierra mackerel (<i>Scomberomorus sierra</i>) from the Eastern Pacific.....	245-250	winter habitat.....	256
effort, fishing, Columbia River.....	372, 373	<i>macropterus</i> , <i>Neothunnus</i>	425
engines, fishing boat.....	371	marking experiments, mackerel, Atlantic.....	347
escapement:		Marr, John C.: Apparent abundance of the pilchard (<i>Sardinops caerulea</i>) off Oregon and Washington, 1935-43, as measured by catch per boat.....	385-394
Columbia River chinook salmon.....	374-377	Marr, John C., and Milner B. Schaefer: Definitions of body dimensions used in describing tunas.....	241-244
salmon, relation to return.....	376, 377	Matson, Chester M.....	359
exploitation rate.....	374, 375	migration, mackerel, Atlantic adult.....	268
fishermen, in catch-per-unit study.....	368	mackerel, Atlantic, young.....	312
fishing intensity.....	372	morphometric measurements.....	425
fish-receiving stations, Columbia River.....	366	Mosher, Kenneth H.: Description of a projection device for use in age determination from fish scales.....	405-407
fluctuations, Columbia River salmon.....	365	<i>Neothunnus albacora</i>	430
Foerster, R. E.....	359	<i>argenteivittatus</i>	441
food, mackerel, Atlantic.....	268	<i>macropterus</i>	425
frigate mackerels (genus <i>Auzia</i>):		Oceanic skipjack, description of juveniles.....	245-247
juvenile forms, Philippines.....	234-239	oil content, mackerel, Atlantic.....	268
larval forms, Philippines.....	477-483	<i>Oncorhynchus tshawytscha</i>	365
spawning, Philippines.....	481-483	Philippine Islands:	
species, Philippines.....	229-234	juvenile forms of tuna.....	395-404
gear, salmon, efficiency of.....	371	larval forms of tuna.....	445-485
gill nets.....	365, 367	spawning observations, tuna.....	409-423
<i>Grammatocygnus bicarinatus</i> :		frigate mackerels, species.....	229-240
juvenile form, Philippines.....	458	pilchard, Oregon-Washington, 1935-43:	
larval form, Philippines.....	456-458	apparent abundance.....	386-391
Gray, J.....	360	availability.....	391-393
growth:		behavior.....	386
Atlantic yellowfin tuna.....	430	catch and temperature.....	393
Pacific yellowfin tuna.....	425		

	Page		Page
catch per-unit-of-effort.....	386-391	sierra mackerel, description of juveniles.....	247-250
fishing methods.....	385-386	Silliman, Ralph P.: Fluctuations in abundance of Columbia River	
landings.....	387	chinook salmon (<i>Oncorhynchus tshawytscha</i>) 1935-45.....	365
time of season and temperature.....	393	skipjack, description of juveniles or striped tuna (<i>K. pelamis</i>).....	245-247
Pritchard, A. L.....	359	juvenile forms, Philippines.....	399-400
return, Columbia River chinook salmon.....	374-381	larval stages, Philippines.....	465-471
runs, chinook salmon.....	367, 368	spawning, observations, Philippines.....	411-415
Rutter, Cloudsley.....	360	spawning observations:	
salinity, relation to salmon survival.....	382	bonito, Philippine.....	409-410
salmon:		frigate mackerel, Philippine.....	481-483
chinook.....	365	skipjack, Philippine.....	411-415
rate of fertilization, natural.....	390	yellowfin tuna, Philippine.....	415-422
sex ratios.....	359-360, 363	spermatozoa vitality, salmonoids.....	360
spawning activities.....	360	stream flow, effect on salmon survival.....	377-378
spermatozoa dissemination.....	360-363	temperature, effect on salmon survival.....	379, 380
spermatozoa vitality.....	360, 363	trends of abundance.....	382
sample of fishermen.....	368	troll fishery.....	366, 372
sardine, Oregon-Washington, 1935-43:		tuna, definitions of body proportions.....	241-244
apparent abundance.....	386-391	description of juveniles, oceanic skipjack.....	245-247
availability.....	391-393	yellowfin.....	425
behavior.....	386	juvenile forms, Philippines.....	395-399
catch and temperature.....	393	larval stages, Philippines.....	458-465
catch per-unit-of-effort.....	386-391	spawning observations, Philippines.....	415-422
fishing methods.....	385-386	unit-of-effort.....	369
landings.....	387	vertical distribution, mackerel, Atlantic.....	265
time of season and temperature.....	393	Wade, Charles B.: Juvenile forms of <i>Neothunnus macropterus</i> , <i>Kat-</i>	
<i>Sardinops caerulea</i>	385	<i>suboncus pelamis</i> , and <i>Euthynnus yaito</i> from Philippine seas.....	395-404
Schaefer, Milner B., and John C. Marr: Definitions of body dimen-		Larvae of tuna and tuna-like fishes from Philippine seas.....	445-485
sions used in describing tunas.....	241-244	Notes on the Philippine frigate mackerels, family Thunnidae,	
Schaefer, Milner B., and Lionel A. Walford: Biometric comparison		genus <i>Auris</i>	229-240
between yellowfin tunas (<i>Neothunnus</i>) of Angola and of the Pacific		Observations on spawning of Philippine tuna.....	409-423
Coast of Central America.....	425-443	Walford, Lionel A., and Milner B. Schaefer: Biometric comparison	
schooling habits, mackerel, Atlantic.....	262	between yellowfin tunas (<i>Neothunnus</i>) of Angola and of the Pacific	
Schultz, Leonard P.....	360	Coast of Central America.....	425-443
<i>Scomber scombrus</i>	251	weighting, catch-per-unit.....	372
<i>Scomberomorus sierra</i> , description of juveniles.....	247-250	White, H. C.....	360
seasonal distribution, mackerel, Atlantic.....	254	winter habitat, mackerel, Atlantic.....	256
seasonal exploitation rate.....	374, 375	yellowfin tuna (<i>N. macropterus</i>).....	425
season, closed, effect on fishing effort.....	373	juvenile forms, Philippines.....	395-399
season of fishing, Columbia River.....	367	larval stages, Philippines.....	458-465
Sette, Oscar Elton: Biology of the Atlantic mackerel (<i>Scomber scom-</i>		spawning observations, Philippines.....	415-422
<i>brus</i>) of North America Part II—Migrations and habits.....	251	zones, statistical, Columbia River.....	365
Shuman, Richard F.: On the effectiveness of spermatozoa of the pink			
salmon (<i>Oncorhynchus gorbusha</i>) at varying distances from point of			
dispersal.....	359
