## CONTENTS

**COVER:** The Atlantic Coast dragger (small- or medium-size otter trawler) is common along the Atlantic Coast from Virginia to Maine. This type of craft is usually powered with a Diesel engine of 100-300 hp., carries a crew of from 2-10 fishermen, and is at sea from 1 to 8 days. Vessels of this type catch a large share of the whiting, flounders, scup, noncommercial species, and also sea scallops that are landed at United States east coast ports.
